CANCEROUS ULCERS

ROOTED IN THE BLOOD.

After the age of 45 or 50, when the vital powers are naturally weaker, it is noticed that a hurt of any kind heals slowly and often a very insignificant scratch or bruise becomes a bad ulcer or sore. At this time of life warty growths, moles and pimples that have been on the body almost from birth begin to inflame and fester, and before very long are large eating ulcers.

A small pimple came on my jaw, but gave me no pain or inconvenience, and I should have forgotten about it had it not begun to inflame and itch; it would bleed a little, then scab over, but would not heal. This continued for some time then the Cancer began to eat and spread, until it was as large as a half dollar, when I heard of S. S. S. and determined to inflame and fester, began to heal and after taking a few bottles disappeared entirely. This was two years ago; there are atill no signs of the Cancer, and my general health are large eating ulcers.

Whenever a sore or ulcer is slow in healing then you may be sure

Whenever a sore or ulcer is slow in healing then you may be sure something is radically wrong with your blood. Some old taint or poison that has been slumbering there for years, is beginning to assert itself, and breaks out and becomes a bad ulcer and perhaps the beginning of Cancer. These old sores are rooted in the blood, and while washes, soaps, salves, etc., keep the surface clean, they are not healing. A blood

medicine to purify and strengthen the polluted blood and a tonic to build up the general system is what is needed, and S. S. S. is just such a remedy. No poison is so powerful and no germ so deadly that this great vegetable blood. it, and ulcers of every kind quickly yield to its wonderful eurative properties. If you have an old sore or ulcer, write us all about it, and medical advice or any information you may desire will be given by our physiof the Tribune during the coming Russia may be excused for resent the exiles who are doomed to a liv. continues.
