LOOK! NEW MEN IN CAMP!

FRAZIER & SPERRY!

Wool Commission House: No. 107 North First St., PORTLAND.

MAKE ALVAN ES: Engaged in wool growing!

INEXPENSIVE HAPPINESS: The most perfect home I ever saw was in a little house...

WALLA WALLA STEAM BAKERY: MANUFACTURER OF BREAD, CAKES, PIES AND CRACKERS.

LABOR--AN ODE.

Till swings the ax, and forests bow; The seeds break out in radiant bloom...

THE AGE OF JUDAS.

"Am Brudder Artichoke Hurricane in de hall?" softly inquired the President of the Lime-kilo Club...

THE LATE CZAR.

The late Emperor of Russia was not only one of the handsomest men of his dominion, but one of the best, and his manners were always most courteous...

HOUSE AND FARE.

DRIED PEACH SAUCE--Pick over and wash thoroughly, cover with hot water and leave all night...

POULTRY LA CREME--This is a dainty dish for an invalid. Boil a chicken, chop or pound the flesh to a paste...

BAKED POTATOES--Parboil, peel, and lay in a dripping-pan, with a bit of butter for each...

LINEN LACE--The way to wash linen lace is to sew it upon the outside of a large glass bottle...

FRENCH TOAST--For a family of five take five slices of bread--the longer it has been baked the better...

APPLE PUFFS--Pare and slice six tart apples, stew them and strain them through a colander...

SALT FOR THE GARDEN--Gardens should be salted very liberally, for by so doing you will have no worm-eaten radishes...

POPULAR SCIENCE NOTES. English exchanges tell us that steel, which has been almost entirely worthless, is now used for the manufacture of paint for the protection of iron and steel from corrosion...

Cure for Drunkenness. Under the heading, "A Radical Cure for Drunkenness," a Hungarian paper tells the following Russian story...

CONGRESSIONAL SPEAKERS.

There are few really good talkers in Congress--that is, men who are distinguished for their oratory.

"Yes, sah." "Well, den, let me ask you Judas what difference it makes to you whether Judas was 35 or 75 years old when he sold out?"

"I don't spect it make any difference sah." "If Judas had nebbber libbed at all, wouldn't you have just as much work and just as good wages as new?"

"No, sah." "Den it seems to me dat you make a plumb up an' down file of yourself. How does it seem wid you?"

"Just dat way, sah." "Werry good; you can resume yer seat. When a man is satisfied in his own mind dat he has made a fool of himself, dar haud much left to fry about."

"No, sah." "Well, den, let me ask you Judas what difference it makes to you whether Judas was 35 or 75 years old when he sold out?"

"I don't spect it make any difference sah." "If Judas had nebbber libbed at all, wouldn't you have just as much work and just as good wages as new?"

"No, sah." "Den it seems to me dat you make a plumb up an' down file of yourself. How does it seem wid you?"

"Just dat way, sah." "Werry good; you can resume yer seat. When a man is satisfied in his own mind dat he has made a fool of himself, dar haud much left to fry about."

THE NEW SPRING DOG.

She was looking out of the window when he entered the yard, and she said to herself that he might ring the bell until he was tired, for she didn't want to buy any soap and had nothing for tramps.

"This is the greatest piece of impudence I ever saw," she exclaimed as she pulled the door open.

"He smiled. He had poor clothes and a hungry look, but there was nothing captivating in his smile.

"Well," she queried, as he held the door.

"My errand is a very pleasant one, and yet I feel somewhat embarrassed in making it known."

"If you have any bills to collect, you must call when my husband is in," she observed.

"Bills, oh, no. Madam, you have perhaps noticed in the papers that a book entitled 'Prominent Women of Michigan' is soon to be published?"

"Well, it is to be illustrated with the engravings of one hundred striking faces. My instructions are not to look for beauty so much as for marked expression of deep thought."

"Who could have sent you?" "I dare not tell. Yours is to be published on the first page, and only nine more will be taken from the city."

"And what's the charge?" "Nothing. If you want the book you will have to pay \$2, but you are not asked to take it."

"I can't see why they should have selected me."

"Beg pardon ma'am, but yours is a very striking face. It portrays an expression of strength of character I never saw equaled."

ADAM'S PANTS.

be completed before November, owing to the difficulties about the vaulting.

