DECEMBER 12, 1895.

THE CONFLICT IS COMING.

The political pot begins to simmer, and e'er long it will be effervescing mightily, sending to the surface foaming aspirants for office. The names of many good men are being whispered around among the wire pullers. The democrats are playing their game of whist as of old. Like the snail they extend a horn in one direction and if it meets an obstacle draw it in again. The leaders have been thus feeling their way and find the least opposition amongst themselves in the name of J. W. Hamilton for state senator. They realize that their chances are slim, and as James has been favored when a show of democratic success was better, and as he has a longer purse, he can have the place of

But for those places of profit, the shrievalty and clerkship, the shrewd and nealous workers must be provided for. Finas Dillard, Clay Long and George Onine enter the list for sheriff. Brockway having been appointed by and served as bailiff under a republican judge, is regarded as a rather shaky lemocrat, so his name is Dennis.

Crede Chenoweth of Oukland is formidable candidate for clerk, but as Clay Long and possibly Pet Beckley from that burg will be candidates for sheriff before the convention, his chances are shim, unless the candidates. Quine and Dillard and their friends, can have the order of business in the convention and name the clerk before the sheriff. oppose that movement. Do you doubt that hundreds of such cases reported to us as cured by "Golden Medical Discovery" were genuine cases of that dread and fatal disease? You need not take our word for it. They have, in nearly every instance, been so pronounced by the best and most experienced home physicians, who have no interest whatever in misrepresenting them, and who were often strongly prejudiced and advised against a trial of "Golden Medical Discovery," out who have been forced to confess tha it surpasses, in curative power over this fatal malady, all other medicines with which they are acquainted. Nasty cod-liver oil and its filthy "emulsions" and mixtures, had been tried in nearly all these cases and had either utterly failed to benefit, or had only seemed to benefit a little for a short time.
