Mark Lane Report,

LOSDON, April 15,-The Mark Lane Ex-

press, in its review of the corn trade for the past week says : Six weeks of thoroughly seasonable weather have made a wonderful change in the aspect of the country. Wheat is somewhat backward in some districts, but therefore not likely to suffer from any return of cold weather. Showers have somewhat delayed the complexion of Spring. Supplies of English wheat are again small both in London and the provinces. Prices have declined a shilling, millers' requirements being light, and weather favorable for fucrop. There has been a marked decline in foreign wheat in London, caused by a speculative combination in America to dictate prices to Western Europe. Red Winter wheat a fortnight ago was worth 57s per qr and sold with difficulty at 3s per qr dine. Russian ports have not decline quite so decidedly, but the tendency in all cases have been averse to sellers. At the same time the decline stimulated the demand, and millers in some cases have bought comparatively freely. The proxi-mate cause of the collapse of the ring was not so much abstention from buying on this side as favorable crop prospects in both England and America. Official estimates of stock and grain in London is larger than anicipated, namely, 280,000 grs against 209 .-000 qrs at corresponding time last year. Compared with stock in granary at the beginning of the year, there is a decline 2,185 qrs. Maize, in consequence of large arrivals
