

sion of all regular government, and the general insecurity of life and property attending the contests between the native Californians and the bands of settlers on the frontiers.

Gen. Ide on the 10th of July, resigned his military honors and flag to Lieut. Revere, U. S. N., who took possession of Sonoma, read the Commodore's proclamation and hoisted the stars and stripes under a salute, and in the presence of a large concourse of people.

Com. Stockton arrived at Monterey on the 20th July, and assumed the command. Fifty guns and several hundred men have landed from the squadron, and the American commander is fortifying the newly acquired posts in a substantial manner. The custom house at Monterey has been fitted up as barracks. Orderly and strict guards patrol the streets, but the liberty of the inhabitants is not infringed upon to any unnecessary extent. All grog shops have been closed, and a heavy penalty imposed upon those who sell ardent spirits to the soldiers and sailors of the Am. squadron.

American goods are now imported free of duty, and foreign goods at one quarter of former charges. A company of horse called the "California Dragoons," under the command of Purser Fauntleroy, has been established to patrol the coast and protect the inhabitants from the Indians. It is generally believed on the coast, that whatever policy may be adopted by the cabinet at Washington, on the reception of the news of the capture of California without a formal declaration of war, the country is forever lost to Mexico, and must become either a territory of the great republic or an independent government. Every thing was quiet at the latest dates, and business not materially deranged. The Mexicans would not, it was anticipated, be favorably received either by the Californians or the American settlers.—Pol. Mexican.

For the Oregon Spectator.

The Mogul received a serious injury on the 3d of this month, in the rapids above this place, known as McKinley's cut off; fortunately however, there were but about 250 bushels of wheat on board, and some articles belonging to the passengers. Had she been laden, as often is the case, to the guards, no doubt some lives would have been lost; but owing to the dexterity of the officers, as soon as she struck the rock, as many men as could be spared, were employed in keeping her clear of water, and to run her on shore was all the chance to keep her from sinking. The cargo was soon removed, and on examination, some timbers had started, and a large hole was discovered near her stern. We are sorry to hear that this valuable vessel has to be laid up, as she was so creditably employed in taking the surplus produce from our farmers to market. The Mogul and Franklin, we understand by the captain, has taken from Champeog alone, about fifteen thousand bushels of good, merchantable wheat this year, and thousands yet on hand at that place ready for shipment.

Go on, temperate Oregon, and show to the world, that we wish to gain our livelihood by the work of our own hands—that we can be governed by a moral influence, believing that our government will do us justice.

For the Oregon Spectator.

In Honolulu, recently, a man was returning from a grog shop, all right and rich, claiming, at times, all sides of the street; meeting a man however, as bad as himself, running right and left, he passed him, after a trial, and exclaimed, looking round with a hickup, "well I passed between you, anyhow."

Oregonians, pass around such men.

Medical.

DR. A. R. T. LOCEY, Physician and Surgeon, respectfully tenders his Professional services to the citizens of Oregon City and vicinity, as a regular "Botanic Physician."

He has long since discarded the use of the murderous lancet, and with it the belief, that in "shedding man's blood," to restore life and health to his decaying and wasted energies, he can act in accordance with the principles of common humanity, or the dictates of reason or philosophy. He believes in purifying the currents of life, which are the seat of health or disease; and an accumulated experience of eighteen years practice in the States, has convinced him that, in Nature's ample garden, may be found herbs and plants of sufficient variety and efficacy, to remove, (by timely application,) any of the whole family of diseases to which man's frail nature is subject. Through bred to the study of mineral medicine, as are others, yet, from his knowledge of their effects, from conviction and choice, he has long since renounced, and denounced, the use of the bone roting, flesh consuming minerals, falsely called remedies, which generate cramps and convulsions, and, in their consequences, subject the constitution to many abiding evils, to nervous excitement and debility, gradual consumption, and premature death.

Acting as Nature's ministers of relief, his medicines are prepared to stand the severest test. The subscriber is willing to stake on the result of the timely application of his remedies to the most inveterate diseases, his reputation as a practical physician, and his honor as a man. He will pay particular attention to the diseases of women and children, to which he has devoted much time. Obstetric cases promptly attended to in the City and country. Office and residence on Water-street, at the late residence of Mr. P. H. Hatch, where he may at all times be found, unless professionally absent.
