It may further be stated that the sales of 183,38 compared with those of 182,860 w a relatively
larger increase, beyond the sales of other makers, than of any other year.
For instance, in 1872 we sold 45,000 more than any other company, whereas, in 1873, the sales

113,254 Machines in Excess of our Highest Competitor. These figures are all the more remarkable, for the reason that the sales of the principal companies in 1873 are LESS THAN THEIR SALES IN 1872, whereas, as has been shown, OUR SALES HAVE LARGELY INCREASED.

The account of sales is from SWORN RETURNS made to the owners of the Sewing Machine patents.

Tumor of 12 Years' Growth Cured by Radway's Resolvent.

Beverily, Mass., July 18, 1869.

Dr. Radway: I have had Ovarian Tumor in the ovaries and bowels. All the doctors said "there was no help for it." I tried every thing that was recommended; but nothing helped me. I saw your Resolvent, and thought I would try it, but had no faith in it, because I had suffered for twelve years. I took six bottles of the Resolvent, and one box of Radway's Pills, and two bottles of your Ready Relief; and there is not a sign of tumor to be seen or felt, and I feel better, smarter, and happier than I have for 12 years. The worst tomor was in the left side of the bowels, over the groin. I write this to you for the benefit of others. You may publish it if you choose.

JAPANESE PEAS! TWO HUNDRED BUSHELS TO THE ACRE.

THESE PEAS have recently been brought to this country from Jupan, and prove to be the fluest Pea known for table use or for stock. They grow in the form of a bush, from 3 to 5 feet high, and do not require sticking. They yield from one Quart to a Gallon per bush. A sampla package, that will produce from 5 to 10 hushels of peas, with circular giving terms to Agents, and full directions as to time and manner of planting, will be sent postpaid to any one desiring to act as Agent, on receipt of 60 cts. Address L. L. OSMENT, Cleveland, Tenn.

We have cultivated the Japanese Pea the past season, on a small scale, and we are convinced they are a perfect success. Their yield was enormous. For the Table or for Stock they are unsurpassed by any other pea. They grow well on thin land and are bound to be a No. 1 feetilities.

I have cultivated the Japanese Pea the past year, and raised them at the rate of 200 bushels to the acre. The bloom exceeds buck wheat for bees. F. E. HARDWICK, J. P., Bradley Co.
