There's none on earth like mother. When far in distant lands, Though skies be bright above us. We sigh for gentle hands, And smiles of those who love us;

So down the dreary years We follow one another, Yet murmur through our blinding tears, "There's none on earth like mother."

A Card From The American Watch Company THIS COMPANY BEG LEAVE TO INform the public that they comnced operations in 1850, and their factory

now covers four acres of ground, and has cost more than a million dollars, and emloys over 700 operatives. They produce 5,000 Watches a year, and make and sell not less than one half of all the watches sold The difference between their manufacture and the European, is briefly this: European Watches are made almost entirely by hand, and the result is of necessity a lack of that miformity, which is indispensable to correct ime-keeping. Both the eye and the hand f the most skillful operative must vary. But it is a fact that, except watches of the higher grades, European watches are the product of the cheapest labor of Switzerand, and the result is the worthless Ancres, Lepines and so called Patent Levers-which soon cost more in attempted repairs, than their original price. Common workmen, boys and women, buy the rough separat parts of these watches from various factos, polish and put them together, and take em to the nearest watch merchant, who

tamps and engraves them with any name How American Watches are Made. The American Waltham Watch is made y no such uncertain process-and by no raw materials to the completion of the Watch, are carried on under one roof, and under one skillful and competent direction. Pride of the Pacific, Republic, But the great distinguishing feature of their | Golden Gale, Watches, is the fact that their several parts are all made by the finest, the most perfect and delicate machinery ever brought to the Diamond Rock, Hearthstone, aid of human industry. Every one of the more than a hundred parts of every watch is made by a machine—that infallibly reproduces every succeeding part with the most unvarying accuracy. It was only necessary to make one perfect watch of any particular style and then to asjust the hundred manchines necessary to reproduce every part of that watch, and it follows that every succeeding watch must be like it. The Company respectfully submit their

watches on their merits only. They claim A Better Article for the Money by their improved mechanical processe than can be made under the old-fashione 11 AM SAUCE.—When a ham is alJohn Myers. 1866. H. MYERS & BROTHER, cases, to the finest chronometer—and also adies' watches in plain gold or the finest enmeled and jeweled cases; but the indispen able requisite of all their watches is that they shall be good time keepers. It should be remembered that except their single low-est grade named "Home Watch Company, Boston," all watches made by them are fully warranted by a special certificate, and this warrantee is good at all times against the
