

# Piles Can Be Cured

**By Internal Treatment**  
Without the Aid of Narcotics or the Knife  
You who suffer with piles know what a glorious boon it would be to you to be absolutely and painlessly cured. You know from actual experience that salves, ointments and other local applications do not cure. You may get relief, but you keep on suffering. There is a cause for every human ailment. Remove the cause and you cure the complaint. Piles have two distinct causes: First, congestion of the liver; second, constipation resulting from poor digestion.

## Dr. Perrin's Pile Specific

**The Internal Remedy**  
absolutely removes these causes by increasing the flow of digestive juices in the stomach, and relieving the congestion of the liver. It is a tonic for the entire bowel system and helps each particular member of this system to work easily and naturally. You simply take a teaspoonful of this positive, internally remedied three times a day before each meal. It is pleasant to the taste and absolutely free from opium, cocaine or other narcotics. It is not a palliative or temporary remedy; it produces a positive, radical and lasting cure.

### Absolute Guarantee

To cure any case of blood, bleeding, itching or internal piles, no matter how chronic or aggravated it may be. If over 100,000 cases there are only three on record where a positive cure has not been effected.

Dr. Perrin's Pile Specific can be procured of any reliable druggist under an original agreement to refund your money should you take two \$1.00 bottles of the remedy without receiving positive benefit.

Dr. Perrin Medical Co., Helena, Montana.

**A WORLD OF VALUE**  
in our "Waffle" combination stone rings for ladies. And a world of beauty, too.  
A great deal of money need not be expended to secure something pretty and good.  
We buy our rings from one of the largest factories in New York.  
Let us show them to you even if you are not ready to buy.

**GLENN WINSLOW**  
Jeweler and Optician  
Postoffice Block.

## Oregon Feed Yard

Corner Webb and Cobble Streets.  
The old reliable Oregon Feed Yard is not only centrally located, being only three blocks from Main street, but it is the largest and best equipped in the city. We have well water and city water, with hose to wash your rigs. We have plenty of shed room and corrals for loose stock. There is plenty of room for a six or eight-horse team to turn around inside the feed yard. We can give you grain hay, either green or ripe, and though the price of feed is higher, you will find that we have not raised the price, but the solid schedule of prices is maintained.

**Oregon Feed Yard**  
MILLSAP BROTHERS, Proprietors.

T. J. MORRIS, Cashier.  
J. W. MALONEY, Asst. Cashier.

FOR SALE AT THE EAST OREGONIAN office—large bundles of newspapers, containing over 100 big papers, can be obtained for 25 cents a bundle.

## RICH BUTTER CREEK

O. F. THOMPSON, PIONEER,  
SPEAKS OF RESOURCES.

In 1872 He Bought Bunchgrass Land on Butter Creek Meadow for \$1.25 Per Acre—is Now Worth \$100 Per Acre—Cattle and Alfalfa Their Strong Suit—4,000 Head of Cattle on the Creek.

A representative of the East Oregonian visited the home of O. F. Thompson on Butter Creek recently. Mr. Thompson has one of the finest residences and one of the best ranches on Butter Creek.

A few weeks ago Mr. Thompson had a partial stroke of paralysis which has left his vocal organs somewhat affected. Asked about the early history of the settlement of Butter Creek he said:

"I speak with difficulty, but I can tell you something about it. I came to Umattilla county in the spring of 1854, settling at Umattilla. When the county seat was moved to Pendleton in '69, I being sheriff, of course moved there also.

"In 1872, when my term expired as sheriff, I bought a section of school land on Butter Creek paying \$1.25 an acre. When I moved onto the creek it was not much settled. It was grown up to bunchgrass shoulder high to one's horse.

"It was used as a range by the cattlemen and sheepmen. The land that I bought for \$1.25 an acre 30 years or more ago, has increased a hundred-fold in value. That is, wherever it is in alfalfa.

"This country is not only a good alfalfa country, but it is a splendid orchard country. I have five acres of peaches that are hard to beat. The limbs are so heavy with fruit that many of the limbs are being broken. It is the same way with my prunes. The peaches I sell to the hill land farmers at 1 1/2c a pound. The prunes I feed to my hogs.

"As yet there is no market for them. I have 17 acres of orchard. We need a market. It is too far to haul to make it pay. Of course, alfalfa is our main dependence. I have 250 acres of alfalfa. I will only cut two crops and pasture the third crop.

