This paper is an eight page sheet, is published monthly in San Francisco at \$1.00 per annum; it is devoted to the interests of women, and deserves additional support. Regarding the aims and object of the journal, the editor says:

We do not expect to revolutionize public sentiment at a stroke, or overturn the political bulwarks of a nation with our feeble pens; we only hope that little by little, by showing the people the needs of our own sex, as we see them, we may awaken the interest of intelligent men and women to the subjects of many needed reforms in the social, intellectual, political, and industrial rights of women. The Dawn is not revolutionary, but reformatory. It does not aspire to overthrow, but to build up; to educate, not eradicate.
