

A Moment of Dependence.
O fearful gift of sympathy! O heart
Too finely strung, whose silken fibres rise
Or fall with gentlest airs that blow them! I
Have suffered undesired tortures for
This fond solicitude for other souls.
Misplaced, it may be, hence the penalty;
But who shall tell the blossom when and
where.
It may diffuse its fragrance, that a sense
Appreciative only meet its breath?
It is too late, when song has gushed from
birds,
To say no ear shall thrill with ecstasy
Receptive of its inspiration! And,
Too late when mountain cascades float in
spray,
Deep hidden in primeval shade, to say
No sunbeams there disclose an iris wreath!
And so the free outpouring of the wealth
Of nature's warm untrammelled feelings,
late,
Too late for calm philosophy to save
The sorrow disappointment brings.

How To Make Good Butter.
Leo, of Raymond, New Hampshire,
writes to the *Rural New Yorker*: It
is a well known fact that a good loca-
tion and cleanliness are among the
most essential points in making good
butter. Every dairy should be so
located in it may be cool and shady
with a good draft of air circulating
through it. A large dairy and well
filled ought to be the motto of every
farm house. As soon as the milk is
brought in it should be scalded, as we
get more cream and better by so
doing. Butter comes better and is
not so liable to be soft and sticky. As
soon as taken from the churn it should
be thoroughly worked, left until next
morning and worked again. Next
salt in the following way: Take two
quarts of good salt, one ounce of sugar
and one ounce of salt peter. Use one
ounce of this composition for one
pound of butter. It should be stamp-
ed and left to cool before putting in
jars. Butter prepared in this way
should not be used in two or three
weeks. You will find that your but-
ter will be very fine, as it will have
no brittle or salty look or taste. By
following this course your butter will
keep year through, in warm as well
as cold weather.

Good Substitute For Paint.—For
the benefit of our readers, both in
the city and in the country, we pub-
lish the following receipt for making
a wash for fences and out buildings,
which is said to look almost as well
as paint. We quote from the *Chem-
ical Gazette*: "Take a clean water-
tight barrel, or other suitable cask,
and put into it a half bushel of lime.
Slack it by pouring boiling water
over it, and in sufficient quantity to
cover five inches deep, stirring it
briskly till thoroughly slacked.
When slacking has been effected, dis-
solve in water, an add two pounds of
sulphate of zinc and one of common
salt. These will cause the wash to
harden and prevent it cracking, which
gives an unseemly appearance to the
work. If desirable, a beautiful cream
color may be communicated to the
above wash, by adding three pounds
of yellow ochre, or a good pearl or
lead color by the addition of lamp
vine or ivory black. For fawn col-
or, add four pounds of umber—
Turkish or American—the latter is
the cheaper, one pound of Indian red
and one pound common lamp-black.
This wash may be applied with a
common whitewash brush, and will
be found much superior, both in ap-
pearance and durability, to common
whitewash."

Deodorizers.—The following arti-
cles are easily available for the sup-
pression of noxious gas, so fatal to
health and life:
Two pounds of sulphate of iron
(copperas) dissolved in a pailful of
water, and poured into a vault, will
prevent the formation of sulphuretted
hydrogen gas for some time, and will
generally be sufficient to remove all
nuisance.
A layer of charcoal dust will pre-
vent the escape of all offensive odor
from any decomposing substance.
One pound of nitrate of lead dis-
solved in a pailful of water, is excel-
lent for sinks, sick drains and vaults.
Other things fail, chloride of
lime is always efficient, and may be
freely as it upon vaults and other col-
lections of filth.
These substances are not expensive,
and will effectually destroy all the
offensive smells. The quantity to be
used will depend on the quantity of
filth to be deodorized, and their per-
manency of effect upon local condi-
tions in each case.

An ingenious person in New Or-
leans has been engaged in making
thread from the stalks of the cotton
plant. It is very fine and strong, and
looks very much like flax, being
nearly as soft and pliable. He pro-
poses to make this thread into cloth,
which, he says, will be as strong and
durable as that made from cotton
itself. Forty pounds of thread can
be made from one hundred and twenty
pounds of stalk. A new factory will
soon be established for the manufac-
ture of cloth from this substance.
Should this prove successful, it will
double the value of the cotton planta-
tions at the South.

