CHEHALIS' TRIUMPH

ACCOUNT OF HIS RECORD—
BREAKING RACE.

Crowds at State Fair Went Wild on Oct. 7, 1897, When the Handsome Stallion, Driven by Frank Frazier, His Owner, Lowered the World's Two-Mile Pacing Record—Was Loaded With Floral Gifts.

While the death of Chehalis, the famous Umatilla county pacer, is fresh in the minds of horsemen, it is interesting to recount once more the splendid triumph of that horse at the Oregon state fair on October 7, 1897, when he lowered the world's two-mile pacing record to 4:19.4. The Salem Statesman of that date said of his remarkable feat:

Frank Frazier's handsome black stallion Chehalis, now holds the world's two-mile pacing record, and a prouder man than Mr. Frazier does not reside in the great state of Oregon.

The owner of this famous racer is one of the popular young citizens of Pendleton, Umatilla county, and his beautiful specimen of the horse family stands today without doubt, the fastest pacer in the United States.

The record which places him in that enviable position was made on the state fair track near Salem, shortly after 3 o'clock yesterday afternoon in the presence of 12,000 people, and when the phenomenal time was announced by Racing Judge Jos. Buchtel, a cheer went up that fairly lifted the little black racer off his feet and rent the air for miles.

As beautiful as a picture the little black horse moved along the wire he went and the timers clicked their watches. The quest for a new triumph was on, and the vast crowd in the grandstand and the solid mass of humanity that stood in front of that structure were eagerly watching every step of the coal black steed as he flew along. Going to the first quarter in 24 seconds, the time half in 1:05 1/2, and reaching the three-quarter post in 1:37.

The great pacer was still moving steadily. Before him was a quarter of a mile of track which was in perfect condition. Could he go the distance at a speed equal to any of the other quarters, was one of the all-absorbing questions of the moment. Still he came, if anything a trifle faster than ever, and before the crowd could realize it, he was even with the paddock gate and very close to the wire. A few more steps took him under that metallic line and the timers' watches were stopped at 4:19.4.

The world's pacing record for two miles had been broken. The crowd waited patiently for the announcement of the time. Chehalis was allowed to go nearly an eighth of a mile before he was brought to a stop. Mr. Frazier turned him around toward the grandstand and he walked deliberately up to the front of the judges' stand.

The time was announced, and a loud and continuous cheer was given for the pacer king and his owner and driver.

At this point in the exciting occasion President D. H. Looney advanced toward Chehalis and placed a large wreath of pink and white roses around his neck, then Ruth Greathouse stepped up, surrounded and were valued at about \$900. Mrs. Peters is absent in the Willamette valley. The cause of the fire is unknown.

Dr. Campbell Bucking Springs, in town today. Shortly after arriving he was taken quite ill with a bowel trouble which succumbed soon to medical treatment. The doctor, who is in the neighborhood of 40 years of age, was bucking sacks yesterday, although he is one of the wealthiest wheat farmers of his section.

GLENN WHITE ROBBED

ROOMMATE LAST NIGHT.

Young Lad Stranded Receives Money and Ticket From Home, Blows in Money and Robs G. Wyant at Hotel Eastern—Because of His Tender Age He Will Be Sent Home to His Mother Tomorrow Morning.

Although by his own confession he is guilty of robbing a sleeping man of his purse and money, Glenn White, a 16-year-old boy will not be prosecuted. White was arrested this morning upon complaint of G. Wyant, who accused the boy of stealing \$6.55 from him last night at the Eastern Hotel in Webb street. The hearing was to have been held at 1 o'clock this afternoon, but upon the boy's confession and the willingness of the prosecuting witness to drop the matter, the action was dismissed.

Young White yesterday received a ticket from his mother in Milwaukee, Wis., and he will be taken to the depot tomorrow morning and placed aboard the train by the marshals.

The boy has been in Pendleton for several weeks, working at odd jobs. When arrested he was at the depot awaiting the train. White has been away from home a little over a year. Recently he wrote home for money and his mother sent him \$5 and the boy had the money arrived yesterday, but he had spent it.

Last night he secured a bed at the Eastern Hotel. Wyant was the other inmate of the room and when the latter rose this morning, he missed his purse and \$6.55. He suspected the boy and secured his arrest. When taken, White had a purse which Wyant identified as his own, and \$5 in money. The boy declared that the \$5 was the one sent him by his mother. Later he confessed and said he was straddled and needed the money.

"To convict he boy," said acting Justice John Halley, Jr., "would mean a term in the penitentiary, and would do little to improve his morals any. Inasmuch as he has a ticket home, and says he wants to get back to his mother, I believe we are doing the right thing in allowing him to go. I hope he will profit by the lesson."

NEWS OF ATHENA.

