

A NEW PRINCIPLE IN MEDICAL SCIENCE.

For years it has been the practice of medical men to treat patients suffering from piles by local, external applications.

After months of research and study, accompanied by actual experience with various patients, Dr. C. A. Ferrin arrived at a positive conclusion as to the exact action of the various parts of the bowel system, under different conditions, and when subjected to various prescriptions.

He finally prepared that wonderful internal remedy known as Dr. Ferrin's Pile Specific, which is put up in bottles, retailing at all reliable drug stores for \$1.00 each. This internal remedy has been on the market for the past ten years, and in all of that time there has not been three cases where a positive cure has not been effected.

Dr. Ferrin's Pile Specific is sold under a positive guarantee by the druggist making the sale, to refund the full purchase price, providing the remedy fails to cure. This is the absolute proof of its merit.

October 16, 1902. JACK SULLIVAN, Chicago. Better get a bottle of your druggist today and get relief from present and future suffering.

BIG POWER PLANT

WORKING NIGHT AND DAY ON ELECTRIC PROJECT.

Monster Flume Line of Circular Form Seven Miles Long—Dam is of Solid Concrete and is Built to Stand for Ages—Flume Line Runs Up and Down Hills—One Hundred Feet of Flume a Day is Being Completed—Wires Now Strung to Walla Walla.

Milton, Sept. 16.—Your correspondent at this place visited the electric power plant on the south fork of the Walla Walla river recently. The dam, which is 13 miles from Milton, is of solid concrete and is put in, in such a shape that it will stand for ages.

First a trench or excavation about 40 feet long, 5 feet deep at the lower end, and 12 at the upper, was made in the bottom of the heavy timbers were placed in solid masonry, then a layer of stone and timber, all bolted and cemented together until within a few feet of the top of the flume.

Around this large pile were driven to guard off brush and floating timber which might injure the dam of flume during high waters.

The grade for the flume to lie on is on the south side of the canyon, and is seven miles long. It follows a gradual grade and will, when completed, empty into a large reservoir 400 feet above the river on the hillside.

Two and a half miles of the flume, which is four feet in diameter and bound with hoops made of round rods, every eight to 10 inches, is completed. There are six gangs of 10 men each, working on this part of the work, completing about 100 feet each in 12 hours.

The flume is not laid on a grade exactly level, but in deep canyons, in some places curves down 120 feet and rises on the other side only a few feet below the opposite. In such places the hoops are placed not more than six, and as close as three inches apart.

The timbers are all hoisted to the grade on a cable, with a large donkey engine, and carried away on a track, cars or dump, which is laid for the purpose.

There are about 200 men working along the line at the present time, and in order to complete the work by the first of the year the force will be doubled.

The water, when the plant is completed, will run down through an iron pipe or cast-iron pipe, and on the side of the hill, a distance of about 1200 feet, and will be regulated at the reservoir with valves. The poles are strung all up from Walla Walla to Pendleton and the wires on to Walla Walla. The manager estimates the cost at from \$750,000 to \$1,000,000.

NEWS OF AETNA.

All the Participants Gave \$1 to the Aid Fund and Told How the Dollar Was Earned—Over \$27 Raised by the Entertainment—Excellent Musical and Literary Program Was Rendered.

Aetna, Sept. 17.—At a meeting of the Ladies' Aid Society Thursday night in the Methodist church, a joyous time was had. Mrs. Hugh Worthington and Mrs. W. M. McElister were principally instrumental in conducting the social gathering. It was in the nature of an experience meeting, and every one who gave a dollar told of his or her experience in earning it. \$27 was the amount given to fund of the society.

It was remarkably interesting to hear each party tell how the dollar given by him or her, was earned. Some earned one by sewing, others by cooking, teaching, washing, hair-cutting, "bucking sacks," and in various ways, showing how many ways there are to earn money if people will only try. Now and then it proved interesting to hear some one tell his experience.

The real program was begun with music rendered by Miss Elsie Rosenzweig, one of Aetna's most accomplished young women, who is a teacher in the city schools.

Will M. Peterson was then introduced and spoke briefly on "The Achievements of Womanhood," giving most of his time to the progress of woman since her appearance upon the stage of action. His speech was very encouraging and well liked by all.

Miss Nettie Cannon, in her usual charming manner, recited a nice selection. It was full of pathos with now and then a little intermixture of funny sayings.

Mrs. Thompson recited a poem that was well received and showed careful preparation.

