The loss of stock in Klamath county this winter has been very slight. She rushed out into the sitting room to extinguish her burning dress, when Mrs. Keam, under the excitement, jumped out of bed, threw a comforter over Mrs. Rankin in placing Mrs. Keam in bed again, and it is earnestly hoped by the many friends of the family that nothing serious may result. Mrs. Rankin had the back of her head and part of the arm in flames, and was in a very serious condition. —Yreka Journal.

Prof. Benson and C. K. Chaslor will probably contest their respective party strength for the office of county clerk.

The weather for the past ten days has been like summer, the thermometer going up as high as 80 degrees in the middle of the day.

The leap year ball given at this place on the 24th was an event not soon to be forgotten by those who love to dance.

The management was good and the behavior the very best throughout the entire night; no drinking by the boys be it to their credit. The music by Prof. Gandy's orchestra, assisted by Dr. Vanduyke, was all that could be desired.

Forty-seven tickets were sold. The ladies were very choice of their "honey dews" and the hall the lady took and wrapped and sealed the poor little thing, who seem to fully appreciate his littleness in some instances very perceptibly drew himself up small in his honest endeavor to conform to the situation.

Across the hall a "Code of rules for this party" met your gaze; gentlemen were required to read them, yet no "real male man" was permitted to cross the floor without a lady escort for he was expected to behave in the most "ladylike manner."

The rules further stipulated that gentlemen are expected to be languid and drop their handkerchiefs as often as possible, make frequent calls for water, and at supper to give the ladies no time for eating.

In conclusion this "hop" was a decided success; its management, good behavior and general joy, well worthy of emulation by the boys at their next grand ball. Fox.

No fish this spring. A fish law with a loop-hole big enough to let Evan's creek through it is entitled to very little respect. The legislature passing it is entitled to less. The man who will take advantage of it to the injury of 500 people is simply contemptible.

Some of our citizens do not always refer to a certain saw-mill when they say "dam," though its owner is remembered.

The fish commissioners say that the Clackamas hatchery will never be able to furnish any more young salmon than will be needed to stock the Columbia river. There are a number of rivers along the coast of Oregon which are frequented by salmon, on many of which canneries are established, and the commissioners are making arrangements to procure 5,000,000 young salmon from the government hatchery on the McCloud river, California, which will supply half a million to each of ten streams.

The parties applying for these fish will have to prepare some accommodation for them and to care for them for a short time, as the fish when received will not be fit to turn out to shift for themselves. Parties interested in the fisheries on these streams should make preparations for these fish, as unless salmon are transplanted into these rivers they will soon be fished out.

All of our attorneys and a large number of other residents of this vicinity will be in attendance at court at Grant's Pass next week.
