Too Prosperous.

CHICAGO, Nov. 14 .- A special from Omaha says:

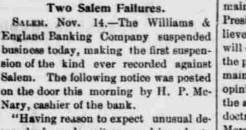

The growth of the beet-sugar industry in this state has attracted the attention of the sugar trust, which has already taken steps to prevent the sale of Nebraska sugar. Jobbers and dealers have been notified that it they sell the refined product of Nebraska factories the trust will decline to sell them the cheaper grades, which are not manufactured by the Oxnards. The result of this inhibition is that over \$100,000 worth of Nebraska-made sugar is stored in warehouses in Omaha. The matter has been laid before the Manufacturers' & Consumer' Association. and efforts will be made to get western jobbers to agree to handle the Nebraska product regardless of consequences. There is a strong home patronage sentiment in the state which will favor the Nebraska sugar-makers. It is estimated that the year's output in the Grand Island and Norfolk sugar factories will reach, if not exceed, a value of \$800,000, or nearly one-third of the total amount consumed in the state.

Must Act Quickly,

CHICAGO, Nov. 14 .- The Associated Press today received the following from Dr. M. M. Manga, the Syrian leader of the Society of Ethical Culture, in this city, and one of the most eminent Armenians in the United States :

"Very recent massacres of Armenians, reported from Trebizcad, Erzeroum, Mooeb and Diarbekir, fully confirm the words spoken by the Turkish commissioner-general to the World's Columbian Exposition, Hakki Bey, "If we (Turks) cannot have the country, we shall see that you (Armenians) don't get it."

There is very little doubt that the Turks believe their days are numbered. and are, therefore, determined to exterminate the Armenians before they themselves have been finally and forever driven out of the civilized world. If Europe is to act at all, it must act at once, for soon it will be to late to undertake the selvation of Armenia, as there will be no Armenia to saye."

The Monroe Doctrine,

LONDON, Nov. 15 .- The Chronicle this (Friday) morning, publishes an interview with the Hon. Henry Cabot Lodge, of Massachusetts, in which he expresses views upon the subject of the Monroe doctrine. After going into the history of the doctrine, in detail, Mr. Lodge said : "Nobody in America ever pretended that the Monroe doetrine is a proposition of international law. It is a declaration of policy, and one which the people in America have always sustained, and, in my opinion, slways will sustain, as of vital importance to the people of the United States. Its bearing upon the

position of the United States in the matter of the Venezuelan dispute is very simple. Each country is entitled to what its predecessors had, and no more, for no new rights have been acquired in the interval by either people. The question is, What was the true boundary between the Dutch and Spanish possessions?

"To refuse arbitration and to seize and hold by force disputed territory would open the doors, if England pursued such a course, to any other European power that desired to acquire additional territory in Central America and South America. It would fatally infringe on the Monroe doctrine. The people of the

United States cannot regard it otherwise than as a movement hostile to them.
