Edie Wilton's Dilemma.

There is a tendency to make skirts for street wear narrow and rigid. They are not tied back as formerly, and are sensibly short enough to clear the ground; but they are so braced, fastened and shored with strings that a wearer if once overturned in a gutter, would be as helpless as a cast cow, and would require lifting back to her feet. Something of the kind happened at the Union Square Theatre the other night. Miss Wilton, the actress from California, condescended for a bad part by wearing several costumes of a most stunning character. She is said to have brought away enough bonanza money from the Pacific Coast to indulge in such fancy. One of the suits puts her into about the condition of a trussed duck. Hurrying up to the stage from the cramped dressing-rooms underneath, she tripped and fell on the landing.

"Are you hurt?" stage manager Parcell asked.

"Oh no," she answered.

"Then why don't you get up! Hurry, please, for the stage is waiting," he said.

"I can't," and she lay passively on her face. "I'm down like a ten-pin; set me up."

He did.—Cincinnati Enquirer.

The Metric System.

The five cent nickel forms the key to the whole metric system. Its diameter is two centimeters and its weight five grammes. Hence five nickels placed beside one another measure exactly a decimeter, and two nickels weighed together will give exactly a dekagramme. As everybody almost understands the decimal system, liquid measures may be obtained from by calculation, for the kilolitre is a cubic measure, which may be calculated in the same manner as a measure of length. Thus, if a man have five cent nickels in his pocket, he carries with him the entire metric system of weights and measures.—Scientific American.

Flighting the news. DEADWOOD, April 6.—A special dispatch from Ferry Point, Montana, under date of the 3d, says: Captain Higgins, with three companies of the Second Cavalry, who started out after hostile Sioux on the 25th ult., overtook them yesterday 35 miles from this place. The troops changed the camp and captured 45 ponies, but the Indians got into a ravine and could not be got out. Sergeant Johnson, of Co. C, was killed during the charge. General Miles, who was on the east, hearing of the fight, stopped at Fallon creek, where he now awaits the arrival of the troops, which left Fort Keogh Friday night under Lieutenant Clarke. A later dispatch says two Indians were captured, and that the remainder got away on foot.

English Prices at Bermuda. NEW YORK, April 6.—H. M. S. Bacchante, from Jamaica, having on board Prince Albert, the prince of Wales, arrived at the dock yard at Bermuda Monday last. In consequence of their youth a race has been made that the young princes are not to receive the public honors usually accorded to royalty, hence the lack of demonstration upon the arrival of the Bacchante.

Mark Lane Report. LONDON, April 7.—The Mark Lane Express says that the sowing of Spring crops is well forward throughout the kingdom. Autumn sown wheat is rather backward, and in late sown fields in some districts is thin, but generally speaking the agricultural situation leaves little to be desired. It is expected that the bulk of grain in Scotland will be sown three weeks earlier than last year. The weather is generally good, but as the weather hitherto has been favorable for growing crops, millers have steadily adhered to the policy of merely supplying their immediate requirements. Stocks in granaries must also be getting very low, as imports since the first of January have not sufficed from home requirements, to say nothing of the quantity exported. Notwithstanding these facts, trade, partly owing to Easter holidays and elections, has been apathetic. Country millers have been the principal buyers. There has been an entire absence of speculation, as the existence of a ring in America despite the depletion of stock paralysis enterprises. The tendency of prices has been rather downward, imports and shipments from America for the moment being larger. American wheat showed a decline of 8d on Friday. Arrivals at ports of call have been moderate. In consequence of favorable weather and a slight decline in American wheat is 6d in consequence. Maize declined similarly in consequence of larger supply. Wheat for shipment, in consequence of larger offerings from America declined 2s. Maize is 1s 6d and 6d to 3d lower. Sales of English wheat last week, 34,509 quarters at 45 4/4 per quarter, against 43,856 quarters at 46 1/4 per quarter for the corresponding week of last year.

Imports into United Kingdom for the week ending March 27th were 459,985 cwt of wheat and 50,342 cwt of flour.

