#### Fruit Diet.

A strange prejudice exists against the use of fruit as an article of diet, while is entertained without a doubt by med cal men, and all who have studied the subject that ripe fruits are among most healthful articles with which table can be supplied. They are ture's most reliable remedies, toning a invigorating the system, and supply: the mild acids at a time when most

quired. Green fruits are to be discarded a most unhealthful and even poisono-They usually abound in tannic scid; a d the stomach is unable to digest them. It is a lamentable fact that cities are neces sarily supplied with imperfectly ripe fruit, the producers being obliged to gather green in order to have it reach market in good condition.

On the other hand fruit may become too ripe, and decay commence, when i

is again harmful. New Benroun, Mass., Sept. 23.—Members of the expedition headed by Lieut. Housewives think imperfect fruiteither green or over-ripe-is good enough to cook; but herein they are mis-York June 1. 1878, for Baffin's Bay and taken; while green currents, gooseberries, apples, etc., made polatable with sugar, are an abomination, halfdecayed peaches and apples, even if the decayed portion is carefully removed are equally so. Only fruit which is sound, should be used fresh or cooked. In cases were known to exist at specified point, was not attained, the explorers have nevof sickness there is nothing so agreeable as the juicy grape or the luscious peach ertheless obtained many relics of the and apple; and if the system has not been poisoned with drugs no food is Franklin purty, Including the remains of Lient, Irving. They have, moreover, carried out to the letter instructions of

It should, however, be borne in mind that half the trouble from fruit-eating comes from eating it between meals. It should be taken at meal-time; but a great proportion is eaten at a time when it should not be. Children are fruit-starved until they have an opportunity, and then est too much, and in all cases the fruit receives the blame. Nature has provided a constant suc-

ries, raspberries, blackberries, peaches, apples, pears—and by canning, the supply can be kept good throughout the year. Do not let the children get so starved that they will est unripe apples and steal them at that! If they have nice berries, they will never seek the approving fatal to Lieut, Schwatka's party. ple-tree for bitter, puckery fruit. The varieties are all necessary. Many, that it is feasible for white men to adapt like the blackberry and raspberry are ister at Peking informs the department themselves to the climate and life of the astringent; and these come at a season

> of the year for that purpose, but can ity. We may easily choose, and travel at any time and in the same Way avoid the use of drugs, which should be only a last resort. In sickness cooked fruits are probably preferable, as being more easily digested Baked sweet apples, alone, with cream, or bread and milk, make a dish not only son Manufacturing Co.'s shoe shop at North Adams, Mass., with Chinese labor | as the proverb says, good enough for a has proved a failure, and the last celestial king, but a great deal too good. The

> sarily restricted to any particular season | the fruit of winter, has an opposite qual-

has departed for a more congenial field of grape and strawberry lose by cooking, labor. A short time since Mr. Sampson and all fruits lose aroma and flavor was in this city. He then expressed which no syrup can restore or improve. bimsels much better satisfied with Chin-Do not be afraid of fruits they contain ese than Caucasian labor, as he said it acids, mineral salts, and nutritive elewas steadier and more dependence could ments mingled in just the right propor-tions; and when properly ripened, and be placed upon it. He does not now give his reason for abandoning the propartaken of in proper quantity, are the most healthful articles of diet either for

#### the sick or well. Six Thousand Years Old.

The Ashmolean Museum, at Oxford, contains one of the oldest monum civilization in the world, if, indeed, it is not the very oldest. This is the lintel stone of a tomb which formed the last resting place of an officer who lived in the time of King Sent, of the second dynasty, whose date is placed by M. Mariette more than six thousand years ago. The stone is covered with that delicate and finished sculpture which distriguished the early periods of Egyptic history, and was immeasurably supesato the stiff and conventious art of the latter ages of Egypt which we are accutomed to see in our European museum But it is also covered with something more precions still than sculpture, will hieroglyphics which show that ever, that remote period Egyptian writing a complete and finis art, with long ages of WAS

previous development lying behind it. The hieroglyphic characters are already used, not only pictorially and aleographically; but also to express syllables and alphabetic letters, the name of the king, for instance, being spelled alphabetically. In the hands of the Egyptian scribes, however, Egyptian writing never made any further progress. With the fall of what is called the Old Empire (about B. C. 3500) the freshness and expansive force of the people passed away. Egyptian life and thought became fossilized, and through the long series of centuries that followed Egypt resembled one of its own mummies, faithfully preserving the form and features of a past age, and of a life which had ceased to beat in its veins. Until the introduction of Christianity the only change undergone by Payptian writing was the invention of a symming hand, which in its earlier and simplier form is called hieratic and in its later form domotie.

FLOWERS FOR WINTER. - Clarifoners and florists advise that plants intended to grow through the summer and then to be removed to the house for winter blooming, should not be planted in the
