

BROWN APART.
In same, yet two in heart,
Shy, but sure, grow apart;
Sudden of all and slightly to see—
Love from his own sweet bosom set free.
Green apart—through the lagging years—
For smiles, for sighs, for falling tears—
Still call love's rose to the chest again,
Or thrill the heart with its previous pain.
Growing apart—however more,
A snicker-worm at the very core,
Shorn of all the sweets of life,
An unloved husband, unloved wife.
Ah, well! they have had their little day;
Some flowers bloom only, and die in May;
And if those have missed the summer's prime,
And ripen fruits of the autumn time—
Knowing only the drought of sun,
And failing the other's blazes to burn,
There yet may be gathered in each and heart
Blossoms that have ripened and grown apart.

CAUGHT IN A STEEL TRAP.

The following story was told to me by my old friend, the venerable Dr. L—g:
I sat one evening on the veranda of the principal hotel of a city on the New York and Erie Railroad, smoking and watching the folks loitering about the entrance.
Among these was a strange looking man, who had excited my curiosity at dinner by his peculiar dress and appearance.
He was very tall and strongly built, had large, fierce eyes, a dark, pale complexion, a huge, carefully waxed, jetty moustache, and he wore his thick, coarse black hair somewhat long. His dress was striking, although of fine material and fashionable make. But, doubtless, the "loud" effect was produced by the long cape, the flaunting red necktie and the broad brimmed, picturesque hat he always wore. He exhibited also his prodigious diamonds, too profusely for good taste. The cane he carried was unique, its gold head being shaped precisely like a small pistol.
Altogether the tout en semble of this pretentious person was decidedly "stagey."
As I watched him, one of the under waiters came whistling into the reception room behind me. This waiter was called Matthew Sparks, and I especially disliked him. He was as cunning as an Indian, talkative and grotesquely polite, and loved money like a miser, while he was as full of funny pranks and jests as a court fool or the clown of a circus.
"Matthew?" I called to this under-sized buffoon of sixteen.
He reared his heels in the air, attempted a waltz on his hands, turned a summersault and landed by my side.
"What can I do for you, sir?" he enquired, with a courtesy that was laughably like that of a trained monkey.
"Who is the gentleman yonder, with the red necktie and broad brimmed hat?"
"Where, sir?" he asked, innocently, looking everywhere, but in the direction I indicated vainly, until I had cleared his vision by the magical touch of silver, when he became as communicative as I could wish.
"O, that fellow!—looks like one of the pictures on the bill post order, don't he?" and my comic and sordid informant grinned and looked wise.
"Is he an actor?" I demanded impatiently.
"Bless me, no. He's the Count—Count Pedro Columbo. He's a fellow that does nothing but travel and spend money. And his diamonds! O, lor' worth thirty thousand dollars—I heard him say so."
This was all the information I could obtain from the promising young waiter, and it seemed without a doubt correct, as I soon discovered that the Count's magnificent diamonds, his apparent extravagance with money, and his evident ignorance of American customs, made the gossip of the hotel.
"Why," said the clerk to me one morning, "the Count is probably the richest man in the country. He has a large estate in Mexico and mines in South America. He has the best rooms, the best wines, and the most costly dinners. He makes odd mistakes occasionally, gets on the wrong floors and into the wrong rooms, and scarcely can speak or understand a word of English."
He came on from New York, and by some mistake his trunks were sent the wrong way. He is kept here waiting for them.
Just then the subject of his remarks came into the office.
His hair was in disorder, he wore neither coat nor vest, and his suspenders were flying behind his heels.
"I have been robbed. See?" he cried, in his broken English, exhibiting his wristband and shirt front, from which his studs and buttons had seemingly been roughly torn away.
And then gestulating violently and muttering Spanish curses, he demanded to see the proprietor, who at once came in to hear the complaint of the distinguished and unfortunate guest.
The Count's complaint, was something like this: He was sure he was in a land of thieves. His trunks, probably, had been stolen, and all the money he had in them, as well as the letters of credit.
He was in a strange place, and he couldn't pay his board, and now he was robbed of all he had that was worth security, and he would be put in the streets, or, perhaps, in prison. But he would go to Washington, and would see the Minister of Spain or somebody, and the parties who had taken advantage of his ignorance should hang—very high indeed!
In vain the landlord assured him that he should be kindly treated until the missing property should be recovered, which likely would be soon—the Count only rolled out big Spanish oaths, and frantically waved his arms and pointed to the places his lost diamonds had adorned, and growled, and muttered that "they would kill him if he stayed in this diabolical country—the beasts, the villains, the assassins!"
The proprietor was greatly disturbed, and finally persuaded the high minded Count to accept \$50 as a loan and not to hesitate to ask for more if he should need it, and somewhat appeased the guest went out of the office.
"I am sorry for the Count," observed the landlord, "and doubt if he ever recovers anything he has lost. For some time a gang of thieves have been working between here and New York, and scarcely a hotel has escaped. In several instances checks for baggage have been

