#### Stavery.

Slavery is causing much trouble in the States, and if no other reason can be assigned than the following, it is sufficient to prove the assertion, to wit: The thousands of crazy fanaties at the North will never be quiet selves. They long to have their own degenerating white-skinned race improved! Why cannot the whole-souled and liberal south quietly give up their property for the Lonefit of the human race in the north! This would be better than to DIVIDE THE Union for the purpose of extending and cultivating slavery. Let the north have the ne gross for 20 years, and they will then be in readiness to sell them all back to the south, together with a probable increase in number. They are not able to purchase them of you, but let them be freed and see how quick they'll take them off your hands Twenty years will serve to engraft the north thoroughly with the pure black blood (!) and then universal slavery can prevail throughout the United States! Let them work: they'll hang themselves; but oh! save the Union! "United we stand; divided we fall!" Even the news journals of the north are filled with long accounts of their detestable black-loving mob-law riots. What is it all for ! From whence are the benefits to our citizens to be derived! Only above stated! Will these be benefited Will it not be making a bad matter worse. and that only! But as slavery is causing so much trouble, why not abolish it for a time! We seek peace, happiness and wealth. Abolish slavery, and witness the beautiful results. Will the north not continue to agitate-especially when such great accomplishments are so plainly in view? wit: the refinement to which they may attain in the enligtened society and equal privileges, rights of marriage, &c., with the highly distilled blood of the African race in their very veins f