Joseph Scott, one of Aetna's enterprising merchants and educated gentlemen, sang a beautiful solo to the delight of all.

After the program was finished, everybody went to the church dining room, where nice refreshments were served. These consisted of coffee, tea, cake, pie and many other little viands.

The whole affair speaks highly for the Ladies' Aid Society, and everyone was highly pleased with the events of the evening.

NEWS OF MILTON.

Come From Sumpter to Attend Columbia College—Returned From Spokane—Wedding Will Take Place October 1.—Visitors From Illinois—New Pastor's First Sermon Next Sunday—Visitor From Moro.

Milton, Sept. 16.—Master Harold Richards has arrived from Sumpter and will spend the winter with his grandparents, Mr. and Mrs. O. C. Hinkler, and attend Columbia college. Columbia college will open the 21st at 9 a. m. On Tuesday evening the opening address will be delivered by the president, Prof. Louis C. Perry, in the new opera hall. A short program of music and readings will also be given.

L. B. Hogan, of the Mosgrove Mercantile Company, has arrived from Cosmopolis, Wash., on a business visit.

Mrs. A. J. Adams is here from Moro, visiting her daughter, Mrs. J. E. Nichols. Mr. and Mrs. William Frazier returned Wednesday from Spokane, where they had been visiting for two weeks.

Cards are out announcing the wedding of Mr. R. E. Bean and Miss Nellie Sanderson, at the home of the bride, in Pomeroy, October 2.

Mrs. Carrie Edwards and family have arrived from Illinois and are visiting Mr. and Mrs. James Edwards. Rev. J. J. McAllister, accompanied by his wife, came down from Dayton yesterday. Rev. McAllister is the new pastor of the M. E. church, and will preach next Sunday morning and evening.

ECHO SORGHUM WHELLOS WELL

W. W. WOLFE HARVESTS EXPERIMENTAL CROP.

Grows Without Irrigation Except the Sillage and Yields Finished Sorghum at the Rate of 500 Gallons Per Acre—Mr. Wolfe Will Make Sorghum a Regular Crop Hereafter—Putting in Plant to Make Syrup.

An "infant industry" that will be watching any amount of developing in this county is the raising of sorghum, judging from the experience and opinion of W. W. Wolfe, of Echo.

Mr. Wolfe's experience in the raising of sorghum will be put to the test in the East nearly led him to speculate on the possibilities of the Echo district in that respect. The result, however, will be an experiment, sorghum is not, at least it is not with him.

Three years ago he raised a small patch, two years ago and a year ago he also reduced small patches. One year, by slight irrigation, he raised sorghum which tried out at the rate of 500 gallons to one acre of plants.

Last year he planted a large acre of sorghum on ground that is semi-erect, being located in the edge of the meadows, four miles northwest of Echo. The ground was plowed once and had never been plowed before, being typical sage brush semi-desert. It was harrowed once and then the sorghum seed put in the ground and no further attention paid to it. It was not cultivated nor was a drop of water put upon it from that time on except the few and insufficient rains which fell during the summer.

George Rook, of Meadow creek, has sold several thousand head of sheep.

John H. Raunston, a prominent Adams farmer, is in Pendleton on business.

James Woods, of Athena, is in town.

Dr. N. W. Weir is in Pendleton from Adams.

Frederick Gerberding of Weston, is in Pendleton on business.

John R. Raunston, a prominent Adams farmer, is in Pendleton on business.

Mrs. W. W. Pomeroy, of Umatilla, was in town yesterday, returning this morning.

Mrs. William Krause went to Weston this morning to visit with her mother, Mrs. Leach.

John Grieshaber of Adams, was in Pendleton yesterday afternoon on his way to St. Louis.

Charles Pappas of Weston, was in Pendleton last night on his way to Albany to enter school.

Mrs. Lillian Rosenkranz, who has been the guest of Mrs. P. T. Tweed, returned to Coifax this morning.

William and Ernest Evans, of Pilot Rock, have sold several thousand head of their stock sheep to Eastern buyers.

J. H. Dick, of Camas Prairie, was in Pendleton yesterday and disposed of a few head of fat beef to local butchers.

Myrtle M. Hudson this morning filed her contract to teach in district No. 58 with County School Superintendent Frank K. Wiley.

Mrs. William Glasson, of Echo, who has been the guest of Mrs. John Sylvester, of Pilot Rock, was in town yesterday, and this morning took the morning train home.

A. C. Henderson, of Pilot Rock, is in town today, coming to meet his wife and niece, who returned from the western part of the state on the early morning train.

