The Fool-Killer.

I sometimes think that if the fool killer would give a fittle more attention to his business and would try a little harder to earn his salary there would be less complaint and less dissatisfaction on the part of the intelligent tax-payer. Now, for instance, suppose that he should, prior to each election, hold a kind of competentive examination of look to close with a grand tournament and fool shoot at thirty yards rise; or the fool could be ade to pay each year for a license, the revenue to go to the government, partial fools to pay \$50 Meanse, chronic fools \$100 and hopeless fools \$200 per year.
