NATURAL LEADERS.

It is said that women should be assigned to subordinate positions in life, because they are not natural leaders; and further, that without a reversal of progress in all of the learned professions of the laws of nature, women can never be a leading force in the government. Now, in the first place, when we reflect that very few men are natural leaders, the masses always being led by the few; and further, that women have not only always shown the ability to govern, but in numerous instances have governed nations successfully and brilliantly, we doubt this doctrine of ability to govern or lead being based on sex. Women there have been in every civilized natory, who have participated in politics, covertly if their influence could not be limits, irrespective of sex, birth-place, brought to bear otherwise.