Recovery of Mrs. Spencer From a Sudden Illness—Mrs. Worthington's Health is Improving—Illness of Miss Manasse—Death Caused by a Large Tumor in the Stomach—Serious Illness of Parke Infant.

Athena, Aug. 7.—Born, Thursday, August 4, to Mr. and Mrs. Len Simpson, a boy.

Mrs. "Spencer" has recovered from her sudden and severe illness. Mrs. Hue Worthington, who has been ill at her home for the past week, is now greatly improved.

Born, Friday, August 5, to Mr. and Mrs. Lee McAttee, an 8-pound boy.

TESTS 62 1/2 POUNDS.

Helix Wheat Leads, With Eastland Wheat a Close Second.

The heaviest test wheat grown this season in Umatilla county and weighed in Pendleton is the product of the fields of John A. Gross, of Helix. It weighed out 62 1/2 pounds, and the quality is exceedingly good.

The second best so far reported was grown by L. C. Rothrock, whose farm is one mile side of Eastland. Mr. Rothrock raised 200 acres of wheat which tests 62 pounds and averaged 40 bushels to the acre.

Little over 40 bushels to the acre—over 900 bushels of wheat threshed from 200 acres. Mr. Rothrock's wheat is a red chaff and club mixed.

CATTLE FROM HEPPNER.

Eight Hundred Head Bought for Utah Ranges.

Heppner, Aug. 6.—E. H. Clark, the Utah stockbuyer, shipped this morning about 800 head of cows and calves by his side, making a total of some thing like 800 head of cows and calves from the Heppner yards.

MAILHEUR READY FOR IRRIGATION

FIRST GOVERNMENT AID FOR PATENTED LAND.

Association Incorporated With \$2,700,000 to Buy and Acquire All Private Water Rights, to Divide Up Land into Small Tracts and Give the Government Full Swath—Tract of 90,000 Acres Now Practically Worthless. Will Be Reclaimed by Government Aid—Actual Cost of Reclamation to Be Repaid in Ten Annual Installments.

Articles of Incorporation of the Mailheur Waterusers' Association, have just been filed with the secretary of state. The capital stock of the association is fixed at \$2,700,000, divided into 90,000 shares of the value of \$30 each.

The incorporators are the leading citizens of Mailheur county, and include the following, many of whom are well known in Umatilla county: Ira S. Smith, W. C. Thompson, B. A. Cawser, C. W. Mallet, G. H. Hopper, C. E. Belding, J. R. Blackaby, F. M. Vines, F. W. Metcalf, E. F. Pratt, C. L. McCaunton, G. W. Hlanon, N. G. Long, T. W. Halliday, Fred Geierman and Emery Cole.

This association is vitally interested in Umatilla county, inasmuch as it is the largest body of patented land in Oregon to secure government aid in irrigating patented land and it is now in such condition of development that the irrigation of about 90,000 acres of patented land in Mailheur county, 62,000 acres of which is now practically worthless, is assured.

Before reviewing the special features of the association, it is necessary to describe the conditions in this special district in Mailheur county, which have led up to the formation of this organization.

Tract is Now Worthless. On the Mailheur river between Ontario and Vale, lies a large tract of arid land, comprising about 90,000 acres, nearly every acre of which is now dead. There are several private ditch companies operating in this vicinity, on a small scale, their ditches being estimated to supply about 25,000 to 30,000 acres, and the remainder of the tract being entirely unfit for use, and there being no possibility of further private irrigation, because of the enormous expense to be incurred in bringing the water from the upper river.

The problem before the owners of that arid land had been to re-claim and make it support homes, but the available water supply has been pre-empted and will remain but a small fraction of the land, and as the national irrigation act prohibits the government from interfering with private rights, under the conditions existing before the completion of the association, there was no possibility of government aid on this tract, although there is an excellent reservoir site, and ample water that can be stored for irrigation purposes on the tract, by the expenditure of about \$2,000,000.

Patterned After Salt River Plan. Determined that this magnificent tract of rich agricultural land should not lie idle, the citizens of Mailheur county applied to the government for a plan, by which national irrigation, department, cheerfully responded, recommending this waterusers' association, to be patterned after the Salt River association, in Arizona, which is now in successful operation.

Mr. Newell and his legal adviser, Mr. Elen, have visited Mailheur county several times and have shown great interest in assisting the people to form this association, in order to get government aid in reclaiming this tract of land in their midst and the results are highly satisfactory. The organization has been formed, and it is almost certain that a majority of the stock will have been subscribed by tomorrow, August 9, at which time Mr. Newell and Mr. Whistler will attend a mass meeting at Vale for the purpose of accepting the proposition to build a government reservoir, to reclaim this entire tract of dead land, if sufficient stock is subscribed.