taken with other things, and of course when the checks were presented at the proper place the baggage has been given up the thief. And, doctor I don't mind telling you, that the Count was not the only loser last night. At least five of my transient guests were robbed of money and jewelry."
"A detective would be a good fellow to have around," I ventured to say.
"I shall telegraph to New York immediately," he answered.
For hours in succession that day Count Pedro Columbo sat close near the telegraph operator's desk, now watching the instrument with his fierce black eyes, and the people who passed constantly to and fro just him into the hotel office.
"I shall be killed if I stay here," was his constant prediction.
The next morning the landlord came to me. He looked grave and troubled.
"Doctor," he said, "a half dozen more of my guests were robbed last night. If this thing goes on I shall be ruined. What shall I do?"
I could not advise him. It was impossible to always escape misfortunes of this kind in a hotel situated at the junction of several great railroads, where hundreds of guests were coming and going every day.
"It is a case for a shrewd detective," I answered and went up to the reading room.
This room was on the second floor, close to the ladies parlor, and directly across the hall was a very small apartment fitted up with immovable desks, inkstands, etc., for the accommodation of those who wished to write in quiet.
My footsteps made no sound on the thick velvet carpet of the hall, and I reached the door of the reading room unobserved by two persons whose voices I heard in the apartment opposite.
"A doctor, eh?" it was the Count's tones, and it was Matthew Sparks who answered.
"A doctor and a good feller," Matthew said. "Come out under a fun rail of an old aunt with greenbacks this place wouldn't hold. She gave 'em all to him and he's got 'em in his pill bags—and stolen 'em too."
"What do you tell me for?" asked the Count in his queer English.
The boy shuffled his feet and winked to keep time.
"We are paid for givin' gents information in this country," was his reply.
The distinguished guest grumbled something about "robbers," "murder," "his trunks," and "jewels," and then tossed the young clown a coin.
I disliked Matthew Sparks then more than I had before. All he had told the Count about my visit to that place was utterly false. I had been to no funeral and I never had an aunt in that part of the country. I never had carried "pill bags" in my life, nor did I ever carry greenbacks in my valise, nor very many in my pocket.
"The miserable idiot! What did he want to lie like that for?" I mused.
And then I turned to my paper and thought no more about it.
That evening when I went up to my room what was my surprise when I unlocked the door and entered to see Matthew Sparks sitting unconcernedly on the floor in the middle of the chamber, with my valise between his knees and in his hand a curious looking implement of rusty steel.
With significant gravity he put his finger on his lip and motioned for me to lock the door. I did so.
"Now tell me," I said, sternly, "why are you in here, and what are you doing?"
"You'll be mad, mister," he answered, audaciously.
"If you do not tell me I will send for the police and have you locked up, Matthew."
"Whew," he whistled softly, still wearing that provokingly grave expression that I saw for once was not assumed. "Dew you know what this is?"
He held up that queer thing of rusty steel.
"Well, it is a steel trap," he went on; "you just let me fix this ere thing in your pill bags, and when that ar thief come to get the greenbacks to-night it will hold him tight. See?"
He opened the sharp teeth of the steel saws and suggested to illustrate his proposed experiment if I would put my hand inside.
I declined the offer of this volunteer detective, and wondered if he was a fool, knave or a very cunning and keen witted boy.
"What makes you think the thief will come in here to-night?" I asked him.
"Well, you see, I told a feller you had lots of money and other things in here."
"And you knew I did not."
"I reckon," he returned, with a grin, "we'll fix your thief trap."
"I only hope you may catch him," said I.
And he did fix it in a way that I could not comprehend and cannot explain; and then he turned to me for what, as he had informed the Count, "gents always give for information." I gave it cheerfully.
"You shall have more than that, Matthew," I said, "if you trap the thief."
"I told him—the feller, you know—that you would be out to-night," he said.
"You did. For what?"
"So you could wait in the closet here and watch him," answered Matthew, jingling his coin appealingly.
And Matthew got another ten cents. "I shall act on the boy's suggestion," I thought to myself. "There may be something in his suspicions, and his absurd plan may not be so bad, after all."
So I turned the key very low, prepared everything carefully, and made myself comfortable in my hiding place.
I had not long to wait—not more than an hour—when I fancied that my room had an occupant. Cautiously I peered through the crack I had left as I closed the closet door, and I distinctly saw a dark form between me and the gauntlet.
Still, for a moment, I fancied that I might be the dupe of one of Matthew Sparks' practical jokes, but as the intruder bent over the valise I saw from his movements that he meant robbery and nothing else.

