PEACHES COMING INTO THE CITY FROM ALL QUARTERS.

Retailing at 5 Cents Per Pound at Stores, and 45 to 65 Cents per Box -Beef Has Only Fallen 10 Cents a Hundred-Many Stockmen Will Hold Over Before Selling at Low Prices.

The principal thing of interest in the market this week is the flood of peaches that is coming into the city from the Milton country, and to a lesser degree from the Walla Walla and Wallula orchards. 1111s is peach season and there seems to be plenty of fruit to make it a good one. Peddlers and farmers with their wagons loaded to the top are coming into the city day after day looking for a chance to sell their wares and so far the housewives of the city have unloaded the wagons as fast as they

Peaches are selling at 5 cents a pound retail or from 45 to 65 cents a box. The fruit is of good quality, large and will rank with the same variety for other places that comes in to the country at any time of the

Outside of the fruit and grocery line there is not much of interest though the prices of cattle have fallen to a certain extent. Some time ago it was reported that the prices at which young steers were selling had dropped from \$3.50 to \$3.25 as the bottom quotations and while this may be so, it has not been as yet borne out in practice for the least that has been accepted in the last week is \$3.40, a drop of 10 cents. While steers are plentiful and the buyers seem to be able to get wnat they want, the growers are not altogether at their mercy and will not be for some time. The men who have the cattle are not breaking their neeks to unload on the market, though they realize that the feed in this section of the country is scarce and that the fewer cattle they have to feed, the better condition their stock will be when spring comes. This holds good in most of the cases. This holds good in most of the cases, though there are some of the growers who have sufficient feed engaged to hold all of their cattle in good con-

dition through the winter months. The meat market has fallen in part and the buyers are wanting it to fall more, though no the other hand, the growers are hoping that they will be able to unload their surplus without damaging the quotations to a greater extent than has already been
