LIFE ILLUSTRATED.

OUR NEW NEWSPAPER.

With the present number we issue a Prospectus for a New Weekly Newspaper.

It is not our purpose that this shall take the place of our Monthly Journals. Those have become intimately connected with our special business, and too much beloved by our subscribers to be dispensed with. But in these days of railroads and telegraphs, monthly visits seem insufficiently frequent. Our noble onean steamers cross the Atlantic and return between every issue. Besides, we have not sufficient space in these Journals to convey infor-

return between every issue. Besides, we have not sufficient space in these Journals to convey information of the doings of the world. We therefore have concluded, in addition to our Monthlies, to make weekly visits to those who may desire it.

In these more frequent calls we shall not confine ourselves so strictly to professional matters; but will talk of the crops, the markets, schools, lectures, amusements, &c., and try to make our visits as agreeable as possible. A New Volume.

A new volume of the American Phrenological Journal commenced with the July number. Subscriptions commenced last January will ter-minate next December. Those commenced in July 1853, are now complete.

Renewals may be made at once for the year to come. Those who prefer may remit for one, two, three or more years, as may be convenient. The amount will be duly credited, and the Journal sent the time paid fot.

HE first class will be admitted to enter upon the regular course of study in this Institu-tion on the 2d Wednesday in September next, when the collegiate year will hereafter commence. As the Trustees do not depend upon the tuition fees for the support of the Faculty, they are able to offer to students, however few in number, all the facilities needed for securing a thorough col-legiate education. A Library of 1000 vols. and philosophical apparatus are for the use and benefit of scholars. Candidates for admission must pos sess a knewledge of the usual branches of a common English education—the elements of Algebra to Equations, and must pass a satisfactory exami-nation in the Latin language upon a portion of Cesar's Commentaries, and four orations of Cice ro; and, in Greek, upon the 1st book of Xeno