Breathlessly I waited the result of Matthew's stratagem.
The tiny key clicked in the small lock. The man thrust in his hand. There was a snap of steel, the crunching of flesh and bone, and then a full, round curse in unmistakable English, followed by a long drawn gasp of pain.
I sprang into the room and turned up the gas, and the bright light streamed upon our foreign Count.
Count Pedro Columbo, dressed as if he had just come in from the street, wearing the cape, flaunting red necktie and broad brimmed hat, and carrying his cane with its pistol shaped golden head, stood before me, fierce and desperate.
"You are caught, impostor," I cried, springing for the bell beside the door.
As I did so he lifted his cane in his left hand, twirled it suddenly, and I saw that what I had supposed to be the semblance of a pistol was a real weapon, ingeniously serving as a walking stick.
Like lightning he flashed the guided muzzle towards me.
"Touch that bell and you are a dead man. Release me from this accursed trap."
I faced him coolly. "Fire, if you like," I said. "If you do you will be convicted of murder as well as robbery, for you can't get away unless you leave your hand behind you or take the steel trap with you."
That speech threw him off his guard, and I darted through the door into the hall, locking it behind me.
In five minutes more the room was filled with strong men, and although the thief resisted desperately, he was soon overpowered and taken to prison.
He proved to be an old offender, and was born in New York, and had never been out of the United States.
The story of his trunks was a case of false, and his wonderful diamonds that were found in his room, with much of the property stolen from the guests, were not worth the gold plate of the setting.
"If you suspected the fellow, Matthew," said the landlord, "why did you not tell us before?"
"Well, you see, answered the honest youth, jingling his nickels, "I thought I could catch him myself, and perhaps I would do more for my information."
"You are quite smart enough, Matthew, and quite honest enough to deserve and get a good share of prosperity as long as you live," answered his employer, "but I do not approve of your being paid for information."
But Matthew got his reward and was highly satisfied therewith, and he thinks he made his best practical joke when he caught a thief in a steel trap.

A "Phone" Worth Something.
An intelligent farmer, living in Des Moines county, Iowa, has invented a telephone, modelled on the principle of the telephone, by which one old reliable hen occupying a central office in the henery sits on all the nests about the establishment, leaving all the others for her to lay eggs, scratch and cackle. As fast as a new nest contains the full complement of eggs, it is connected with the central office by a copper wire, and the business is settled; the only trouble with the machine is that it sits so hard it hatches out the porcelain nest eggs along with the others so that one chick in every nest is born with glass eyes, and the farmer has to buy and train a dog to lead it around. This makes it expensive.