Solvent For Old Putty and Paint.
Soft soap mixed with a solution of
potash or caustic soda, or pearlash
and slaked lime mixed with sufficient
water to form a paste. Either may
be laid on with a brush or rag, and
when left for some hours will render
its removal easy.—*Scientific Amer-
ican.*

FALL SOWING OF TIMOTHY.—Many
acres of timothy are often lost in
consequence of excessive drouth in
some seasons; and even in ordinary
seasons, Spring sowing more fre-
quently proves a failure in whole or
in part, than it proves successful.
When sown in spring, it is almost
uniformly sown with grain; the grain
grows more rapidly than the timothy,
and often overshadows it, and extracts
the moisture from the soil that the
young timothy requires to insure a
firm foothold to enable it to with-
stand the increased heat and drouth
of Summer. If the Spring proves a
wet one, and the timothy makes a
good start, it is greatly retarded in
its growth, and many of the young
plants are entirely killed out by being
overgrown with the grain, or trodden
down and lost in the act of harvesting,
and by the pasturage of stock upon
the stubble of the grain, so that tim-
othy, under the most favorable cir-
cumstances the following season, will
not cover the ground so well as that
which is sown in the Fall.

A thorough preparation of the
ground is as necessary for a timothy
meadow as for any other crop. In-
deed, we consider it more important.
The ground should not only be well
broken up, but the surface should be
well harrowed and rolled.
The use of mowing machines ren-
ders it necessary that all meadows
that are to be cut with them, should
be freed from all stones, stumps and
grubs, and that the surface be as uni-
formly smooth as it can be made.
This is not only demanded on account
of the free, unobstructed use of the
machine, but the success and profit
of the crop will more than com-
pensate for the extra labor in preparing
the soil. For all crops this important
requisite is too much overlooked.
"Land well prepared, is half tilled,"
to say nothing of the increased yield
from such preparation.
Not less than one bushel of seed
should be applied to six acres. We
are aware that one gallon to the acre
is considered sufficient by some farm-
ers, but twice that quantity is better
than less.—*Rural World.*

WEEDING POTATOES WITH SHEEP.
It may not be known to farmers in
general that this is a common practice,
in some of the extensive potato-growing
districts, to turn flocks of sheep into
the potato fields for the purpose of
eating down the weeds. The sheep
will not touch a potato vine; they
cannot be starved into eating them.
This pasturing with sheep is very
advantageous when the crop is a late
planted one, so that the hoeing can-
not be completed until after the hay-
ing or harvest is finished. At that
growing season it is the planter's aim
to keep down the grass and weeds, so
that they may be covered with dirt by
the cultivator and hoe, when these
are used. Pasturing with sheep will
attain this object. Early planted
crops, the cultivation of which is com-
pleted in the first half the summer,
frequently become grassy and weedy
before the time of digging—when the
size of the tops precludes cultivation.
In this stage the sheep are economical
weeder: It is hardly necessary to
mention that the food thus given to
the sheep makes a double profit while
labor is said and weeds prevented
from seeding in the crop.—*Rural.*

FILTERING WATER.—Le Goble *Indus-
trie*, reports a new application of
the law of capillary attraction, by
Mons. Amen Vigio, to the filtration
of water on a large scale. His sys-
tem is the ascensional power of water
through porous bodies. By the law
of capillarity, water will penetrate a
porous body of a certain height. If
when arrived at that point, it finds a
siphon curve, it will follow that curve,
and run off; and thus a regular and
constant current may be obtained.
The water elevated slowly by capil-
lary attraction, is freed from all im-
purities held in suspension, and in the
condition as if it had passed through a
filter. Mons Vigio had caused to be
made for his experiments filters of
terracotta, very porous. This sub-
stance has the advantage of great
durability, and it is inert and cannot
alter the water. The filters placed in
mud worked for a long time without
their pores being choked; the part
immersed in the mud working as
effectively as the other parts.

NAILS—WHY CALLED SIXPENNY.
EIGHTPENNY, &c.—Geo. Barney,
Swanton, Vt., says: "Fifty years ago
or more my father made nails to sell
the early settlers in these parts. They
were cut from plate by a machine
worked by hand, and each nail sepa-
rately headed by hand. He has told
me they sold nails those days by count,
not by weight, and the small nails
were less in price per 100 than large
ones. So I conclude that in past
generations in England that they sold
100 small nails for four pence, and
these took the name of fourpenny
nails, 100 eightpenny nails at 8d, 100
nails at 10d, &c."