"Last year I put up 1185 tons, but this year I will do some better than that. The winter before last I wintered and sold 300 head of cattle. Last winter I raised about 300 head of stock.

"It takes an average of 2 1/2 to 3 tons to winter each animal. Last year was a rather hard year on the Butter Creek rancher.

"I have 2000 head of sheep, and sold them for from 3 1/2 to 4c, having our expense, care and risk with little profit. Previous to last year we had some very well. This year we think we see daylight ahead. We will buy our feeders in the free and John Day country at from 2 to 2 1/2c and stand a show to make something.

"I should think that from the mouth of the creek to the forks, there were about 4000 head of cattle fed on the creek last year."—Fred Lockley.

### SHORT OF CARS.

Fourteen Thousand Head of Sheep Tied Up at Meacham.

Fourteen thousand head of sheep are tied up at and in the vicinity of Meacham for lack of cars in which to transport them.

Of this number L. D. Hoy was the purchaser of 2000 head for the Frye-Bruh company. It is said that these sheep will be sent to the Eastern markets on a speculation.

The remainder of the sheep bought by Garrison & Reynolds—8000 of Groom & Campbell, 1000 of Daniel Ross and 2000 of Pat Deberry. Of this lot several thousand were to have been shipped today, and the remainder September 5.

Hunter & Stephens bought 5000 head of lambs and yearlings which they then sold to Sylvester Brook for shipment to Southern Colorado.

Hunter and Stephens are now in southern part of this county negotiating for more stock sheep.

### IN ARTESIAN DISTRICT.

Colfax People Interested in Land Near Artesian Wells at Castle Rock.

W. Frank Crowe, an attorney of Walla Walla, was in Pendleton last night on his way home from Arlington, Or. Mr. Crowe has been engaged in looking after the title to land in Castle Rock. "There are about 3500 acres of land under the Pilot Rock artesian well," said Mr. Crowe. "That a number of Colfax people intend to settle on. A town site may be laid out.

It is the intention of the Colfax colony to sink a number of wells, and they feel confident of their ability to secure plenty of water for irrigation purposes."

Mr. Crowe said he heard but little talk concerning the branch line of the O. R. & N. company to Condon. "The people of Arlington," he continues, "believe that the line will be constructed. Some building material is going in."

### MILTON SHAW INTERRED.

Funeral of Popular High School Boy is Largely Attended.

The funeral of Milton Shaw was held this morning at 10:20 o'clock from the residence of Charles E. Bond, on College street, Rev. G. L. Hall, of the First Baptist church, officiating. The services at the house and at the grave were largely attended by his friends and former school mates.

The pallbearers were: Furnish Slater, Lester Cronin, Roy Alexander, Clarence Hollerman, Orville Reeves and Fred Hartman.

### FIRE AT WESTON.

Four Hundred Dollar Blaze at the Brick Yard This Morning.

A fire at the Weston brick yard this morning destroyed a patent clamp or shed over one of the kilns. The loss is about \$400. The yardmen succeeded in saving two adjoining kilns. The fire was occasioned by the heat from the burning kiln.

"I don't see how we saved the other two sheds," said Manager Clark E. Nelson, who arrived in Pendleton this afternoon.

## USE WESTON BRICK

NEW SCHOOL HOUSES WILL BE MADE OF LOCAL PRODUCT.

Contractor H. E. Cook Furnishes His Bond of \$20,000—Cost of Buildings Comes Within the Estimate Made by Architect C. E. Troutman.

Weston brick is to be used in the construction of the new Pendleton public schools. The school board decided upon this yesterday afternoon and H. E. Cook, the contractor, furnished his bond for \$20,000 for the faithful fulfillment of the work. His bondsmen are Robert Foster, James Perry and William H. McCormack. The three buildings are to be turned over to the district ready for occupancy by January 1, 1905.

The new houses, completed, with the exception of plumbing and heating apparatus, will cost the city of Pendleton \$51,342. The basement work cost \$7000 and the cost of the superstructures of Weston brick is \$44,342. Bids for the plumbing and heating will be advertised for within a few weeks.

The cost of building the houses is within the estimate made by Architect C. E. Troutman, and the \$60,000 in bonds voted, will be sufficient. The houses, completed, with the furniture the expense of which must be met by a second levy.