Price of Bismarck's Notes. BRATTLE, April 8.—If Parliamentary circles it is considered certain that the Bismarck bill will be passed by that body imposing imperial stamp duties, and agree with the views of Bismarck.

The Bismarck bill will go back on itself. In view of the determined attitude of Bismarck, the Bismarck bill will probably recall or correct its vote, which it is said that the whole of the bill will be wholly approved without the sacrifice of certain high officials.

Bismarck will remain in office. The Emperor had a long conference with the Crown Prince, at which it was determined that Bismarck should remain in office.

PACIFIC COAST. Serious Storm in the Sierras. TRUCKEE, April 2.—A serious storm has been raging on the Sierras since 4 o'clock this morning. Snow falls are running constant between Truckee and Summit, and from Summit to Emigrant Gap. At Miller's Mill, four miles west of Truckee, the snow is almost as high as the top of the snow plows. A snow plow train, which just arrived from Summit, came near sticking at one place on account of heavy snow drifts. All trains are running regularly; but if the storm continues until night, it will require superhuman exertions to keep the road from being blocked beyond Summit. Two thousand feet of snow sheds were crushed during the last severe storm, and this portion of the track lies exposed to the elements. Should a wreck occur, 100 men are held in readiness, this point to be sent forthwith to clear it away. A snow plow train has just arrived from the East, ploughing very heavy all the way from Bronco. There is more snow on the mountains now than at any previous time during the winter. Extra trains required from one to three extra engines. Telegraph wires are badly demoralized, only three out of nine wires are working.

The S. P. R. E. Marching On. TRUCKEE, April 3.—The train of the S. P. R. E. is laid eighteen and a half miles east of Truckee.

The Matter Decided. The Board of Election Commissioners to-day, in the matter of the Workingmen's protest, decided that they had no power to go behind the returns, and declared the Citizens and Freeholders, and Byrnes, Republican Senator, elected.

Crop Prospects in Arizona. Reports from different grain growing sections of the Territory say that the crop will be about one-third greater than ever before. The rainfall has been such as to insure large crops.

CONGRESSIONAL. Senate. WASHINGTON, April 5.

The vice president presented a letter from the secretary of war showing the necessity for an appropriation of \$265,000 to pay certain arrears of bounty to soldiers and their heirs, issued since Jan. 1st and to be issued till June, 1880.

Pendleton presented a petition of Cincinnati type foundry against a reduction of duty on type.

By Allison.—To compensate the C. B. and Q. R. R. for facilitating overland mail transportation, also paying the Burlington, Cedar Rapids & Northern Railroad for mail transportation.

The bill amending sections 2362 and 2361 of the revised statutes in relation to settlers' affidavits in pre-emption and homestead entries was advocated by Teller and passed.

It permits the affidavits required by these statutes to be made before county clerks instead of before the register or other officer of land districts, thus equalizing provisions in this respect of homestead and pre-emption laws.

Salsbery opposed the bill authorizing to be placed on the retired list all non-commissioned officers of thirty years' service, because the pension list was large enough now. Thousands of civilians had done as much for the country as these officers, who had too much attention paid them. Our youth were beginning to learn that all glory came through the army and navy. The bill went over.

The Senate considered the Use agreement bill, and Morgan said it would take \$4,000,000 and would not settle relations heretofore with the Indians, therefore it was important.

Dr. Arnsfeldt, abolishing the tax on spirits distilled from apples, peaches, grapes and pears, and reducing the tax on grain distilled spirits to 25 cents a gallon.

Senate. WASHINGTON, April 6.

The Senate considered Mazy's bill authorizing a retired list of non-commissioned officers of thirty years' standing.

The morning hour expired and the Use bill taken up.

Pendleton vacated it and went over the history of the various negotiations with the Uses and stated that he believed wrong had been committed on both sides and that a feeling of irritation existed up to the time of the massacre.

Morgan asked the Senator whether the committee on Indian affairs thought there was any reason for making the treatment of the Uses an exception of the general Indian policy.

Pendleton thought that he could properly state that the committee was likely to present a bill and might hereafter do so to extend the principle of this bill to all Indians, and thus obviate the necessity for further legislation on the Indian question; but there was urgent necessity
