sition, as it contains more cane sugar, and also to the absence of pollen, which is to be found in all honey. While pollen generally does no harm to bees, in winter, it is not good in some cases and may be the cause of fatal dysen tery. Dissolve the sugar for feeding in an equal bulk of water, and heat un-

the exceptionally early season. They need at least thirty pounds of good food per hive, and they should be crowded upon just enough frames to contain them, by using division boards. chaff hives are used, the packing above and at the end of the frames should be added at the same time. It is always best to have the fine chaff or sawdust in sacks. However we winter, whether in chaff or hives, or in the common hives with chaff packing, or in cellars, it will always pay to pack above and should be put into the cellar as early as November 2st, before the severe weather sets in. The hives should be dry when set in, and in the removal disturb the bees as little as possible When in the cellar, remove the tops of the hives, but not the chaff pillow. The entrance should be left open.

The railroad construction for the year will exceed 12,000 miles. The total mileage of the country Jan. 1, 1883, will be 116,000 a gain of more than 22 per cent, on the mileage of two years ago. Of course there has been no corresponding increase in the population, commerce or railroad traf-At Or Near Jacksonville. fic. It therefore seems as though railroad builders must be looking to the future for their profits. The cost of the new road built since 1880 is about \$600,000,000.

The track was finished to "West fork," the fifty-two mile post last Monday. Here will be a short halt as a bridge of considerable importance spans that stream and at about 1 mile be-"Plaindealer."

A LITTLE PHUENOLOGY.

Round eyed persons see much: live much in the senses, but think less. Narrow eved persons, on the other hand, see less, but think more and feel more intensely. It will be observed California promises a quarter crop this that the eyes of children are open and round. Their who'e life is to receive impressions. It is only when childhood is maturing toward manhood or womanhood that thought comes at all. outlook for the honey crop of the But what is it that most leads to recountry this season is a little better flection? Experience. Our errors, our shortcomings, our failures—these teach Let the honey be thoroughly graded us to think before we act, to consider as it is put on the market; let it be in each step, to weigh every motive. clean crates, so made that every passer- When, therefore, the upper eyelidby shall be enticed, as he sees it; let for it is that which has the greatest there be no possible chance for the amount of mobility-droops over the honey to leak and disgust the dealer; eye it indicates not merely reflection, and always see that every groceryman but something painful to reflect about, in the vicinity has a supply of this Hence the length or drooping of the upper eyelid betokens confession and penitence. The drooping of haif of way to manage sour honey is to heat the eyelids from the outer angle to the center indicates the disposition to congerms which cause the fermentation; fess one's faults to parents or seniors. then feed it back to the bees. Fullness and wrinkles under the eye, for which some persons are remarkable. indicate the love of mathematical accuracy; and wrinkles curving upward from the outer angle of the eve and eyebrow indicate probity of personal truthfulness. There are three degrees til it boils, and when cold it is ready of the faculty of justice. The first is a kind of exactness or strict honesty in It will be remembered that many bees small money matters, which some peowere lostduring the winter of 1880-81, ple would call closeness and is indifrom neglect. They were caught by cated by a singular perpendicular wrinkle or line between the eyebrows. The second is the description to find justice in others and is indicated by two perpendicular lines or wrinkles one on each side of the center-a very common sign. The third degree is con-If the bees are to be packed, this should scientiousness, or the disposition to be done as early as October 1st, and if apply the rules of justice to one's self, and is indicated by three or more wrinkles across the root of the nose, exactly between the eyes. It may be seen in great military commanders, in masters and teachers, and in those generally who are fond of exercising anthority. In those who are wanting in the power to command and have no desire for responsibility this sign is also absent. The faculty of command freat the side of frames. The hives quently acts with that part of justice which reprimands, or requires others to do right, and both together produce that frowning and lewering brow which is so terrible to evil doors or

> A company composed of Seattle and San Francisco men have organized the Seattle Hop Growers' Association, with the cultivation of hope as their object. They expect to put in cultivation the largest field of hops in the world, and with this object in view have purchased a farm of 700 acres in Snoqualmie valley back of Seattle paying \$22 per acre for it. They will plant 300 acres in March and in subsequent years will plant the remaining 400. Their necessary expenses during the coming season will be about \$60,-000. The yield of the first year is estimated at 800 pounds per acre. At the present price for hope the first years crop would pay for the land, the clearing, the cultivation and leave a profit of at least 50 per cent.

to those who love to be approved rather

than condemned.

A Eugene girl, says the "Guard," who has carroty hair, squint eyes, and no beau, supplies the abrence of a mustache by tickling her upper lip with a yond is tunnel No. 2 which will not shoe brush. When it comes down to the hands of an attorney for forced col-lection. Business is meant and all accounts be opened for several weeks, says the maidens never get left.