By the use of Weston brick instead of the ordinary product, the school district saves about \$2000. The tensile strength of the Weston brick by the government test, leads all other products of the kind in the Northwest, and is generally acknowledged as the best desired by contractors and builders.

### WEATHER OBSERVATIONS.

Summary of Meteorological Notes of Past Week.

	Max.	Min.	Rain.

H. F. JOHNSON, Observer.

### Catholic Services at Athena.

The first services in the new Catholic church at Athena will be held Sunday, September 11, conducted by Rev. Neale of the reservation mission church. No date is yet set for the dedication, which will take place some time this fall, however. After the 11th Rev. Dimier will hold services regularly in the Athena church every second and fourth Sunday in each month.

### STRINGING WIRES

TWO MILES GO UP UNDER FAVORING CONDITIONS.

Total Length of Line Fifty Miles—Poles Set Nearly to Saxe—Line Not Yet Completely Surveyed—Over One Mile of the Barrel Flume is Completed—Great Demand for More Light—Material Arriving Constantly.

The stringing of wires on the new electric power line began a few days ago at Walla Walla, and has progressed about four miles. The force doing this work will average between 16 and 20 men, and they will put up an average of two miles per day under favorable conditions, such as level and open country and clear, still weather. This distance cannot be made when the canyons are reached, nor in stormy, windy weather.

The almost exact distance from Walla Walla to Pendleton by the route surveyed for this line being 50 miles, can hardly fall to be over a month before the line reaches Pendleton. All the stringing of wires will be done from the northward.

Pole setting has nearly reached Saxe station, while the distribution of poles has not reached Pendleton. In fact, the route is not yet entirely surveyed into this place.

A little over one mile of the six miles to be built of barrel flume is completed, and other parts of the system are in equally as incomplete condition, so it would appear to be a "lag-man" job, under the very best conditions, that two months must elapse before the completion of the system can be reasonably hoped for.

This calculation would show that the time up to the first of November, which is, in fact, the time promised, in general terms, by the officials of the company.

Subordinate managers of the company seem to be confident that in a short time "things will be going fast," which is a condition hopefully if not patiently looked forward to by a host of prospective patrons of the new company. The demand for light increases every week, and will be more pronounced and impatient as the days grow shorter.

Immense quantities of material are arriving every few days, and undoubtedly the company will use every effort and facility to fulfill its promise that power and light will be ready by the first of November.

The Catholic mission school, the reservation will open next Monday. It is not known just what the enrollment will be upon opening, but it is expected to be larger than ever before. The two school houses at the hall are being repainted on the exterior, and all the buildings are being thoroughly overhauled in preparation for the school.

### Will Not Return Alone.

A. J. Elsner, who has a 320-acre farm two miles west of town, leaves for St. Louis, where he will visit the fair. Other attractions besides the fair are drawing Mr. Elsner eastward. When he returns he will not return alone. He will be married by the East. Mr. and Mrs. Elsner will return in about a month or six weeks.

### New Brickyards at Oro Dell.

George Kreiger has a big working force at his brickyards at Oro Dell. A new kiln of about 200,000 was fired a few days ago, and two more of about the same size will soon be ready. There are three moulding pits from which the daily average output is 18,000.—La Grande Chronicle.

### Bought Fat Steers.

T. C. Benson, representing the Portland Union Meat Company, has bought of Lon Smith of Kamela, 52 head of fat steers, paying therefor \$3 per 100 pounds.

### Mrs. Chenault Recovering.

Mrs. M. Chenault, of La Grande, who recently underwent an operation at St. Anthony's hospital, is thought to be on the way to recovery.

### Will Be Taken to Asylum.

Mrs. Cora C. Brown, an insane patient, will be taken to the state hospital at Salem tomorrow morning by Sheriff T. D. Taylor.

### Statistics show that appendicitis is almost confined to meat eaters.

## SATURDAY'S LOCALS.

Miss Grace Ray of Weston visited in Pendleton last night.

Thirty styles Japanese lanterns, 5c to 25c. Notha book store.

Frank Spike, the well known Echo stockman, is in town today.

A. P. Nobilit, editor of the Free-water Times, is in town today.

Miss Grace Gilliam, principal of the First Rock school, is in Pendleton today.

It is estimated that 300,000 bushels of wheat will be handled to Echo this fall for shipment.

