FEELS CONFIDENT.—J. H. Huffer returned from Portland this week after he had gone to introduce his hydraulic device for deepening the channel in rivers. He informs us that the Portland Board of Trade has taken the matter in hand and an experiment is to be made to test its practicability. The inventor is sanguine of making it a success and we hope to see him realize something therefrom.

RAILROAD SURVEY.—Dolson's surveying party is expected at Rock Point next Monday when the work of surveying through the valley will be commenced. A difference of opinion still exists as to which route will be selected through the valley, but the majority seem to believe that it will come by Fort Lane. As several lines will most likely be run it will become time yet before the route is finally located to a point opposite Jacksonville.

TOWN TRUSTEES.—The Board of Trustees met last Saturday evening. All the members present except Dr. Jackson who is absent on a professional tour. The Recorder rendered a report showing the present financial condition of the town. Ladd Savage was appointed Pound Keeper for the ensuing year. After some discussion upon the subject of employing a night watchman the subject was postponed until the next meeting and the Board adjourned to meet on the 18th.

ISSUE.—Asa G. Fordyce was brought down from Ashland yesterday by A. D. Helman, M. Mickelson and Loui Tucker and was examined before the county court on a charge of insanity. He was pronounced insane by Dr. Vrooman, the physician who examined him and will be taken to the asylum at once. He received a paralytic stroke not long since and his mind became deranged shortly afterwards. Yesterday his insanity took a violent form and he made an attempt on the life of his daughter-in-law—wife of George W. Fordyce—but did not succeed in doing any harm. Fordyce is one of our old settlers, and his many friends will be sorry to hear of his sad misfortune. We hope to chronicle his speedy recovery.

ANOTHER PARRICIDE.—News reached town last Monday that J. F. McMahon of Wagner creek had been killed early that morning by his son William who is about 23 years of age. J. H. Huffer acting as Coroner, visited the scene of the tragedy at once, and after an examination of the case they returned the following verdict: We the Coroners Jury summoned to enquire into the cause of the death of J. F. McMahon, find that the said J. F. McMahon was fifty years old and a native of Ohio, and a resident of Wagner Creek, Jackson county, State of Oregon, and he came to his death at his residence, about seven o'clock on the morning of the 9th day of April, 1883, by a pistol shot in the outer corner of the right eye, the pistol being held in the hand of J. W. McMahon, and was fired with the intent to kill the said J. F. McMahon, and that the said J. W. McMahon committed a crime by killing the said J. F. McMahon, and we believe he should be arrested and tried for the same.

When the above conclusions were reached by the jury the accused was taken in charge by the authorities at Ashland, where he was taken for preliminary examination before Justice Root. After a two day's examination the justice bound him over to appear at the next term of court to answer the charge of manslaughter—fixing his bail at \$500—which, by the way, seems very low to us if the accused is guilty of the crime charged.

The facts elicited at the preliminary examination are about as follows: Some hard feelings had existed between father and son for some time past on account of the presence of a widow that was stopping at the house, and on the morning of the tragedy the two commenced quarreling when the father picked up a stick of wood and beat the boy over the head. Meeting in the yard again a short time afterwards the fight started anew when the old man used a fence rail for a weapon and the boy pulled his little pistol, shooting his father in the eye and killing him instantly. We heard by telegraph last evening that the boy had given bail and is now at liberty.

Here is the New York "Suns" definition of Butlerism: Butlerism means the conglomerate science of being smart and honest at the same time; of knowing shams and hating shams; of going for shams, both theoretically, and practically, and of not caring a tinker's damn who gets hurt.

In the light of the recent development of the investigations instigated by Governor Butler, especially the Tewksbury Alms-house affair, this definition is certainly applicable to the Butlerism of to day at last.

From the answers to questions sent to representative farmers throughout the Willamette valley by the Oregon and California railroad and the Oregon Railway and Navigation Company it seems that the recent freeze has been rather a benefit than detriment to the wheat yield of the present year. The ground has been thoroughly mellowed, noxious weeds have been killed, and the soil put in the best possible condition for resowing. The yield of the valley this year will be without doubt, much larger than ever before known, and notwithstanding the ominous outlook of a month ago, we can still boast that the Willamette or Rogue River valleys never lost a crop.

A Serious Charge Against M. C. George.—There have been serious charges made against our representative M. C. George, in relation to the re-appointment of Mr. Nickerson as agent of the Klamath Indian reservation. It appears that there was a petition sent to Mr. George, and signed by nearly all the settlers in the vicinity of the agency, asking for the appointment of O. C. Applegate to this position and making some very grave charges against Mr. Nickerson. It now appears that all these petitions were suppressed by Mr. George and were never seen by the commissioner of Indian affairs.

The right of petition is sacredly guaranteed by the constitution, and Mr. George should be made to know that it is as much a violation of this right to suppress a petition as it is to refuse it a hearing.—"Lakeview Examiner."

The charge contained in the above item is one of sufficient importance to demand the immediate attention of our Representative. We hope he will lose no time in rendering a full explanation of the matter and we cannot but believe that he will be able to fully exonerate himself from the very serious charge preferred by the "Examiner."
