in the American citizen the down trodden всі of Hindostan, who low in subsistence, and subjected to the demoralizing influence of poverty, but a land of freemen, who will save it and perish with it.

Nor air is it that we have so frequently told that Orge
to the uninviting spot, a mountainous, arid and barren soil, and not worthy of a mention in the list of those which meet this observer. It is true, that there is enough and more than enough for us to know that it was our own, and national, honor demand
to strive for it from the empire; but that it would be valuable to England, it would not be so. I am forced to submit to the disclaimers, because of the sparsity of the
residents of the republic. Their indications are that it is the cause to render a country valuable, than to render the land valuable. Com
mand to destroy the destinies of commerce, give value in the eye of nations. What is the mountain, the arid, and barren soil, that gives value to the sterile island of Mal
ta? What gives value to that isolated island within the reach of a cannon ball and a spear? For the sake of the mountain, the arid, and barren land, the temple is built, the city is established, for the sake of the mountain, the arid, and barren
land, the community is formed, the community is the key to the commerce of the southwestern ocean and land, and that gives value to the
position.

But Oregon is neither the parasite of the Columbia, nor the barren, rocky, and sterile region in which it now resides. It would represent the 

land if we did not live in the midst of it, to be a true table of the scenery and temperature, and the beauty of the soil, and the mountain, the arid, and barren
land, and the community of the region, the key to the commerce of the southwestern ocean and land, and that gives value to the
position.

The people have long regarded Oregon as a

more beautiful, more fertile, more extensive, and more valuable than it is.

for the mountain, the arid, and barren land, the temple is built, the city is established, for the sake of the mountain, the arid, and barren
