CONSPICUOUS IN A BALLROOM. Flakes of Dandruff on the Collar and Shoulders of a Gentleman in Full Dress.

This is the thing you quite frequently see in the ballroom—a man's black dress coat literally covered with dandruff.

It must be annoying to the wearer, and certainly not a pleasant thing to observe. But dandruff can be eradicated. It is a germ disease that will come day after day.

Newbro's Herpicide kills the hair-destroying germ, and stimulates the hair to a rich, abundant growth; it does more—it keeps the hair soft and pliant.

Furthermore, Herpicide is a most pleasant toilet accessory; of pleasing odor, and cooling to the scalp.

Sold by leading druggists. Send 10 cents in stamps for sample. The Herpicide Co., Detroit, Mich. F. W. Schmidt & Co., special agents.

FINISHING TOUCHES. New Sewer System Ready for Official Trial in Short Time.

The contractors who have charge of the work on the sewer are now overhauling the end of the work. All of the pipe, about nine miles in round length, has been laid and the men are now engaged in putting the streets in as good condition as possible after having had them torn up, are testing the automatic flush tanks, and locking after the connections to see that all is fit before the work is turned over for the inspection of the city.

The sewer now in round numbers \$47,000 or \$48,000, and is guaranteed to be satisfactory by the contractors in every particular before the city has to pay for the work.

It will be a week or ten days before the official test is made by the city council, and in that interval everything will be finished, and all of the details of the work will be finished, so that when the city receives it there will be no further work to be done, and no complications will arise.

PENDLETON RETAIL MARKETS

Quotations on Staples Furnished by Local Merchants and Revised Daily.

Butter has taken a jump and is now up towards the top of the market.

To get good country butter, it is necessary for the housewife to pay 55 cents for a roll, and if her tastes are more modern she will pay from 70 to 75 cents for the product of the creamery.

Eggs are good sellers at 30 and 35 cents. The former being the price of the packed goods and the latter of the fresh.

The cattle market is down still farther than has been in the week past, or for some time. The dealers claim that the market is overstocked and that there is no demand. The farmers have not the feed and between the two causes the meat is cheap—to the butchers. At retail it is about the same as it has been for some time.

Cows are selling from \$2.25 to \$2.50, and steers from \$2.75 to \$3.00. The rest of the market is about the same as it has been for some time, no changes being noted in the general quotations for the staples.

BUYING BY THE LOCAL MILLS SLOWING DOWN.

Established and increasing sales of Pendleton Flour in China—Brands Will Not Put Out a New Brand—Orientals Use Heavy Grade of Flour.

Wheat is about the same that it has been for some time, and there is no great demand for it at the local mills.

The mills here have been buying at a pretty heavy rate of late, and have now quit for a season, while they ship in what has been bought. They are paying from 44 to 45 cents now at the mills, but are not looking very far for it at that price.

Mr. Myers is not troubling himself to any great extent over the export wheat trade, and is not contemplating the manufacture of a new brand of flour to supply the Oriental trade.

He is now supplying the trade with his Blue Ribbon brand, and is shipping out as much as he can grind.

Again, the Japanese and Chinese are slow to change and are suspicious of a new article and it requires time and trouble and expense to put a new article on the market and have it taken into general use.

His brand flour shipped there is growing in favor each year, and his orders are enlarging as fast as he can handle them, so that he has no reason to change.

The brand that is used by the people across the water is of a heavier shade than is used here, for the people there wish all the strength they can get, and as possible. Mr. Myers is now making this as fast as he is able to handle the shipments, and until he finds that he can handle them better, he will not change.

He will give One Hundred Dollars for any case of deafness (caused by catarrh) that can be cured by Hall's Ear, Nose and Throat Cure. Send for circulars, free.

CHURCH DINNER AND SALE. Women of the Congregational Church Make Final Arrangements.

A large representation of the Ladies Aid Society of the Congregational church, and members of committees, met at the residence of Judge Lowell yesterday afternoon. Several hours were spent in transacting important business and finishing preparations for the coming sale to take place next Tuesday.

Every detail of the coming event was attended to and preparations were completed to make it a success. The articles prepared for the sale are too numerous to mention.

In addition to the useful and ornamental articles found on such occasions there will be a great variety of jewelry, gold and gold-plated ware, donated by an Eastern friend.

A genuine New England dinner will be served by the ladies, complete in every respect, viz., baked beans and brown bread, Indian pudding, pumpkin and mince pie, with doughnuts and coffee. The sale will begin at 2 p. m., and the dinner will be served from 5 to 5 o'clock next Tuesday, December 8.

Horses Are Cheap. Owing to the scarcity of hay in the Sherman, Morrow and Gilliam county range districts, horses are very cheap this fall. Hay on some ranches in those counties is selling for \$16 to \$18 per ton, and all kinds of horse stock is cheap. Many of the horses running on the range will not be gathered in for winter on account of the scarcity of feed, and many more of them will be driven into Klamath and Lake counties, where hay is some cheaper and the winter range better.

TRAFFIC IS HEAVY THROUGH PENDLETON DAILY

OVER 200 FREIGHT CARS THROUGH PENDLETON DAILY

Four Regular Freight Trains Run Each Day With One Extra in Addition—Ore, Lumber and Ties East—Coal, Merchandise and Wood to the West—All Departments Busy.

Traffic on the O. R. & N. is probably heavier just now aside from any special rush of local produce, than at any time for many years.

There are four regular freight trains on the main line, Nos. 21 and 23 west-bound, and Nos. 22 and 24 east-bound. Each one of these trains runs every day, and in addition about six extra freight trains are run each week.

These freight trains are made up on an average of 45 cars each, making a total average of cars passing through Pendleton about 200 each day.

There is no special shipment now being made, but this number of cars is used in the ordinary traffic, consisting of lumber, ties, ore, merchandise, coal and wood.

The last large shipment to be made over the O. R. & N. aside from the wheat and wool shipments this year, was 2,000 carloads of piling for the Ogden-Lucan cutoff over the arm of Salt Lake, on the Southern Pacific.

Lumber, bridge timber and ties form the heavy east-bound shipments and the coal and merchandise the west-bound shipments at the present time. Since the O. R. & N. has substituted Wyoming coal for Rocky coal on the line, it has stimulated coal shipments from the East to the extent of 25 cars per day.

Most of the ore passing east comes from the Coeur d'Alene mining district and is sent to smelters at Denver and Pueblo. The lumber and ties go as far east as Illinois, and are loaded by the transload in Wyoming, Nebraska and Iowa.

The heavy traffic is making work for every department. The 14 heavy freight engines and five helpers on the mountain division are worked to the limit to keep the volume of business moving.

There are two helpers at Kamela, one of which comes to Pendleton almost every day to help trains, one is located at Teolocast and two at Pleasant Valley. These engines run about 120 miles each, every 12 hours, and all except the Teolocast helper have two crews each, working 12 hours.

The total amount of coal used in the helper service is about 2,000 tons per month and the cost of the helpers on the mountain division amounts to over \$20,000 per month.

Passenger traffic is equally heavy, every passenger train over the main line being made up of from seven to 12 cars, with standing room at a premium in the day coaches.

It will be necessary to put on another passenger train to accommodate the homeseeker rush to the West, if the ordinary business of the road remains at its present magnitude.
