HOLIDAY GOODS. All to be sold at the LOWEST PRICE!

Drugs and Medicines. Prescriptions carefully compounded. E. C. BROOKS.

WHAT SHALL THE BOYS DO?

Parents are continually confronted with this question. Many parents answer it wrongly. The father desires that his sons shall not undergo the toil and self denial that he has undergone, forgetting, or perhaps not realizing in any proper sense, that it was that toil and that self-denial that made him the man he is.

The mother has her foolish notions about the respectability of certain grades of employment which enables those following them to wear good clothes and exhibit a few of the superficial evidences of refinement and culture.

The boy, with his inexperience and inability to look below the surface of things, is easily led to follow the well intended, but foolish judgment of his parents and commences his life by swelling the list of book-keepers without a ledger, doctors without patients, lawyers without clients and genteel clerks without employment.

The first thing the parent or teacher should do is to study carefully the boy's aptitudes. Having done this he should be taught that any kind of honest labor is honorable and that what he could do best should be his calling.

As a matter whether it was to make shoes or carriages, to raise cattle or to butcher them. Many a boy who in time becomes a good farmer, owning a farm and a home of his own, becomes an indifferent hand-to-hand salesman in a store at a salary that will only barely keep soul and body together and provide no accumulation for sickness and old age.

Many a boy who by learning the machinist's trade could some day be at the head of a great manufactory, remains in obscurity and poverty because his parents thought the profession of book-keeper would be more genteel.

A little study of the advertising columns in a great daily, journal, or an inquiry among the leading business men of any thriving town, would cause a revelation that would serve to deter parents from making semi-educate their sons by crowding the already over-crowded positions of clerks and book keepers with them.

In the city of New York there are at the present time 6,000 book keepers out of employment, and of the 23,000 who have more or less steady employment in that calling in that city very few receive over \$25 per week, while a far greater number are glad to accept \$10 to \$15. A business man who advertises for a clerk at \$10 a week and had 700 applications for the place.

In view of these facts the parents of boys should urge them to learn trades, to go into the shops or on the farm, wherever honest work is to be done, and to avoid as they would the pestilence the semi-genteel callings, which are so over-crowded that the majority who are dependent on them have no hope of more than the barest subsistence while they remain in them.

NOT IF IT WAS DONE. Mr. Schumacher, who was the candidate of the prohibition party for governor, has been interviewed, and gives the public a piece of his mind in regard to the Republican party which corroborates what has heretofore been said about the attitude of the prohibitionists toward the party to which they were indebted for the opportunity to vote for the prohibitory amendment. He says: "I understand that the Republicans are charging us with their defeat. I hope they will come to believe it; that is what we intended to do."

There can be no misunderstanding such an expression, and the Republicans are generally coming to understand how it was done.

He says: "We owed them nothing. They snubbed the prohibition amendment simply because 157,000 people asked for it." How about Democratic party, which was solid in the legislature against the amendment, and which is the beneficiary of the Republican defeat which the prohibitionists "intended to" and did administer? Such expressions from leaders of the prohibition movement will not fail to open the eyes of Republicans to their real animus. They have defeated the Republican party and say they intend to do it again. They have elected a Democratic ticket, and a Democratic legislature, on a platform hostile to their creatures next winter with their petitions and see what kind of a reception they will meet with. They cannot constantly ask the Republicans to help them under the circumstances.

THE CHINESE IDEA OF EUROPEANS. A Chinese placard posted over the Yunnan Province, next to Tonquin, gives this interesting information: "The Europeans do not belong to the human race. They are descended from Monkeys and from Gorse, besides they much resemble monkeys. Their hearts are like the heart of the Devil, therefore they are called Kou-Tse, which signifies European devils. These savages believe in neither earth nor heaven, do not honor their fathers or mothers, do not venerate their ancestors; the sanctity of family ties is unknown among them. They are a veritable herd of pigs, a pack of dogs; they are never talking about equality; they have no notion of social rank, and make no distinction between father and son, king and subject. You will ask, perhaps, how it is that such savages could be skilful enough to make steamers, railroads and watches. Know, then that those who come among us under pretext of preaching religion, do tear out the eyes and brains of dying Chinese, and collect the blood of our children to manufacture it into pills, which they sell to their countrymen in order to make them skilful. Only those among them who have thus eaten of our substance become intelligent enough to make those discoveries of which they are so vainglorious.

There is a sound reason why there are bones in our meat and stones in our land. A world where everything was easy would be a nursery for babies, but not at all a fit place for men. Celery is not sweet until it has felt a frost, and men don't come to their perfection till disappointment has dropped a half-hundred weight or two on their toes. Who would know good horses if there were no heavy loads?

St. Louis has 20,000 public school pupils—more than half the whole number—studying German.
