## PROGRAM AGENCY

SCHOLARS OF INDIAN SCHOOL WILL GIVE ENTERTAINMENT.

Umatilla Agency School Best Reservation School in United States—Miss M. V. Gaither, Assistant Superintendent for 10 Years.

The Umatilla Indian school will give an entertainment at the agency next Thursday evening, to which the public is cordially invited. The entertainment is given on the occasion of the close of the school year at the agency, who has occupied the position of assistant superintendent for the past 10 years.

The great progress made by the pupils in the Umatilla Indian school is one of the most remarkable objects lessons in the education of the savage that has ever been presented to the people of Eastern Oregon.

The principal teacher at the school is Miss Hattie M. McDowell, who has been connected with the institution for the past eight years and is one of the most efficient teachers in the Indian school service in the United States. To Miss McDowell and Miss Gertrude M. Golden, primary teacher, is due much of the credit of the preparation for this entertainment. They have been drilling their little "sunflowers" constantly for weeks, and the program promises to be interesting, instructive and unique. I. R. Bamber, industrial teacher and drill master, has had charge of the military drills that will be presented.

VERY SUCCESSFUL YEAR FOR THE PUBLIC SCHOOLS.

Believed That an Increase in the Teaching Force Will Be Necessary Next Year—The Money is in Sight for the Canning Plant.

Echo, May 30.—The closing exercises of the Echo schools at the E. church last night was a matter of absorbing interest. The church was packed to overflowing and many could not get inside at all. The program consisted of songs, recitations, dialogues and readings, in which the children acquitted themselves very creditably.

Successful School Year at Echo. The school year which has just closed here, has, under the direction of Miss Francisella Duncan, been a very successful one. The total registration is 76, with an average attendance of 66. Each and all the grades are doing good work.

Miss Duncan has been in the schools here for three years and the place has been tendered her for next year, but she has not yet accepted it. She was assisted for seven months of the past year by Miss Moorhouse, and it is thought that three teachers will be required for the next term.

Yesterday and today were very warm days and garden truck and alfalfa are growing very rapidly. A few more days of such weather will start the haying in earnest.

D. C. Brownell took yesterday evening's train for Pendleton. He says there will be an immense hay harvest on Butter creek, and that there is great demand for hay. Some 300 tons have already been sold. The price offered is \$5.

Money in Sight for Canning Plant. H. C. Willis and wife returned from their Portland trip yesterday. Mr. Willis says that his canneries is an assured success, with already enough capital in sight to construct the plant.

C. S. Mudge has returned from his vacation and assumed his duties at the old stand with the O. R. & N.

ACADEMY GRADUATES HOLD ENJOYABLE SESSION. Banquet at the Golden Rule—Toasts Happily Responded to—Pleasant and Interesting Close of Profitable School Year.

At 8:30 Saturday evening, the alumni, a number of the former teachers, and the present faculty, assembled in the parlors of the Golden Rule hotel to form an alumni association.

The constitution was read and adopted and officers were elected. At 9:30 the guests repaired to the dining room, where an elegant supper was served in courses.

Toasts were responded to as follows: Miss Ruth, "Pendleton Academy in Its Infancy." Cecil Wade, class of '30, "Coeducation."

Miss Roscoe, class of '31, "Coeducation." Miss Whittemore, class of '32, "The Naughty Twos."

Miss McDill, class of '33, "The Latest Thing Out." Mrs. Rann, class of '38, "First Mrs. Wilson, "Our Retiring President."

Colonel E. D. Boyd, "Prospects." Dr. Forbes, in a few words, thanked those present for their kindly wishes and in a very touching manner referred to the loyalty of the students and the citizens of Pendleton, who have so long represented.

At 12:30 the guests adjourned after bidding farewell to the faculty, who are all to leave soon for distant places.

Those who attended were as follows: Mr. Vert, Mrs. Jessie L. Vert, Professor F. L. Forbes, W. S. A. Willis, Colonel E. D. Boyd, Miss McDill, Grace Beagle, E. A. Patterson, Miriam Strong, Carl O. Kloepfer, Mrs. Kloepfer, Rev. R. J. Diven, Mrs. Diven, Mrs. Crawford, C. Wade, Mr. Rann, Mrs. Rann, J. A. Kennedy, Frieda Roscoe, Eva Bell, Maude McDill, Flora Walker, Myrtle Davis, Ruby Whittemore, Beagle, Theresa Rorter, Grace Crockett, Nell Whittemore.

