" Disapintid Love '-- Explanatory, In the hum drum march of Time, While Life moves like the pendulum's swing With a "back and forth," so wearying, That even " Harry Hopeless'" rhyme Wins with a glance, a smile perchance, And, "I wonder who wrote that silly thing?" The writer's aim was answered; still, As some suppose, a personal fling, And make it seem a venomed sting,

Anonymous, as serpents kill; H. H. begs pardon of all who thought He aimed at them a bitter shot; At them, or any; in sober fact, His heart was heavy, his brain was racked, With the dread suspicion that he had lost By shuffling, as the game went on-Found to his late, and bitter cost, That hearts were trumps and he had none.

So much-then pray, H. H. acquit Of ill intent-his was the coat, If any chose to borrow it-And found it proved too close a fit-That's not the fault of him who wrote. HARRY HOPELESS.

A New Textile -In our wild and scarcely explored State, there are undoubtedly many products native to the soil which would be of have at various times heard of different vegetable products of the valley herb called " larb," a species of to also a new species of flax or hemp. Some of this latter product has been an eastern paper:

us from Nevada is agricultural rather than mineral, but very important. of furniture and wooden ware; of giass It is of a new textile, such as was and earthen ware; of agricultural imple eagerly sought when the rebellion ments and mining tools, and hope we will broke out, but unsuccessfully. The soon need more silk, cotton and sugar plant now discovered has its home ture all the necessaries of life which we in the Humboldt Valley, where it now import will our wants in these res grows in large quantities, and can of peets be fully supplied. course, be made to grow more thrift and propagated among other crops. to be superior to any textile now in use. Though styled hemp, it is called so on account of its closer simi It has a stro ger and finer thread shan the hemp proper, and a much longer staple. In proprotion to the wood, the fiber is much more aban ated too, than flax or hemp, and can bestripped clean from the stalk with out preparation. Nevada lies be tween thirty seven and forty-two degrees no th. This corresponds with the latitude of Northern California, which the new hemp grows, runs from the mountains of that name culturist. westward, through a mountainous country If, therefore, experiment proves what is claimed for this texvalue of the hemp harvest in those

Rowonld be well if our Committee on the Paris Exposition would get some samples of the above mentioned cut into suitable sized pieces. It hardens Oproducts for exhibition, with their in a few days, and then you will have mineralogical specimens. - [Reese a very fine article of gine, free from impurities of every kind, sufficient for fami River Reveille.

PHOTOGRAPHIC COLORS. - A correspondent of the French Repertoire de Photographic, writing from South America, says: "Some time since, 1 took a positive portrait of my wife on glass. The weather was very fine, but on coming out of my darks room I observed that the light appear ed very yellow and somewhat obscur ed, and I then remembered that there was a total eclipse on that day. Af ter developing and fixing my positive I found all the colors of my wife's blue and yellow ribbons, and all these colors were accurately reproately, all these colors disapeared after a lapse of ten minutes," The press. writer does not say whether any beo many cases of evanescent coloring is to be lighted with gas made on the reported within a few years.

. 0

fire-proof brick was also made in or ammonia and turpentine for profit. near Biltimore, in which neighbor hood Kaglin had been discovered. home made acticle sold at \$40, and the imported one soon went down to gold-colored alloys. that figure, These incidents show the economy of bringing the plow, the loom and the anvil together, and supplying our own wants.

for trowsers that never come off."

Userul Hints .- The following is from the report of the California State Agricultural Society, and applies with p culiar force to Oregon:

Our larmsrs are constantly inquiring what they can raise to pay them for their labor and capital invested. We would say, raise such articles as your soil and the climate is best adapted to, and such as are most imported. In other words stop the hole through which we are losing our money, dam the river which is carrying our gold away from us, and exercise your best judgement in selecting the means to do it with.

No community can become wealthy and independent which depends alone upon the productions of the raw material. There is no great staple article produ- ATTORNEYS and COUNSELLORS ced in any one country that is not or cannot be produced in some other. To be truly prosperous and independenevery State, should do as near as possible all her own manufacturing. She should feed, from her own productions all her own people, make all their clothing, and tur nish them all the machinery, implements and tools they use, and all other necessaries of life. When we can do this, the richness of our mines will not be judged by the amount of gold we export, but rather by the correct standard-the amount they produce and the healthy and prosperous condition of our industrial pursuits. Just in proportion to the amounof gold we export in exchange for articles we can and ought to produce, and manufacture or labor we ought to perform. just in that proportion do we ear ch other great value to the world if brought countries and impoverish ourselves. The into notice and cultivation. We rapidity with which new manufacturing establishmen's are being introduced and put into operation among us, shows that our men of enterprise and means are of the Humbeldt, such as wild rye, beginning to appreciate these propovery productive and fine grain; an sitions, as well as the prospecs of a handsome return for their investments We know of no manufacturing interes bacco, making the most pleasant and in the State that is not in most prosper fragrant smoking weed known, and ous condition. We do not know of one that is not pushed to supply the demand for its articles and at a fair paying price We need more woolen mills, more flour sent East, and is thus spoken of by mills, more foundries and machine shops more tanneries, more powder and shot The last discovery which comes to factories, more paper mills, more manu factories of boots and shoes and socks; o harness and saddles, wagons and carriages