Dr. J. M. Pruett and his sister, Mrs. M. S. Whitman, left on the west-bound train this morning. Mr. Pruett will return to Oakland and Mrs. Whitman will visit in Portland.

W. G. Preston and wife of Watsburg were in town last night and went north on the morning train. They were en route home from Portland. Mr. Preston is at the head of the Preston-Porter Milling Co.

R. R. Collins, the well known wood dealer and shipper of Kamela, was in the city yesterday on his way to Pomeroy, where he has purchased a small tract of fruit land, to be nearer a public school. He reports a large amount of wood now on the dump at Kamela, ready for shipment to the various markets in the inland Empire.

Ukiah Buttermaker. H. T. Connell, of Ukiah, is one of the buttermakers whose product always commands the top of the market. Mr. Connell does not put up ice, nor buy ice, but stores his butter and keeps his milk and cream in sub-cellars cooled by the finest springs in the county. His annual output is 1225 pounds sold in Pendleton, and 1210 pounds sold in other markets. These are approximate figures only, with the probability that he markets above the estimate given.

Engineer Light Plant at Milton. J. B. Gorton, for some time engineer of the Milton municipal electric light plant, was in town last night and went to Heppner this morning, called there by the dangerous illness of his father, E. B. Gorton, who is afflicted with a stomach trouble. Mr. Gorton is succeeded in the electric light plant temporarily by a man named Powers, from Walla Walla.

Eighteen Carloads Sheep. On the 26th will be loaded at this place 18 carloads of stock sheep—of every class, for Nebraska and Colorado. They are the property for the most part of Pat Haley, the Colorado sheep king, and are for full feeding during the winter.

W. W. WOLFE HARVESTS EXPERIMENTAL CROP.

Grows Without Irrigation Except the Sillage and Yields Finished Sorghum at the Rate of 500 Gallons Per Acre—Mr. Wolfe Will Make Sorghum a Regular Crop Hereafter—Putting in Plant to Make Syrup.

At this meeting it will be thoroughly discussed, and no doubt will carry it, not the board of directors will take the grade or grades and have it taught, anyway.

Something over \$200 has already been subscribed for that purpose, and as much more can be easily raised.

Farmers' Warehouse. Milton, Sept. 16.—A movement is on foot to build a farmers' warehouse here. There is a strong demand for it and about \$2000 are now in hand for the purpose. Over 500 bushels of grain will be stored here this year.

SATURDAY'S LOCALS. James Woods, of Athena, is in town.

Dr. N. W. Weir is in Pendleton from Adams.

Frederick Gerberding of Weston, is in Pendleton on business.

John R. Raunston, a prominent Adams farmer, is in Pendleton on business.

Mrs. W. W. Pomeroy, of Umatilla, was in town yesterday, returning this morning.

Mrs. William Krause went to Weston this morning to visit with her mother, Mrs. Leach.

Eighteen Carloads Sheep. On the 26th will be loaded at this place 18 carloads of stock sheep—of every class, for Nebraska and Colorado. They are the property for the most part of Pat Haley, the Colorado sheep king, and are for full feeding during the winter.

Baker County Fat Cattle. Nine carloads of Baker county fat cattle arrived this morning and will be transferred to the W. & C. R. for shipment to the Sound. They are for Fry-Bruhn and were purchased by J. C. Loxeran.

Big Shipment of Stock Sheep. There will be shipped from this point October 1 over the Northern Pacific, 6250 head of stock sheep, the purchases of John Howard for the Minnesota feeding grounds.

Three Thousand Sheep Sold. Hunter & Stephens have bought of Guilford Bros. for the Nebraska feeding grounds in Buffalo county, 2000 head of mixed stockers—lambs, dry ewes and wethers.

Remodeling Residence. Andrew Fischer, of Stage Gulch, will soon build an addition to his dwelling and remodel the main structure, putting about \$500 into the improvements.

1800 Acres Wheat. M. J. Foster, of Stage Gulch, has just finished threshing 1800 acres of winter wheat which averaged 20 bushels to the acre and was of excellent quality.

MANY SHEEP SOLD

J. E. BEAN SAYS 100,000 THIS SEASON.

Most of the Sales This Year Have Been of Old Ewes—Young Stock Nearly All Left in the County—Herd Culls Out Thoroughly This Fall, Leaving Nothing But Thrifty, Vigorous, Young Stock to Hold Over.