William Kerr, of Milton, is suffering from a broken leg, caused by a kick from a horse.

Mrs. B. B. Hall and family have returned from Weston where she has been spending the summer.

Dale Preston of Athena, was in Pendleton last night. He is manager of the Preston-Parson mills.

There were 11 arrests in the town of Free-water last month, and 25 hoboes and drunks were ordered out of the town.

Mrs. Lloyd of Havana, daughter of James Nelson, is seriously ill at St. Anthony's hospital. She is under the care of Dr. McPaul.

O. G. Chamberlain and son Orange, A. A. Barrett, John Froome, Frank Miller and B. P. Ogde, all of Athena, are Pendleton visitors.

Mrs. B. B. Hall and daughter, and Mrs. W. H. Hall, who have been visiting relatives in Weston during the summer, will return home this afternoon.

The building trade continues lively in Walla Walla. The latest addition to the city will be a one-story brick in Main street, erected by William O'Donnell.

Miss Eva L. Wood, teacher in the Pendleton public schools, passed through this city last night on her way to Weston. She has been spending the summer at the home of her father.

While playing "cougar" with a young companion the 10-year-old son of A. Loeff, a Milton butcher, was shot through the right knee with a 2-calibre rifle. The boy will recover.

The body of Fred Dee, a Condon sheepman, has been disinterred for examination. Dee was heavily insured and it is rumored that his death was due to poison administered by some one interested in the estate.

### FEDERATION OF LABOR.

Weighty Problems Will Come Before Executive Committee.

Washington, Sept. 3.—The executive committee of the American Federation of Labor will meet here September 12.

It is understood that the request of President Donnelly, of the Butchers' Union, that agents of strikers be authorized to solicit contributions from allied unions will be granted.

The committee will also consider the textile strike at Fall River, and the miners' trouble in Colorado.

The committee will discuss and plan for labor legislation for the coming session of congress.

### NEW MINT OPENS AT DENVER.

But Will Not Begin Coinage of Money Until July, 1905.

Denver, Sept. 3.—The new United States mint in this city was opened today with a president's salute of 21 guns and raising of the American flag over the building by George E. Roberts, director of the mint, of Washington, D. C.

The mint will not begin coinage until July 1, 1905, as no appropriation has been made by congress to cover the cost of coinage. Frank M. Downer has been appointed superintendent of the mint.

T. M. Miller, a Seattle attorney of prominence, has been fined \$25 for slapping his wife.

### Tennessee Coal Miners Strike.

Coal Creek, Tenn., Sept. 3.—Nine hundred coal miners went on strike in the coal creek district today, raising the number out to nearly 1300.

The East Oregonian is Eastern Oregon's representative paper. It leads and the people appreciate it and show it by their liberal patronage. It is the advertising medium of this section.

## BEATS THEM ALL

HOUSER & HAINES COMBINED HARVESTER DOING GOOD WORK.

Everyone in the County Praises the Purchasers—Not a Dissatisfied User—Large Sale Being Built Upon Its Merit.

As the immense wheat crop of the county is nearly harvested, considerable talk arises among the farmers as to the most successfully harvested crops. Mr. J. S. Furnish is quoted as saying that he has the best combined harvester in the county and has successfully harvested his crop for the past two seasons with his Haines-Houser Combined Harvester.

On the strength of the success that he had with his machine last year, several others were placed in the county this year by the agent, Mr. Fred Weber, and favorable reports come in from Charles Hamilton, L. L. Mann and H. H. Williams. These farmers all used this machine and cannot say too much in praise of the work they accomplished with this machine.

Mr. Fred Weber, local agent for the Houser & Haines Manufacturing Co., states that he is well pleased with the machine and predicts that a large number will be sold in the county this season. He says that a machine that will do the work this machine does cannot be overlooked very long by those directly interested in this class of machinery and a combined harvester that starts in from the beginning and works the entire season through without trouble, is a machine that will make its own headway regardless of anything that may be said to the contrary, facts speak for themselves.

Umattilla county farmers have grown to realize the great saving by harvesting in this way and therefore it is hard to travel any direction without seeing these great labor-saving devices doing their wonderful work that a half century ago would have been impossible to believe.

### ON MAXWELL DITCH

RIVER DAM BELOW THE BUTTER CREEK BRIDGE.