How to Save Pumpkin-SEEDS.—Cut
a circular hole in the top of a box, six
or eight inches across. Divide your
pumpkins strait across the center, and
strike the halves down upon the
board over the hole. The best of
the seeds will fall through clean and
ready to dry for use. You can save
them faster in that way than in any
other.

Mrs. Jenkins complained in the
evening that the turkey she had eaten
at Thanksgiving did not set well.
"Probably," said Jenkins, "it was not a
hen-turkey."

Fall and Winter Importation
—OF—
DRY GOODS
—FOR—
1866 and 1867
AT THE OLD STAND,
Main Street, Oregon City,
BY
J. R. RALSTON.

THE PEOPLE'S FRIEND!
Perry Davis' Vegetable Pain Killer!
Wonderful Cures of the Rev. D. L. Drayton,
Missionary in India, who was stung by
a Scorpion.
Extract from his letter, published in the
Baptist Missionary Magazine:
"For the first time since I have been in In-
dia, I have been stung by a scorpion. I went
out this morning to my exercises, as usual,
and early dawn, and having occasion to use
an old box, on taking off the cover I put my
hand on a scorpion, which immediately re-
garded the result by thrusting its sting into
the palm of my hand. The instant pain
and severe pain which darted through the
system is quite incredible; what an awfully
violent person their sting must contain! I
rushed to my room and put on a bandage
and found it to be true to its name; after a
moment's relief, I saturated a small piece of
sponge, bound it on my hand and went about
my exercises, feeling no more particular in-
convenience."
KERSENE James, and Oil, kept con-
stantly on hand by
CHARMAN & BRO.
Island Sugar and Molasses.
2,500 KEES ISLAND SUGAR,
150 BBL'S. ISLAND MOLASSES,

will leave Astoria on Tuesday and Saturday
at 6 a. m.
J. C. AINSWORTH,
President O. S. N. Co.

PEACE! PEACE!
TO THE POOR INVALID NOTHING IS
more pleasing.
CANCERS.—One of the most torturing
diseases on earth, conquered and eradicated
without the use of instruments by Dr. W. M.
HENLEY.
Nine-tenths of the diseases prevalent in
this climate, caused in the first place by
Bad Colds and Coughs. I have one of the
best preparations for the Cure of Coughs,
Colds, Whooping Cough, Bronchitis or Sore-
ness of the Chest, ever before offered to the
human family. A troublesome Hacking
Cough it will remove in a few days.
Reference is made to Dr. J. De Witt,
store keeper, C. H. Hill, and many others.
Any person wishing any of my Salves,
Ointments, Fever and Ague Pills, or Cough
Medicine can get them at my residence, cap-
tain of Jefferson and Fifth streets, Portland,
or by addressing **DR. W. M. HENLEY,**
or by addressing **DR. W. M. HENLEY,**
October 14th, 1866.

I would inform persons suffering under
Cancer, that my wife has for a number of
years had a cancer on her left breast, until
the three years last past, when it commenced
growing slowly at first, but during the past
summer its progress became more rapid. It
was giving her considerable pain, when, on
the 17th last month she went under treat-
ment by Dr. Henley of Portland. By his
method of treatment the entire cancer was
removed from the sound flesh, and on the
25th of the same month it came away without
pain. The sore is fast healing up, and I hope
a complete cure is effected. Her suffering
was considerable. She has suffered but little
since, and is now entirely free from pain.
Dr. Henley: The above is at your service,
much more medical knowledge, than you
and to Mr. Starkweather. Should you
be the first to get this please let him see it.
If you do not know him please enquire. He
is in the Legislature.
Yours, &c.
HUGH GORDON.

CAUTION.
Persons seeking the Electropathic Insti-
tute, should be careful to remember the name
and number. *Electropathic Institute* 645
Washington Street, San Francisco. All
letters must be addressed plainly to
J. H. JOSSELYN, M. D., Box 1943, San Francisco.
All letters will be destroyed or re-
turned, as directed by the writer.

