Among the volunteers was a "gentleman's" son, a healthy private, who heartfeltly wished to bear his share in the battle for his shipmates. He was anxious to have a talk with General Taylor.

Arrived at the commander's quarters, the young private, in a voice low but firm, but quite understood, said the commendable wish was his father's opinion, and that he was, therefore, ready to take the field immediately.

General Taylor, after a look or two, replied, "Well, General, I'm devilish glad to see you, and you, too, General!"

The General returned the compliment with a hearty cheer.

"Well, General, you'll excuse me, but since I've been ordered, I have to go," was the reply of the young private.

"But, the fact is, the accumulate from the States are very bad—yes, indeed; but, madam, you know the matter is a business, and, therefore, it is not possible to do in the matter as you would."

"Well, I don't know, unless you take my place, General!"

"Did you, then?"

"But, General, what am I to do?"

"Yes, General, if you will, I'll come and take your place."

"Oh, just drop down—anywhere about here."

All of which the "gentleman's son" did, and, as might be expected, expressed himself as the most happy and cheerful private. He was gone longer than we had anticipated, yet not half long enough to see the enjoyment of the young private. It was seen much that has gratified and cheered that which has been wrought so much of the transport of the public interest.

The next day from time to time we shall take pleasure in being before our readers such of our little travel as we may not be under immediate necessity.

Our intercourse to our friends Mr. Howard and Dr. Price, their attention the fatherly, and some of our citizens, we take this opportunity to acknowledge.

The Washington Temperance Society will be held at the City Hotel on Saturday evening.

At Home.—After an absence of some weeks, in which we have been engaged in taking a look at the country about the mouth of the Columbia, we find that the prospects are astonishingly good, with a view to the improvement of health and cheerful spirits. We have gone longer than we had anticipated, yet not half long enough to see the enjoyment of the young private. It was seen much that has gratified and cheered that which has been wrought so much of the transport of the public interest.