Interesting Analysis of the Work Under Way and Projected—A Five Thousand Flume is Projected That Will Cover Six Thousand Acres of Land—Company Now in Control Owns Eleven Thousand Acres of Deeded Land.

Echo, Or., Sept. 3.—Just west of what is called the Butter creek bridge, across the Umattilla river, the masonry may see a group of tents. By the river bank are six and a half mile distance on are several more, serving as stable, cook tent and dining room.

In the bed of the river, now nearly dry, a score of men are prying out large rocks and rolling them into the form of a stone wall across the river. L. W. Furnas, the foreman in charge of the work, has been ordered to furnish some statistics in regard to the work.

"Yes," said Mr. Furnas, "we are going to put in a good substantial dam, and when it is built it will be a one-to-two pitch, while the other side will be a one-to-five pitch.

"The old Sparger dam was 1700 feet above the one we are building. The dam was over and out, and as you see, is just below. We are a half mile below the Butter creek bridge, and just below the mouth of the river.

"We will put in a 12-foot headgate carrying a four-foot stream of water. In addition to this we will have a three-foot head of water held by a slashboard on top of the dam so that we will have seven feet.

"Sparger utilized the old river channel and widened and deepened it, making for the first mile or two an excellent ditch. We will utilize the old ditch for two and a half miles. The old ditch was built four and a half miles, and was eight feet wide at the bottom. We will widen it to a 12-foot ditch.

"We have cross sectioned the ditch for 4000 feet in 100 stations. You see that gives us 400 stations, or about seven miles of ditch. A mile and a quarter below our first headgate, where we divert the water, we will split it in another headgate, and a spillway. Five and a half miles below the first headgate we are going to put in a flume 2900 feet long, which will take care of 1000 acres of land.

"Latterly, probably this fall, we expect to put in another flume a mile below the first flume. This will be a 5000-foot flume, and will come from the Cold Springs basin. It will be four feet deep and six feet wide, and will irrigate about 6000 acres of land.

"If winter irrigation will be sufficient then the Cold Springs proposition will be a simple one, as we will have plenty of water throughout the winter for flooding and irrigating the Cold Springs basin.

"Our company owns 11,000 acres of deeded land. Of this we will get water on 4500 acres this fall. We will save 200 acres of alfalfa this fall. You might say that 4500 acres will be our limit for this fall's work.

"If you see H. L. Hawkins, our engineer, he will show you the plans for our ditch, and a better idea of the work. We have one advantage: the soil is not porous, so we will have but little seepage and loss of water.

"We are taking up the land by desert right under our ditch, so we do not encourage settlers to homestead our ditch without irrigation. Bob Templeton put in an acre of potatoes near the 'Licks,' at the mouth of Cold Spring and they were turning out fine when I was over there. Now if the land will do that without water think what it means to have water when it is needed. There is no question that water is king in this part of the country."

### See Wheat From Pendleton.

A. G. Conkey, received yesterday from Pendleton, a carload of club wheat which he will use for seed. The wheat is a very fine lot and is a different variety from that which Mr. Conkey has been planting.—La Grande Observer.

### INDIAN BOY ESCAPES.

Albert Mary, a Umattilla, Runs Away From Chenewa School.

On Friday or Saturday of last week Albert Mary, a Umattilla boy at the Indian school, escaped from that institution and has disappeared. He had been in the guardhouse for some time, and was taken out and put in the work with the threshers, from which labor he made his escape, says the Salem Statesman.

Many of the refugees with some Greeks who are working on the Southern Pacific railroad, and remained with them in hiding for a day or two. When he finally disappeared from them he said to have taken some of the Greeks' money and some other things.

### DELEGATES APPOINTED.

Mayor Selects Men to Represent City at Malheur.

Mayor W. F. Matlock has appointed Judge George A. Hartman and Bert Huffman as delegates to the state irrigation meeting to be held at Ontario on September 19, 20 and 21. Irrigators from all parts of Oregon will be in attendance at the sessions.

### Suited With Umattilla.

W. H. H. Scott, a pioneer farmer of Athena, was in Pendleton this morning. Mr. Scott says the wheat crop this season is very clean. "We are all happy," he said, "I have traveled around considerably, but never yet have I found a country that suited me as well as Umattilla."

### Real Estate Transfers.

The Pendleton Savings Bank has transferred to G. Neuman a quarter section of land in township 1, north of range 32, for the consideration of \$3900.

## OPENING