To FRY FISH.-The ordinary manner ly by cultivation, while, if it has the of frying fish in a shallow pan, with only values which are ascribed to it, it a small quantity of grease, may be much will soon be removed to other fields improved upon by imitating the Greeks, from whom we may also learn many other useful lessons in the culmary art. Take a The plant is said by the discoverers large quantity of lard in a deep kettle, and let it boil, as for trying doughants. While boiling drop in the lish having previously rolled them in flour or meal. in a few minutes they will be of a rich, uniform larity to that than any other growth. brown, when they may be taken out any served hot. They w.l. be found infinitely more delicate in flavor, as well as more inviting in appearance than when cooked in the old way. This is recommended by the long experience of the writer, and dant. It can be more easily separs, will be endorsed by all who try it. P The pullosophy of frying is well illu trated by this Greek process, detailed by

our traveled correspondent. We may add that success in frying de pends primarily on having plenty of not fat. If there is but little fat, the article cools down to that degree that it is readily absorbed by the food. This San Francisco, Salt L k. City, fact that cool grease is absorbed before i Indianapolis, Colum us and Philas has time to cook the article fried, while delphia. The Humbold river, along plenty of hot grease cooks it quickly and is not absorbed at all, should be impressed upon all cooks.—Eb. Am. Apri

To Make Nears Foot Oil.—The hoo's are chopped off, and the portious are cracked and boiled thoroughly. From tile, it can be prolonged in its cultivat the suaface of this boiled mass about tion from its original nabitation to one past of neat's foot oil is skimmed our own doors, and will enhance the which is unsurpassed by any other clear inous matter for harness shoes &c. After the oil is taken off, the water is strained States where it is now an important to take from it any faity particles that may remain, and then it is boiled again until, upon trying, it is found it will settle into a stiff jelly. It is then poured into flat bottomed dishes, and, when cold ly use for a twelve month. By taking a portion of this glutinous substance before it becomes too thick, and brushing it over pieces of silk, you have just as much court plaster as you desire, inodorous tenacious, and entirely free from those poisonous qualities which cause (as much of the article sold by apothecaries does inflammation when applied to scratches.

AN INCREDIBLE HAY CROP.—The New England Farmer is responsible for the report that an acre and a half of poor land in St. Johnsbury, Vt., produced thirteen and a half tons of fine timothy hay this season. The land was, plowed in August, 1865, topdressed with forty-nine loads of yard manure, well harrowed and entitled estate, having filed his account for dress faithfully portrayed on the film. sown three pecks of timothy seed, and settlement of the same, it is ordered by the The dress was of blue flowers on a fifteen pounds of clover seed and again black ground, the cap trimmed with harrowed and rolled it yielded 8 tons of The first Manday in Senter ber, 1867 timothy the last week in June and 52 tons | that being the first day of the September much Italian rve grass has been grown to duced, even the fish tint of the face the acre in England by the aid of weekly and hands were perfect Unfortun sewage or liquid manure. REDINGTON & COS COLUMN RELINGTON & CO.'s

Essence of Jamaica Ginger. THIS VALUABLE PREPARATION, ON. taining, in a highly concentra ed form, and the properties of the Jamaica Ginger, hasse

become one of the most popular domestic remedies for all diseases of the stomach and digestive organs. As a topic it will be for all invaluable to all persons recovering from debility, whether produced by tever or otherwise, for whilst it imparts to the system all the glow and vigor that can be produced by wine or brandy, it is entirely free from the reactionary effects that

follow the use of sprits of any kind, It is also an excellent remedy for females who suffer from deflicult menstruation, giving almost immediate relief to the spasms that so frequently accompany that period. It gives immediate relief to nausea, caused by sea sickness, etc. It is also valuable as an external application for Gout, R' cumatism Neuralgia, etc. REDINGTON & CO.