All Sorts.
The Hon. Potato Bag of Colorado is registered at the New Zealand hotels.
You can't tell much about cold padding for the proof of the padding is in the heating.
They economize in their hangings in Texas, suspending a man by a noose at each end of the rope.

Fred Douglas blacks his own boots, shaves himself, brings in his coal, goes to market and feels that he isn't any greater than Shakespeare was.
Instead of asking "Will you please write in my autograph album, Miss Kellogg?" they soon have the question: "Will you please sing in my phonograph?"
England, so far, has shown no intention of availing herself of the immense stores of military talent that are lying useless around every newspaper office in the land.
The Luxemburgers have cat races. Cats are taken in bags to a point two miles from the city. They are then let out of the bags and the first reaching the city is the winner.
Young lady on horseback (doubtful about the road)—Will there be a bridge by and by across a little brook? Small rustic—Wal! I dunno about by'n-by, but there's one there now.
A beautiful widow of Newport, R. I., having let her chalet for the season, was asked what induced her to desert such a charming retreat. "Too much balcony and too little Romeo," was her reply.
It is stated that Francis Joseph has been heartily cheered but twice in his life—the first time when he returned from the Italian war defeated; the second time when he returned from the German war routed.

The Editor.
An editor is a male being whose business is to navigate a newspaper. He writes fearful editorials, grinds out poetry, inserts deaths and weddings, sorts out manuscripts, keeps a waste basket, blows the "devil," steals matter, fights other people's battles, sells his paper for two dollars a year, takes white beans and sauce for pay when he can get it, raises a large family, works 19 hours out of every 24, knows no Sunday, gets lauded by everybody, and once in a while gets whipped by somebody, lives poor, dies middle aged and often broken hearted, leaves no money, is rewarded by an obituary puff in the newspaper. Exchanges please copy.—*Josh Billings.*

ALL CONSTABLES NOW.—Young Jesse Grant's waddle about the splendid receptions tendered his father and himself in Europe brings to mind the story of the rural politician who was elected constable, and bore the glad tidings to his sleeping partner late at night. The noise aroused one of the small boys in the trundle bed, who very naturally inquired, "Ma, are we all Constables now?" "Shut up," sharply responded the matron, "nobody ain't elected but me and your dad." Really, we have never heard of young Grant in connection with the preservation of the country. We were under the impression that those European honors were intended exclusively for the old man.—*Baltimore Gazette.*

In New York, the other day a man was sentenced to the penitentiary for one year for snapping an unloaded pistol at another, "just to scare him."

The old firm of Northrup & Thompson, of Portland, has dissolved. Mr. Thompson has removed to California, and Mr. E. J. Northrup continues business exclusively in Wagon Material, Hardware, Lumber, etc., at his new store, corner of First and Main streets.

MEYER'S GLUE IS THE BEST.
PORTLAND GLUE FACTORY.
Sole and Wholesale Dealers in Oregon, Washington, Idaho, California, Nevada, Utah, Arizona, New Mexico, Texas, Colorado, Montana, Wyoming, Oregon, and Idaho.

EXCELLENT BUSINESS OPPORTUNITY IN PORTLAND.
A family grocery store, established upon one of the finest locations in the city of Portland is for sale. It is doing a solid and profitable business of \$1,200 per month. Building 12,000 to be sold with the stock. View for building and stock \$1,200.00. See business on application, \$100 per cent. 111 1/2 First Street, Portland, Ore.

1878. BUFFALO PITTS "CHALLENGER" THRESHERS. 1878.
Great Improvements for the New Year.

It is the work done by the Buffalo Pitts "Challenger" Thresher that has made it the most popular of the kind in the West, and has increased the demand for the ability of the machine to supply.
The Buffalo Pitts is the only machine that works perfectly in every part and under all circumstances and conditions. No other machine is so simple in its construction, so easy to run, so durable, and so perfectly adapted to the work it is designed to do. It is the only machine that will thresh and clean grain in the most perfect manner, and it is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.

The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner. It is the only machine that will do so in the most economical and efficient manner.
The Buffalo Pitts is the only machine that will do so in the most economical and efficient manner. It
