World

The American farmer is the greatest may

The American farmer is the greatest man in the world to-day because he is master of the soil-he is gaining in intelligence quite as rapidly as his products are increasing in magnitude. Our recent combines of capital in United States measured in money are enormous, yet such figures sink into insig-nificance when compared to the money nificance when compared to the money, brain and brawn invested in agricultural industries. For instance, the farmers of Minnesota and Dakota have received \$200. ved \$300, Minnesota and Dakota have received \$300,-000,000 for their products in a single year. The farmer knows what Nature will bring forth for him from his experience in the past. He knows if certain seeds are planted and properly cared for that Nature will take care of the rest. In the same

way you are master of your own destiny.