MONEY NOTES AND ACCOUNTS. Heavy Taxpayers Give in Large Amounts of Cash and Notes.

The following list of taxpayers have given in the amounts of money, notes and accounts set opposite their names: Mrs. Lina H. Sturges, \$5,850. Samuel George, \$600. G. A. Hartman, \$1,098.18.

WESTERN NORMAL INSTITUTE IS THE PRIDE OF EASTERN OREGON. Fully Equipped for Higher Education—Practical Educators in Charge—New Buildings and Laboratories.

Comparatively few persons, even within its own legitimate field, realize the unusual opportunities offered to students at the Eastern Oregon state normal school, located at Weston, in Umatilla county, Oregon, says the Weston Leader. This school is now under new and efficient management, and has the most complete equipment of any of the state normal schools in Oregon. It is situated in a section of country which, for fertility of soil, beauty of surroundings, and healthfulness of climate, is unsurpassed in the Northwest.

This is a normal school; it is a state normal school, and it is an Eastern Oregon state normal school; it is here for the benefit of every section of Eastern Oregon, and the state has vested in it the highest educational interest for Eastern Oregon in this institution.

Higher Education at Home. While Western Oregon has its state normal schools, its state agricultural college, and its state university, it is left for the Eastern Oregon state normal school to furnish the higher educational advantages offered by the state institutions for the intellectual and social development of the part of the commonwealth "Where dolls the Oregon." The teachers and prospective teachers of this section are not availing themselves of the opportunities here offered to the extent to which they are entitled and to the extent to which they could avail themselves if it were better known.

Institution Complete. The educational "plant" is most complete. Less than two years ago was finished a three-story and basement brick building, equipped throughout with steam heat and modern conveniences. The new building contains a large assembly hall, or chapel, two society halls, 12 lecture rooms, physical and chemical laboratories, museum, women's gymnasium, kindergarten room, reception room, and president's office; besides classrooms, halls, etc. It is beautifully finished throughout in natural wood; the cement floors and city water connections; and the building has a slightly situation on the brow of the hill, east of town, overlooking the country for miles around.

Young Ladies' Hall. The young ladies' hall is a substantial wooden structure one block immediately adjoining the normal grounds. It contains parlors, dining room, bath, kitchen, and a large room, matron's room and dormitory rooms ample for a large number of students. The young men also take their meals here. In the year, many pleasant social functions where faculty, students, and town people are gathered for amusement, entertainment and social cheer.

The building formerly occupied by the normal school, a two-story brick building, is to be well utilized. The upper floor will be divided into dormitory rooms for young men; the lower floor of the main building is to be converted into a young men's gymnasium and the first floor will be used for workshops and rooms for the teaching of domestic science.

The normal grounds are ample for football and baseball fields, circular grounds, tennis courts, and basketball grounds.

Full Laboratories. The physical and chemical laboratories are well supplied with apparatus and materials for doing all the work included in a normal school course. The library contains over a hundred well selected books of reference and general literature, and the tables of the reading room are supplied with many of the leading magazines and periodicals.

The school has an attendance of public school pupils sufficient to furnish an efficient training department, or practice school. President French is also principal of this department and exercises personal supervision over the work of the student teachers. More than a year was spent by him in visiting and studying the school systems of the leading European countries, and his course in methods, which has been so largely instrumental in making teaching a profession in the public schools of this state, is the product of an extended experience as a teacher in the schools, superintendent of schools, teacher in normal schools and college. President French has made the teaching of the student teachers the public schools his life work, and no pains will be spared to give the students of the normal school the professional training which will be directly applicable in the public schools of the state.

DOCKET FOR JUNE TERM IS VERY LENGTHY. Case of T. P. Gilliland vs. E. T. Wade Being Heard Today—Ed Weston Will Be Tried for Horse Stealing Wednesday.

Judge W. B. Ellis convened the circuit court for the eighth judicial district this morning at the courthouse at 9 o'clock.

The docket for the June term is a lengthy one, 40 cases appearing upon it, though not all of these will ever come to trial, and others will perhaps be continued for one reason or another.

The docket was arranged by County Clerk Chamberlain Saturday and the court has set several cases for hearing during the current week.

The case of T. P. Gilliland vs. E. T. Wade is on trial today. It is a civil action brought to compel Wade to reimburse plaintiff in the sum of \$100, alleged to be due on a land deal. Gilliland placed a farm in the hands of Wade for sale. Wade made a deal with Fred Ganger who paid \$100 down to buy the bargain. He decided it was undesirable and forfeited his deposit. The suit is brought by Gilliland to recover the \$100 alleged to be due him.