THE DIRECTORS of this CELEBRAT-
ed Medical Institute wish to thank the
public for the generous manner in which
they have sustained the Institute, and
with their patronage. It is now six years
since the Institute was established; during
that time there has been over thirty thousand
consultations, and in all cases, where the
disease was curable.
A perfect and permanent cure has been
performed. Malicious charlatans have open-
ed traps in close proximity to the Institute,
adopting similar names, hoping to attract
the unwary; but their failure to do so is
perfectly apparent—the business has not
been effected in the least, but has gone on
increasing its usefulness and profits in regu-
lar ratio. The Resident Physician has by
careful study, and experience, within the
last five years been successful in discovering new
electric remedies which are far superior to
any before used in the healing art, and he
can warrant them to cure all cases for which
they are used, or make no charges for ser-
vices. They will be forwarded to any place
in the Pacific States upon a receipt of a let-
ter stating the nature of the symptoms, the
age and sex of the patient.
The Female medicines, discovered and
used by the Resident Physician, are the only
remedies which cure all cases of female
disease. The large number of cases in which
they have been used, is a guarantee of their
success.
Great care should be taken in visiting the
Institute, to remember the name,
Electropathic Institute, 645 Washington
Street between Montgomery and Kearny
streets.
J. H. JOSSELYN, M. D.,
Resident Physician.

Below are a few of the opinions of the press
of California, which are submitted to the
Public:
"The *San Francisco Mercury*.—The readers of this article
are particularly requested to read the ad-
vertisement of the "Electropathic Insti-
tute," 645 Washington street, San Fran-
cisco, to be found in another column of this
paper. The remarkable cures that have
been effected by Dr. J. H. Josselyn, the
Resident Physician of the Institute during
the past six years, and the establishment
of a reputation that has never been
equalled by any medical establishment on
this coast. In cases of female irregularities
especially, Dr. Josselyn has gained an un-
rivalled reputation, and the spacious parlors of
the Institute are continually occupied by
adies asking relief from their troubles.
Dr. Josselyn's reputation for the treatment
of the disease of the interior of the
State and upon receipt of a full description
of the disease, which is so common, and so
unfortunate as to be afflicted, accompanied
with the real or a fictitious address, sends
per Wells, Fargo & Co., medicines that he
warrants to cure without delay, without the
slightest injury to the system. He uses no
necrotic or mineral poisons. The remedies
used are known to the people, and most of
them are of his own discovery. Persons
placing themselves under the treatment of
Dr. J. H. Josselyn may rely upon not only
receiving correct and successful treatment,
but upon his discretion and secrecy.—*Red
Bluff Independent* January 24th, 1866.
GLAD TO HEAR IT.—For several months
past Dr. J. H. Josselyn, for the last six years,
so well known as the Resident Physician of
the Electropathic Institute, 645 Washington
street, San Francisco, has contemplated re-
siding from his present location for the purpose
of accepting the position as Visiting Physi-
cian in one of the large hospitals in his native
State, Massachusetts. The matter becoming
known to a number of our friends, and
of San Francisco, who, feeling what a great
loss would occur to the community by the
withdrawal of a physician of such scientific
attainments as Dr. Josselyn, and who, as
called at which resolutions highly laudatory
of the doctor's abilities were passed, and a
committee of gentlemen appointed to wait
upon him, present the resolutions and urge
upon him, to give up his intention of leaving
the State, and continue in his present position.
The arguments of the committee, supported
by certain prominent persons, made by the
Directors of the Institute, having induced
the Doctor to return his position as Resi-
dent Physician. We announce the success
of the negotiations with satisfaction, as it
would have been difficult for the numerous
patients that have been cured, and who re-
ly upon his scientific and successful treatment
to have found another physician capable of fil-
ling his place.—*Democratic Standard*, Jan. 31.
READ IT.—We gladly recommend those
of our readers who may be suffering from
disease of the interior of the State, or who
brought on by the use of mercury, at some
former period of their lives, to read the ad-
vertisement of the Electropathic Institute, to
be found in our advertisement columns. Dr.
J. H. Josselyn, the Resident Physician, has oc-
cupied that position for six years, and tak-
ing into consideration the fact that all the
Directors of the Institute are all medical
men of high standing in the community, it
may be considered as proof of Dr. Josselyn's
ability that he has been elected to that posi-
tion so long. Dr. Josselyn is a regular grad-
uate, and is also considered by competent
judges to be one of the best medical men suc-
cessful in the United States; he is a
far more than half the diseases that flesh is
flesh to which the use of any medicine in
all cases would be necessary, and he never
uses anything but vegetable prepara-
tions. The doctor has been very successful
in the treatment of diseases of the interior
of the State, and in particular in the treat-
ment of cancer, which is a disease of the
most painful nature. The Electropathic