Features of the Plan. The features and requirements of the association are as follows: In brief, as disclosed by the by-laws of the association:

Within the boundaries described by the association, and as empowered to acquire, furnish provide for and distribute to the land of the shareholders of this association, an adequate supply of water for irrigation thereof, to divert, store, impound, develop, pump, carry, deliver and distribute for irrigation and all other beneficial uses, deriving the same from any available sources; supply, also, to construct, purchase, condemn or acquire in any manner whatsoever, and to own, use, sell, transfer, convey, control, maintain and operate any irrigation works, structures, telephone systems, electric or other power plants, and transmission lines necessary for the purpose of this association.

Object is Settlement. Briefly speaking, the association is to acquire every water right within the boundaries, and turn it over to the government, so the government right will be the only water right in the district, and that is to be made inseparable from the land. After all water rights have been acquired, and every claim to water surrendered, then the government will undertake to irrigate the land, furnishing sufficient water to reclaim the entire tract.

Each acre of land is to represent a share in the association, and no one man is allowed to hold more than 100 shares, settlement and not speculation, being the object of the plan, the actual cost of the water is to be paid back to the government, by each individual subscriber, in 10 annual installments.

When a majority of the shares are subscribed, the government will begin operations, hoping to see the entire amount of shares subscribed in good time. Any one having land in excess of 100 acres is required to sell it, and if he is unable to do so at the end of two years, the association becomes trustee to sell it for him.

Government Must Be Supreme. In brief, the people of the district promise and bind themselves to acquire every water right now existing, divide the land into small tracts not to exceed 160 acres each, give the government a clear title and full sweep in all the available water needed and then the government loans the settlers the price of the reservoir, guarantees them a perpetual water supply, and attaches a water right inseparably to the land, the actual cost to be repaid in 10 installments.

IRRIGATORS MEET IN PENDLETON

STATE COMMISSION TO CONFER WITH ENGINEERS.

Oregon State Irrigation Commission Expected to Be Here Wednesday for the purpose of Meeting F. H. Newell and Maurice H. Hines, Public Meeting to Be Held, But General Work of the Commission Will Be Discussed.

F. H. Newell, chief engineer of the reclamation service, accompanied by a number of his assistants and Maurice Hines, legal adviser, will be in Pendleton Wednesday for the purpose of conferring with the members of the state irrigation commission. The meeting will be held to discuss laws necessary for the best interests of the reclamation of Oregon arid lands.

The meeting will not be public, and just where it will be held has not been decided upon. Mr. Newell and party will be in Walla Walla Thursday for the purpose of holding a meeting similar to the one that is to take place in Pendleton.

Mr. Hines, secretary of the commission, arrived in Pendleton this morning. C. W. Mallet, president of the commission, is expected from Ontario this evening.

Attorney Zera Snow of Portland, one of the legal advisers of the board, is also expected here. Thomas G. Halliday of this city, is secretary of the commission. H. V. Gates of Hillsboro, the engineer of the board, is absent in California and will not be present at the conference.

"There are a number of things of a general nature relative to the arid land laws of the state," said Mr. Halliday, "that will be discussed and discussed. Mr. Newell will not make any address of a public nature, for what the government intends doing has been gone over often of late."

Blue Stem the Better Wheat. Dan Bell, who lives two miles south of town, on the Tutuila, has cut and threshed 320 acres of wheat. The crop was divided between blue stem and red chaff, and the blue stem made the better crop, both for yield and quality. The former threshed out from 25 to 30 bushels per acre, while the latter made considerably less, being threshed out 15 to 20 bushels per acre. It sometimes takes a hero to tell the truth.

THE COMING COUNTRY. W. E. Temple Thinks the Des Chutes District is All Right. W. E. Temple, an insurance agent, is in town, having recently visited all the principal points in the Des Chutes country.

He is an enthusiast about the prospects of the Des Chutes country and has no doubt but that at Bend, or Hines Falls, or in the vicinity, at which point is natural water power rivaling in volume the water power at Spokane, though the fall is not so precipitous as at that point. However, the Des Chutes river carries a vasty large volume of water past that point than goes by Spokane. Hines Falls is 28 miles southwest of Prineville.

NEW GOODS THIS WEEK. Large line new style folding go-carts. The famous "Frobel" brand, \$3.35 to \$12.00. Come and see them.

New crepe paper, plain, rain, bow and floral effects, 10c, 15c, 20c and 25c.

HAMMOCKS. Better late than never. We secured a sample line of hammocks and marked them especially low—\$5 to \$12.25.

Frederick Nolf & Co.

College Place Health Food. Waters, fruit crackers, cream sticks, nut butter and salted peanuts.

Despain & Clark. Expert Collectors. We have located a branch office in Pendleton, and will make collecting default bills a specialty. No account too old for us to handle.
