SCHOOL CONSOLIDATION.

An Election Will Be Called to Give Everybody a Chance to Go on Record.

The matter of the consolidation of the school districts around this city with the Pendleton district is still in embryo, but is being discussed on all sides, and as soon as the directors of the various districts are able to find time, a meeting will be called and the matter will be opened.

It is known that a great many of the men in the country sections are in favor of the scheme, and it is thought that the arrangement will be consummated without any trouble. Of course it will be necessary for an election to be called that the people of the country affected will be given a chance to express their wishes in the matter, but it is thought at this time that there will be no trouble when the time comes, and that the end of the coming school year at least, the Pendleton schools will supplant the little red schoolhouses of the crossroads, and all of the territory around the city for several miles will be in one big district.

Last year he raised on one piece of ground 6,000 sacks of wheat, and this year the same ground yielded 4,000 bushels, but the first time he sold his wheat for \$1 a sack, and this year it brought close to \$1.50 for a sack. In this way he will make as much as he did last year. He has sold some of his wheat for 70 cents a bushel, and 72, but is holding the most of his crop for 75 cents. If he gets this price he will make more than a profit over the crop of last year. What wheat he had was of the best quality and brought the best prices, and taken all around it was as good, if not better than last year.

By far the largest barley yield yet reported to the Leader in this season of remarkable barley crops, was obtained at Joe Wurzer's place on Weston mountain, about five miles east of town, where, threatening rain, had been finished by Carlille's outfit. Five acres of barley yielded 185 sacks, or the almost incredible average of nearly 100 bushels per acre. This tract of ground was in corn and potatoes last year, indicating the value of diversified farming to the soil. Another tract of 15 acres at Mr. Wurzer's place yielded 250 sacks of barley.