The case of the state of Oregon vs. Andrew Barnhart is a criminal case and is set for this afternoon. The defendant is accused of stealing a saddle from a horse. It is a case involving money due on a horse sale. It is set for June 2.

The case of the state of Oregon vs. Ed Weston, is a criminal case from Umatilla county. The defendant is accused of the larceny of a horse, and the case is set for June 3.

The case of Lake vs. Suhli is a civil action set for trial on the 4th of June. It is a suit in ejectment; the plaintiff endeavoring to eject the defendant from property owned by plaintiff and occupied by defendant.

R. Morrison, of Adams, is in the city today.

J. B. Wilson, of Kamela, was in the city Sunday.

H. Connel, of Umatilla, spent Sunday in this city.

A. E. Shick, of Athena, is in the city today on business.

J. W. Perringer, of Adams, is a guest at the Golden Rule.

T. J. Kirk, of Athena, is transacting business in the city today.

John McNerny, of Cayuse, was in the city Sunday visiting friends.

C. E. Nelson, of Weston, was in the city today on a business trip.

Hugh McIntyre, of Milton, transacted business in the city today.

William Clark, of Freewater, was in the city today for a short visit.

Zooth Houser arrived upon Echo this morning, on a short visit.

William Johnson, of Freewater, is in the city visiting friends for a short time.

D. J. Kirk, of Milton, is in the city today looking after his interests here.

J. B. Frazier, of Milton, was the guest of friends in Pendleton yesterday.

Mr. and Mrs. J. W. Hall, of Milton, spent Sunday in this city visiting friends.

Asa B. Thompson, receiver of the La Grande land office, spent Sunday in the city.

E. D. Weaver and family have returned from a month's visit in the Palouse country.

Judge John F. Morgan, of Boise City, spent Sunday in Pendleton visiting friends here.

## WESTERN NORMAL

INSTITUTION IS THE PRIDE OF EASTERN OREGON.

Fully Equipped for Higher Education—Practical Educators in Charge—New Buildings and Laboratories.

Comparatively few persons, even within its own legitimate field, realize the unusual opportunities offered to students at the Eastern Oregon state normal school, located at Weston, in Umatilla county, Oregon, says the Weston Leader. This school is now under new and efficient management, and has the most complete equipment of any of the state normal schools in Oregon. It is situated in a section of country which, for fertility of soil, beauty of surroundings, and healthfulness of climate, is unsurpassed in the Northwest.

This is a normal school; it is a state normal school, and it is an Eastern Oregon state normal school; it is here for the benefit of every section of Eastern Oregon, and the state has vested in it the highest educational interest for Eastern Oregon in this institution.

Higher Education at Home. While Western Oregon has its state normal schools, its state agricultural college, and its state university, it is left for the Eastern Oregon state normal school to furnish the higher educational advantages offered by the state institutions for the intellectual and social development of the part of the commonwealth "Where dolls the Oregon." The teachers and prospective teachers of this section are not availing themselves of the opportunities here offered to the extent to which they are entitled and to the extent to which they could avail themselves if it were better known.

Institution Complete. The educational "plant" is most complete. Judge John F. Morgan, of Boise City, spent Sunday in Pendleton visiting friends here.

One of the outcomes of the investigation will be in all probability, the adoption of winter irrigation. In the summer time all the available water in the Umatilla is used, but in the winter enough is wasted to soak the section if properly controlled. By winter irrigation is meant the flooding of the ground by means of ditches and levees, during the flood season, by this method enough water will soak into the ground so treated to raise two good crops. The summer fallow system is a proof of this contention. Where the land is well pulverized and allowed to lie fallow it accumulates the moisture of two years, and with this stored supply of good crops can be raised. If now water in quantity can be run upon this ground enough will be accumulated to raise good crops with judicious handling.

The artisan well is another factor to be counted upon. One well has been drilled in Morrow county with a flow sufficient to water about 60 acres, and wherever these wells can be found the land is sure to yield. The country here is especially adapted to irrigation as far as climate is concerned. It is in altitude not so high that the cold nights will retard vegetation, and the evenness of the land, all considered, would make it a fruit country par excellence.

