It is astonishing the number of intelligent people who regard a cold or cough as a trivial matter, something unnecessary to pay attention to. How many times have you heard the expression, "Oh nothing the matter with a slight cold." Yes my friend, and nine-tenths of the many thousand consumptives who walk the earth to-day doomed to a premature death, said the same thing. We pay attention to a cold, and promptly too. Our remedy is Amnen's Cough Syrup; some other preparations are good, but we have found it by far the best.

HOLLOWAY'S PILLS—Never Despair. Something that never fails—Fever and Ague—To the sick it is of little value—how they are cured, whether from a rational view of the disease or by the ruse defined for the guidance of the profession, so long as the cure is certain and expeditious. To a suffering man the question on the relative merits of quinine or calomel is uninteresting. The faculty may wrangle and discuss their various theories, but Dr. Holloway's treatment dispels doubt ere the disciples of Esculapius have finished the first stage. Holloway's Pills are the only remedies which effect a speedy and radical cure without danger of a relapse. Read the advertisement elsewhere.

IMPORTANT CAUTION—None are genuine unless the signature of J. HAYDOCK, surrounds each box of Pills and Ointment. Boxes at 25 cents, 62 cents and \$1 each.

There is considerable saving by taking the larger sizes.

RAILROAD ITEMS.

We are not informed as to the reason of the withdrawal of forces from the railroad extension northward from Redding and the order disbanded the Harburt surveying party on the Siskiyou but the generally accepted cause for these sudden changes is that the O. & C. R. Co. is yet undecided as to which route they will take, and all operations south of Grants Pass will stop for the present—until such time when the general route of the road is fully decided upon. Time will tell.

The Railroad Company had about a thousand Chinamen on the road at and above Redding, before work was suspended for the winter. An effort was made to do some grading for the tunnel about six miles north of Pitt river, but the bad condition of the road rendered it impossible to secure supplies from Redding by teams. As early as possible in the spring, a large force will be set at work, and the superintending bosses say there will be work for all who desire to exercise their muscle, and also for their teams, if they have any.

The Sacramento "Bee" thus explains the reason for the withdrawal of the force sent up to Redding a few weeks ago: "Five more carloads of Chinese in the employ of the railroad contractors who were to have made an extension from Redding to Oregon, were taken to Lathrop by the Stockton train yesterday, and thence by the Southern Pacific to Mojave, from which place a narrow gauge road is being built eastward to the terminal point of the old Atlantic and Pacific Railroad. The grading on the Oregon extension has been postponed until next spring on account of the rains, but the work of constructing bridges and making tunnels will be continued."

The Yreka "Journal" learns that the force intended to work on the railroad above Redding, were unable to get supplies hauled to them, hence their withdrawal to work in the Mojave country until spring. The long covered wagons drawn by six and eight fine animals could not be engineered around the sharp turns through the deep mud in the road by the teamsters of the railroad company, who do not understand the business like our mountain teamsters. Still it was better to wait until spring, as the work would be too slow and tedious under the best management, as the unusual heavy rains so early in the season had made the roads too heavy for any advantage. Hauling for a miles in this locality where the grading work was to be started, a distance of some twenty miles above Redding. Very little work in railroad building will be done before spring, but the three companies of surveyors will continue operations in trying to secure better locating routes for road bed. One party under Graham is now at Portuguese Flat, and another under Warner is at Bailey's while the Gillis party is still working between Klamath river and the Oregon boundary.

By Mutual Accord. AVERES CATHARTIC PILLS are the best of all purgatives for family use. They are the product of long, laborious, and successful chemical investigation, and their extensive use, by physicians in their practice, and by all civilized nations, proves them the best and most effectual purgative Pill that medical science can devise. Being purely vegetable no harm can arise from their use. In intrinsic value and curative powers no other Pills can be compared with them, and every person, knowing their virtues, will employ them, when needed. They keep the system in perfect order, and maintain in healthy action the whole machinery of life. Mild, searching and effectual, they are especially adapted to the needs of the digestive apparatus, derangements of which they prevent and cure, if timely taken. They are the best and safest physic to employ for children and weakened constitutions, were a mild but effectual cathartic is required.
