DIPHTHERIA.—Diphtheria has invaded the household of A. L. Rose, of Phoenix, and Mrs. Rose has been lying at the point of death for several days. The desperate nature of the case was realized last week when the physician, Dr. Geary, after consultation with Dr. Parson of this place, decided upon the operation of tracheotomy, since which time the patient has been breathing through the tube with more comfort. At last report she was very low, but there was some hope remaining. Three of the children also had diphtheria but are reported out of danger now. No other cases have occurred at Phoenix, so far as we have heard.—"Tidings."

Pander to fill the vacancies on the finance committee caused by the resignation of A. W. Withers and J. H. Lyon. The other member of the committee is E. H. Stolte. Robert Newcomb, Grand Recorder of the A. O. U. W. of Oregon, died Saturday on board the steamer San Diego, while on his way from Los Angeles to San Francisco. He has been afflicted with asthma for a long time and went to California some months ago for his health. He was a native of New Orleans, aged 41 years and leaves a wife and one son. The remains will be brought to Portland for interment.

There will be a boom in quartz mines before long and all who have something to dispose of in that line can then sell out according to what they can show up. Jackson county is rich in all kinds of minerals and we look for a thorough prospecting soon when another Comstock can be looked for in different portions of the county.

Regardless of the fact that Oregon is a heavily timbered State, Michigan lumber is sold along the Oregon Short Line at a big profit. This is something that should not be permitted. It is an indication that somebody is sound asleep in the great Northwest, where people are usually regarded as being wide awake and full of business.

The case in the U. S. district court against Jesse Waters, charged with trespassing on the Klamath reservation, has been dismissed. The alleged trespass consisted in Waters driving his cattle upon the reservation, but the evidence to sustain this charge was lacking. Two of the witnesses for the prosecution were unwilling ones, and the third had not the best character in the world to sustain his testimony, being under indictment for murder.

We are informed that the Portland Board of Immigration are in the employ of the railroad company and urge all to go to Jackson county to locate. How true this is we do not know, but the actions of the members of the board would say that it is true.—"Oregon City Enterprise."

Jackson county has room for a much larger population and even if the above charge be true we doubt if the new comers could be sent to a more favorable locality where they can secure homes. Send them along.

It seems that we are soon to know whether the "man in the moon" is or is not a myth. The successful casting of the lenses for the great Lick telescope has finally been accomplished, and they only need polishing now to be ready for use. In looking through this telescope, says a San Francisco paper, it is reckoned that the moon will be brought within thirty miles of the earth, and that discoveries will be made on that planet to solve problems that have heretofore been held to be unsolvable.

A slight change in the time table of the O. & C. R. R. will go into effect on Sunday next. The change will not affect the north end of the line but the train going south will arrive at Ashland half an hour earlier and leave there three-quarters of an hour later than at present, in order to give the coaches of the California stage line more time to make the connection. Trains will arrive at Ashland at 4:35 A. M. and leave there at 9:30 P. M. By this arrangement trains from the south will be due at Medford at 10:11 P. M. and from the north at 3:25 A. M.

The Commissioners this week decided against buying either the Rock Point or Centennial bridges and for the present at least they will not be free bridges. The reason assigned is that the new bridge just ordered built across Rogue River near Bylles' ferry would accommodate most of the residents on the other side and the county being so much in debt it was not advisable to make it more so at this time. We disagree, however, and think that Chavner's bridge should have been bought and thus made free for all that travel that way. Something like 6000 names were on Mr. Chavner's petition including nearly all the heavy tax payers of the county.

Ye man of the quill paid a brief visit to the famous section known as Missouri Flat. While there we came very near entering a famous fight which we think eventually eclipses any pugilistic contest that ever occurred between Sullivan and any of his peers. Without the formality of challenge, two Missouri Flat girls rush at each other with the ferocity of Bengal tigers. Ye gods, what screaming and hair pulling took place for a few minutes. It was Josephine county against Jackson, and we are more than happy to chronicle the fact that the laurel of victory was placed upon the brow of the lassie of Josephine. The Jackson county girl faintly yelled no "more."—"Courier."

Little Pauline Brown died last Thursday night after a short but very severe illness of malignant diphtheria. Mrs. Brown has been an invalid for a year past and little Pauline was like a sun beam to lighten the weary hours of the sick room. But in perfect health she was suddenly stricken down with a fatal disease and the home that was made happy by her presence is sad and desolate. The little one who is thus gathering in innumerable companies on the Golden Shore are dispelling the dark shadows that border the mystic river, and while their sweet voices no longer respond to the loving endearments of parents they never Heaven more desirable for "their angels do always behold the face of the Father."

GRAND CORNET BAND CONTEST.—Two liberal cash prizes will be offered during the coming Red Men's celebration in this place, and the bands of Southern Oregon and Northern California are invited to compete for them. The first prize will be not less than \$50 and the second not less than \$25. The contest will take place on May 15th and all bands that compete for the above prizes must be present on the 15th, at which date all entries will be made. Several bands will be in attendance.

Mrs. Mattie A. Bridge will lecture by special invitation of the W. C. T. U. at the Court House next Sunday evening at half past seven o'clock. She comes highly recommended by the press and people of the northern part of Oregon and California; and there is no doubt but a rare intellectual treat is in store for us in her forthcoming lecture, which will be in the temperance cause, and the subject "Social Breakers." Mrs. Bridge concluded her series of lectures in Ashland last night, and our Ashland friends are enthusiastic in their admiration of her. She has been engaged to lecture in Medford next Tuesday night and will return north from there. Go and hear her.

The affairs of the A. O. U. W. and of the Franklin Loan and Building Association, which were under charge of the secretary, the late Robert Newcomb, are in good shape, and there will not be the least disturbance of them on account of his death. When he left for southern California he expected to be absent some time, so no objection was entered to his resignation, and Dr. J. A. Child and W. V. Spencer have looked after the financial matters ever since. Grand Master T. B. Handley will appoint a grand secretary of the A. O. U. W. as soon as possible, as provided by the laws of the order, and a secretary of the building association will be elected at the next meeting, which occurs May 6th. Mr. Newcomb's life was insured for about \$10,000 in secret organizations.

A crowd of forty six immigrants filed into the office of the Oregon Immigration Board yesterday forenoon, and pounced on Secretary Carlisle for information descriptive of Oregon. The States of Iowa, Indiana, Michigan, Missouri and California were well represented by sturdy farmers, stock men, dairy men, etc. Mr. Carlisle saw the uselessness of setting forth the advantages of the country individually to every person, and hit upon the idea of addressing the crowd collectively. In a few minutes all had concluded to settle in Oregon. Twenty three tickets were issued to Southern Oregon, of which seven were for the round trip. One half of the people will leave for their destination today. Quite a number will remain here in the city. When the audience dispersed, forty six copies of "Oregon As It Is," were ready for the postman, mailed to Eastern parties.—"Portland News."

Chance for Health and Discomfort. Man is dependent upon his surroundings for the necessities of life. Air and water are necessities of life, but impure air and impure water are most prolific sources of disease. Food is also a necessity of life, but numerous diseases are traceable to both a lack of necessary food, and an indulgence in special kinds of nourishment. Besides these external sources of disease there are other more subtle and internal causes. Each individual inherits from his parents a certain physical constitution. Each person therefore derives his chances of health or disease from a double source, namely his inherited constitution and his surroundings in life. Sanitary science seeks to overcome the constitutional or inherited weakness by medicine that supply what is wanting in the system. De Haven's Dyspepsia Cure supplies that which is wanting to ensure proper assimilation and digestion of food. Try it. Free sample bottles at E. C. Brooks'.