Stock Inspector Bean states that from 25,000 to 100,000 sheep have been sold in this county since shearing last spring, and that the number of sheep that will be wintered in this county this year will be from 50,000 to 75,000 fewer than last winter. In fact, he believes that this estimate of the number of sheep sold will probably be exceeded.

A peculiarity of the sales is the large number of old ewes sold off, which augurs splendidly not only for the pocketbooks of the sheepmen, but for the quality of the fleeces for the next few years, as necessarily the lambs coming will be from young and vigorous mothers, while the per cent of blooded bucks of all breeds was never so large in this county as now.

In fact, the per cent of old sheep and wethers in this county was perhaps never so small at this time of the year as now, and not in many years has such a large per cent of lambs been sold off at this time in the fall as this year.

The sheep men will start next year with clean fleeces and few debts, and in general terms the problems of the coming year are much simpler and their pocketbooks heavier than for many years.

The prevailing prices for lambs this fall ranged from \$1.62 to \$1.75, "according to the cut," as the term is, the former figure commanding when the cut has been five per cent, and the latter when the cut has been about 10 per cent. An interesting detail in the history of the sheep industry of this year is the large proportion of twin lambs.

"Course" Sheep for Mutton. Julius Wagner, of Pilot Rock, has sold to eastern feeders 1200 head of lambs for which he received \$1.75 per head. These lambs were all shire, Cotswolds and Shropshire, and uncommonly large and rangy animals, and were not cullled closely. This sale is said to justify the opinion of the value of breeding "course" sheep for the mutton market.

NEW ELECTRIC LINE. All Poles Set and Wires Strung by Middle of October. J. S. W. Bancroft, inspector and overseer of the construction of the pole line for the electric light and power company, says that the pole line will be completed within a month—completion meaning that all poles will be set and all wires strung. Especially rapid progress will be made in the mountainous region, as the most difficult portions of the work will be covered by that time, the canyons being passed and the open country in the valley being laid out.

Breakfast Food Wheat. Fifty Thousand Bushels Sold to J. J. Keller, of Chicago. Fifty thousand bushels of choice bluestem wheat was purchased in this city yesterday afternoon by J. J. Keller, representing the American Cereal Company, of Chicago, through E. W. McComas, the local wheat buyer. Mr. Keller left this morning for Walla Walla. He intends to return to this city before proceeding East. The price paid for the wheat is not known, "better than 70 cents," says the way Mr. Keller mentions the transaction. The wheat purchased by Mr. Keller is used in the manufacture of breakfast cereals, especially the choicest cereals are purchased.

ECHO MEETS A SUCCESS. Estimated That 500 Tons Are Now Ready for the Factory. The sugar beets raised near Echo are now ready to go to the sugar factory at La Grande and next week the work of transporting them to Echo will begin, says the Echo News. A conservative estimate places the crop at 500 tons and probably the contract of hauling them will be awarded the Newport Land & Construction Co.

The best experiment here is pronounced an unqualified success and it is said that it can be so carried over next year 500 acres will be planted to beets by the Amalgamated Sugar Co., which company owns the La Grande factory.

HARVESTING IN MORROW. W. C. McFarland, a Prominent Contractor, Returns From a Business Trip to Iowa. W. C. McFarland, a well known contractor of this city, has just returned from a visit to Morrow and Gilliam counties, and reports harvest about over in those counties, and that much of the grain is very light, especially in Morrow county, some of it not yielding more than 12 to 15 bushels per acre.

Two Hundred Head of Bees. purchased of James Johnson, of Dale, by J. C. Loxeran, for Fry-Bruhn, are expected to arrive today or tomorrow for shipment over the W. & C. R.

THE ATTRACTIVE GIRL. Much has been written about the "American girl" and her reasons for being prominently the most attractive girl in the world, in attracting the eyes of mothers can be too careful to let their daughters develop all their natural charms to the utmost. The crucial epoch of a woman's life is the change from maidenhood to womanhood. It involves the whole body and mind and itself in the nervous system.

Nervous system women are afforded the opportunity of a lifetime for the makers of Dr. Pierce's Favorite Prescription cannot be cured. Backed up by over a third of a century of successful and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained by the proprietors of Dr. Pierce's Favorite Prescription nor full warranted in any other preparation.

As a tonic for women who are nervous, sleepless, worn-out and run-down, "Favorite Prescription" is unequalled. For constipation, the true, scientific cure is Dr. Pierce's Pleasant Pellets. Mild, harmless, yet sure. No other pill can compare with them.
