ABLE FOR THE REPUBLICANS.

Special to the Chicago Tribune. CLEVELAND, Sept. 20 .- For a time the Republicans of this state were quite faint hearted over the political situation. The Democrats had a letter applying this organization, and with the Standard Oil Company as their backer were reported to have great sums of money The stories of defections among Germans were greatly exaggerated. The temperance issue was thought to be unavoidable. The Democrats had planned a comprehensive colonization scheme. Ohio has no registry law, It used to have, but the Democratic legislature repealed this most useful shield against fraud. Colonization For sale by all druggists or mailed on from Indiana was particularly dread ed, as the western tier of towns in this state along the Indiana line are Democratic. To offset this the eastern tier of counties in Indiana are Republican. The local managers in these Republican counties will keep watch against

colonists being run over from the other The situation, which two weeks ago looked so alarming, has changed compl tely. The Republicans have been benefited by the scare. They are now splendidly equipped and organized. This state is being closely canvassed, so that by the 1st of O toher the Republican managers will be able to tell within a fer fundred votes how the state will go. From the reports already in, the Republicans feel confident of carrying the state in October by from 15,000 to 20,000 majority. They are encouraged in this view by the fact that outside of Cincinnatti there is almost no defection among the Germans. Upon this point im portant testimony is given by Fitz Glogoeur, editor of the Cleveland "Anzeiger." This paper has supported the Democratic party in the last few contests in this state, when the tem perance issue has been made prominent. Mr. Glogoeur said to your correspondent: "There is no defection among the Germans in Ohio now from the Republican party. We are for Blaine. My paper supports him. We recognize the fact that the temperance issue is not in this campaign. The people who are talking of the German bolt from Biaine on account of an illegal temperance issue must think the Germans are fools. The majority of the Germans and sa'oon keepers are satisfied with the present license law in this state, and regard it as the best possible solution of the question. General Logan has done great work in this state in stirring up the enthu siasm of ithe Republicans so as to set them to work, and now that Blaine has arrived, the demonstrations in his behalf have disheartened the Demo crats. > The Wisdom and Foolishness of Bathing.

Our modern habits have made the batking room a most important part of the house, Every one bathes. The bath has been so long and so industriously trumpeted as a panacea for almost everything that even those who shiver after a cold bath or fell like fainting after a warm one will regu larly take either one or the other. He who does not take a morning bath in these days scarcely dare own to the fact, for he feels that he will be regarded at once as an uncleanly person. Yet there is no necessary connection between cleanliness and total immersion of the body for a greater or less period. The bath, as now understood, is, as is well known to many physicians, too rude a treatment for many persons of sensitive temperament. It is not every organism that can stand the chill of a plunge in cold water and the shock of a shower upon the head. If reaction is swift, and all the organs of the body in good working order, cold and shower baths may often be beneficial; but if the tone of the system is low the reaction will not take place and injury will result. It would be well if we would trust our sea tions more and follow our wills less. standing in currents of air.

Fast Riding.

Talking of fast riding the other day, a gentleman of this city, gave a report er of the "Times-Mountaineer" some of his experiences in the saldle. The absolute end of all Democratic pre- disaffiction and bitter criticism of the tensions of electing their national bolters has not reached the popular feeling. The average man has followed Mr. Blaine's career with pride and satisfaction. The average man admires brains and elequence and magnanimity in a political leader. The magnetism which the independent press sneers at so constantly is just what the average man likes. Why shouldn't he like a bright, clear headed, attractive man better than a stupid, common place man? The thing which the dudes and Pharisees" cannot understand at all is human nature. And their distrust of it is greater than their ignorance of it. They really take stock in Matthew Arnold's nonsense about "remnants" and the superior sagacity and purity of the select few, and they believe that themselves constitute the precious remnant, the leavening element, in the American nation. The truth is that the opinions and instincts of the plain people in this country are usually about right, and the man who distrust the plain people are themselves to be distrusted. The enthusiasm of the people is a great moral force, not an immuoral force as the American disciples of Arnold hold .- "Minneapolis Tribune."

The ball was much too large and heavy, being atlowed a circumference of 101 inches and a weight of 6} ounces, just an inch in size and an ounce in weight greater than the present limit. There was no limitation to the length of the bat. In the year 1863 two important new rules were made, one requiring the pitcher to stand in a space six feet by three and the other requiring the umpire to call balls and give the bateman his first base after three had been called. Until December 14, 1864, a fair ball, if caught on the first bounce, put the striker out, but on the above date the National Association of Base Ball Players did away with the bound catch, except for foul balls, and finally adopted the fly game. Forty-five feet was the distance from the pitcher's position to the home plate until 1881, when it was moved five feet further back .- "Philadelphia Times." During the recent unprecedented
