or chop mill, which is a great improvement over all those now sold in the market. It has several good points-lightness of driving power, increase of capacity, and greater excellence of work. The machine was designed in the foundry office and is the joint pro-duction of the proprietors of the lo-cal institution. The first one made was set up this afternoon and given its trial run, and found to run with

more work. It does not chop and cut the barley, but crushes it, thus retaining the meal and saving the whole strength of the grain. It is estimated that the output of

less power than the old style ma-

chine, and at the same time to do

the machine tried today will be from 2 to 3 tons an hour and if it is worked hard and under good conditions, it will do still more. It is the intention of the company to make a specialty of the machines and the force at the foundry will be put to work at once on the castings for more of them. The foundry will put them on the market at soon as they are ready to leave the shop, and will attempt to fill the demand for Both of these gentlemen have ex-
