Walker's VITAMIN BITTERS, composed entirely of wholesome botanical extracts and juices, are everywhere superseding the astringents which no man of woman ever took without bitterly repelling their use. These are non-toxic, acute or chronic, in which the new tonic may not be administered with beneficial effect.

THE AMERICAN NEWSPAPER DIRECTORY is the epitome of newspaper history. It is also regarded as an official register of constitutions. This feature requires the closest scrutiny to prevent it from leading to abuses. The plan adopted by the publishers of the DIRECTORY to secure correct and trustworthy reports is rigid in its requirements, and is adhered to with impartiality. Successful publishers, who have something to gain by a competitor, are generally prompt, not only to send reports in conformity, but give Messrs. Geo. P. Rowell & Co. such information as enables them to weed out unsubstantiated statements of pretenders to journalism. The popularity of the book, and the general confidence in its accuracy and good faith, are attested by the immense body of advertisements it receives. 4 28