Perhaps Slow, But Certainly Sure. But the people must not become impatient and clamor for immediate results. Even as the fabled mills of the gods grind slowly, so does the government do its work leisurely but with certain and definite result. The engineers in charge of the investigation will make no hasty examination or come to no rash conclusions, but when they have decided their work will have been performed carefully and consistently and to the best of their knowledge and effort. In the meantime it behooves the people at large, the inhabitants of the semi-arid belt who are so anxious for the benefits of irrigation to come to them, to make up their minds as to what they will do, and above all, to await in patience but not in sloth or inaction, for the time to come when the scheme of irrigation will have been proven to be practical and then be ready to accept the assistance of the government and by private enterprise and make the inland Empire a garden spot of the state and the great center of wealth and culture of the Pacific Northwest.

Governor Chamberlain is in receipt of a letter from Mrs. Clara Summer, of Boxman, Mont., seeking information about a family that came to Oregon in 1840, from New York. She does not remember the name, but says there were 10 pairs of twins in the family and the members came on foot from New York to St. Louis, where they purchased mules with which to cross the plains.

Husband (angrily)—I never saw a divorce as has to please you are wife (calmly)—My dear, you forget that I married you.—Chicago Daily News.

## IRRIGATION MEET

GREAT REVIVAL INTEREST CONFIDENTLY LOOKED FOR.

With the Proper Development of the Reservoir, Summer Fallow, Winter Flooding and Artesian Systems, a Revolution in Farming Will Follow in Eastern Oregon.

The time is drawing near when the semi-annual meeting of the State Irrigation Association will be held in Baker City, and the interest consequent among the people of the Columbia river basin, who are concerned in the deliberations of that body is on the rise. The meeting was set by the executive committee of the association to meet in June, and though the day has not yet been definitely announced it is expected soon to be made public.

G. W. Hartman, president of the Columbia River Basin Association, comprising Umatilla and Morrow counties, is very enthusiastic about the cause of irrigation, and still holds, in spite of the cold blanket thrown on the proposition from some sources, that it is destined to revolutionize the industry and condition of the inland Empire.

Square Deal by the Government. Mr. Hartman has all confidence in the fairness and ability of the government engineers engaged on the geological survey, and is certain that their reports will be in accordance with the facts of the case as the conditions of the land and the facilities for procuring water. He thinks the question all hangs upon the favor or disfavor of the engineers' report and has no doubts but what the ultimate decision reached by them will be in accordance with the dream of the people of the country.

The spirit of Umatilla county is all right in regard to irrigation and the people have great hopes for the final success of the project.

The unfavorable decision of the commission, however, considered as a remote and to be deplored contingency need not of necessity derange the plans of the irrigators. If the government should fail to attempt the irrigation of this section of the state on a large scale, it would be well and desirable that the people interested should keep the issue alive and hold up to view the results to be obtained in order that private capital may come to the assistance of the country and make it one of the most productive parts of the Northwest.

The meeting was set for Baker City, so that those attending could have the practical results of irrigation and the change it will work in the condition of a country.

Four Available Systems. One of the outcomes of the investigation will be in all probability, the adoption of winter irrigation. In the summer time all the available water in the Umatilla is used, but in the winter enough is wasted to soak the section if properly controlled. By winter irrigation is meant the flooding of the ground by means of ditches and levees, during the flood season, by this method enough water will soak into the ground so treated to raise two good crops. The summer fallow system is a proof of this contention. Where the land is well pulverized and allowed to lie fallow it accumulates the moisture of two years, and with this stored supply of good crops can be raised. If now water in quantity can be run upon this ground enough will be accumulated to raise good crops with judicious handling.

The artisan well is another factor to be counted upon. One well has been drilled in Morrow county with a flow sufficient to water about 60 acres, and wherever these wells can be found the land is sure to yield. The country here is especially adapted to irrigation as far as climate is concerned. It is in altitude not so high that the cold nights will retard vegetation, and the evenness of the land, all considered, would make it a fruit country par excellence.

Perhaps Slow, But Certainly Sure. But the people must not become impatient and clamor for immediate results. Even as the fabled mills of the gods grind slowly, so does the government do its work leisurely but with certain and definite result. The engineers in charge of the investigation will make no hasty examination or come to no rash conclusions, but when they have decided their work will have been performed carefully and consistently and to the best of their knowledge and effort. In the meantime it behooves the people at large, the inhabitants of the semi-arid belt who are so anxious for the benefits of irrigation to come to them, to make up their minds as to what they will do, and above all, to await in patience but not in sloth or inaction, for the time to come when the scheme of irrigation will have been proven to be practical and then be ready to accept the assistance of the government and by private enterprise and make the inland Empire a garden spot of the state and the great center of wealth and culture of the Pacific Northwest.
