e children by the way. ong the dusty wayside, They are treading day by day : And the heart of earth is throbbing, With the music of their feet, Like a tar off echo sweet.

They are marching! Who are marching? Youth in might, and manhood's prime, Golden visions beckon onward, Joyous hearts beat measured time; O be wise, bright gems that glitter, Earth born treasures soon decay, Let the goal be "life eternal," And thy labor "while 'tis day."

They are marching! Who are marching? Just adown life's sunny slope, Aged footsteps slowly falter, Reft of strength, but calm with hope; Just beyond the light is gleaming, And the race is almost won. Courage, twilight shades shall gather.

Golden with the setting sun. We are marching, we are marching, From the cradle to the grave. And we may not cease our journey-May not stay time's rolling wave; As our path is onward ever, Let our course be upward, too; Dark the skies and rough the weather, Angel fingers beckon you.

The Oregon Central Railroad.

We take pleasure in noting that in erior of the State. > AMERICAN INDUSTRY AND INVEN-TION IN EUROPE. - The Paris correspondent of the N. Y. Times says:

Our countrymen carry their enterprises everywhere, and the superiority of our skill is acknowledged, as we are constantly having evidence. Mr. Goodall, agent of the American Bank Note Company, has just con luded a contract with the National Bank of Tuscany for a large quantity of Notes, of the denomination of two and ten francs, to be furnished withn the short space of three months. The National Bank of Tusceny will probably be consolidated with the National Bank of Sardinia, and the satisfaction given by our admirable specimens of bank note printing will probably obtain for our engravers large orders to be filled in the future. Within a week past, gold has been at a premium of 18 and 20 per cent. with a great demand for notes of small denominations. The price of gold is less now, and small bills, for the convenience of trade, are much ought for at about the same pre-