During the past ten months Mount Etna has had five eruptions of smoke and sand, without any subsequent flow of lava.

POULTRY LA CREME--This is a dainty dish for an invalid. Boil a chicken, chop or pound the flesh to a paste, rub it through a wire sieve, mix with a little cream and two or three eggs, season with pepper and salt, put in a mould, steam, and serve hot.

BAKED POTATOES--Parboil, peel, and lay in a dripping-pan, with a bit of butter for each; as they brown put on each a tea-spoonful of warm milk, mixed with butter, salt and pepper. They should be of a light brown. Butter again just before you dish them.

LINEN LACE--The way to wash linen lace is to sew it upon the outside of a large glass bottle over which stout linen or white flannel has been sewed. Put the lace on it smooth, and then fasten it in place with a coarse muslin. The bottle thus clothed is allowed to soak for a time in lukewarm soft water, and the outside wrapping is then rubbed with soap and a piece of flannel. When this has been done the bottle is to be laid steep for several hours in clean, soft water. It is then to be rolled between dry towels, dipped in ice water, and rolled again. Finally the damp lace should be unfastened from the bottle and ironed at once between linen cloths.

FRENCH TOAST--For a family of five take five slices of bread--the longer it has been baked the better--and have ready a bowl of water, into which a pinch of salt has been dropped; take a piece of butter the size of a walnut, and thoroughly grease the bottom of a frying-pan; then beat five eggs to a froth; dip each slice of bread into the water, then into the egg, and place it flat on the bottom of the frying-pan, pour over the bread the remaining egg which was left in the bowl; set the frying-pan over the fire, carefully turning the bread over when it becomes a light brown; pepper and salt to taste, and rest assured that as often as it is brought on the table, just so often will your dinner be praised.

APPLE PUFFS--Pare and slice six tart apples, stew them and strain them through a colander, sweeten and add a pinch of salt; let this cool while you make your paste, of two spoonfuls of flour; add ice water to make consistency of bread dough, put on the moulding board and roll quite thin, scatter small pieces of butter over this, and dredge with flour, then fold it up and roll quite thin again, repeat this operation any number of times, always rolling the paste into something like a square form. Cut the paste into pieces four inches square, put a small spoonful of sauce on one-half of the square, moisten the paste around it with water, and fold the other half over on to it. Make the edges perfectly smooth. Bake in a dripping pan lined with paper in a quick oven. When you take them from the oven sift a little powdered sugar over each.

SALT FOR THE GARDEN--Gardens should be salted very liberally, for by so doing you will have no worm-eaten radishes, maggoty onions, club-footed cabbages, or any other vegetable grown in it injured by worms, grubs, or any other vermin that infest the soil. Every one that raises asparagus knows the necessity of using salt abundantly. One can scarcely use too much. Many who grow cabbages know its value when applied to the roots or growing head; but everyone does not know that growing onions may be buried under salt, leaving only the tops out, and that the onion will grow thriftily, while all maggots or worms will die or disappear--yet such is the fact. Salt mixed with wood-ashes in proportion of one of salt to four of wood-ashes, applied at the rate of a handful to the center of each hill of corn immediately after planting, will supersede the use of scare-crows and coal tar, as no worm or grub will touch it, besides giving the fertilizing properties of the compound.

POPULAR SCIENCE NOTES. English exchanges tell us that steel, which has been almost entirely worthless, is now used for the manufacture of paint for the protection of iron and steel from corrosion, in any position or in any climate.

The engineers engaged in the constructing the ship canal across the Isthmus of Panama, at last advisers had sunk a shaft 100 feet deep, where the Chagres river dam is to begin, and had not reached bed rock.

Sterile tracts of land have been converted into fertile plains near Paris, it is stated, by the experiment of irrigating lands with water from the sewers, and too without any increase of sickness in the neighborhood.

A new meteoric mineral has been found by Prof. J. Lawrence Smith, in analysis of the great meteorite that fell in Emmett county, Iowa, in May, 1879, which is said to be decidedly different from any mineral ever before seen associated with meteorites.

Notwithstanding that the entire length of the St. Gothard railway will be finished between Airolo and the Lago Maggiore by the 1st of July, it is thought that the great tunnel cannot

be completed before November, owing to the difficulties about the vaulting.
