Shoes have advanced in price but not with us. We sell you a good grain shoe for \$1.25 and upwards, fine shoes in proportion. If you doubt us, come and see us, convince yourself that we have what we advertise. We don't care to do all the business in town, but want to get a share of it. A GRAND RALLY AT EUGENE.

Demonstration by Ten Thousand Enthusiastic Republicans.

EUGENE, Or., Sept. 26.—By far the greatest political demonstration ever seen in this county, and probably the greatest ever seen in the state, outside of Portland, was witnessed in this city today. The grand rally was timed for today because Senator Mitchell, Congressman Hermann and Senator Brownell, of Clackamas, were scheduled for a joint meeting here. People were here from all parts of the country, and began to arrive last evening. Every road leading to the city was lined this morning, and the crowd, according to most estimates, must have been 10,000 strong. Not since July 4, 1891, if ever, have there been so many people on our streets, and the day has been much like a grand Fourth of July celebration in a large city.

At 10 o'clock this morning delegates from the various clubs in the county met at the courthouse and organized a county league of clubs, with officers as follows: Dr. W. Kuykendall, president; A. Yerington, first vice-president; H. N. Cokerline, secretary; S. H. Friendly, treasurer; the presidents of each of the clubs, vice-presidents and executive committeemen. Hon. G. H. Brownell was present and delivered a short and spirited address.

Upon the arrival of the train, the two speakers were met by the Union Veterans' Patriotic League and escorted to the hotel, hundreds extending to them a cordial greeting. At 1 o'clock a very large national flag was raised on a staff expressly erected in the public square, with appropriate ceremonies. The afternoon speaking was delayed until the arrival of the south-bound train, which brought a large and enthusiastic delegation from Junction City.

The speaking was in the open air, on the grounds adjoining the courthouse, and the crowd was so great that hundreds could not get within good hearing distance of the speakers.

Senator Mitchell talked for nearly two hours with telling effect upon the audience. The great questions of the campaign were handled in a very persuasive and reasonable manner, and received enthusiastic approval.

At 5 o'clock a grand barbecue occurred, and an attempt was made to feed the vast throng. There were so many thousands more than were expected, however, that the committee found it had not made great enough preparations. Four fine heaves, six muttons and four fat hogs were carved and disposed of in a twinkling.

In the evening a grand illuminated parade preceded the address. The parade formed in three divisions, each division headed by a band, and marched through the streets. A feature of the parade was a division of mounted men, several hundred strong, composed of horsemen who had come in from the country. The ladies' clubs from Eugene and Junction also participated in the parade. There was plenty of enthusiasm in the column and along the streets, which were packed with spectators for many blocks. Fireworks and red fire were burned all along the line.

Congressman Hermann was the speaker of the evening, and had an audience probably as large as that in the afternoon. There was no use, trying to have the meeting indoors, for there were not halls enough in town to hold half the crowd. Mr. Hermann delivered a strong logical and very convincing address, and it was heartily received.

The success of the rally far exceeds all expectations, and eclipses everything in times past. The voters are fully awake to the issues of the campaign, and they go home determined "to keep up the enthusiasm until the ballots are counted in November."

Why He Stopped His Paper.

"Just stop my paper," continued Whoop Tomlinson, a prominent citizen of Oklahoma, entering the sanctum of the Hawville Clarion. "I don't want it any more."

"Why, what is the matter, Whoop?" inquired the able editor. "What fault have you to find with the paper?"

"It ain't the kind of a sheet that's safe for a fellow to permit to come into the bosom of his family—that's what's the matter with it! In the last issue there was two or three items about the new woman, an' 'sch foolishness. My wife was reading the paper when I came in yesterday, an' when I keersly called her a cussed fool or a little stuntin' that-a-way, for some reason or other, I forgot what now, she jerked out a revolver an' blamed if I don't believe she'd have shot me like a dog if I hadn't knocked her down with a chair. That's the kind of a paper it is—sp'iled as good a wife as a man ever had—an' I don't it any more."

Straws.

On the morning local one day last week there were 33 passengers. A poll was taken and all voted except one, the result being 2 for free silver and Bryan and 28 for McKinley and protection.

On Tuesday a vote was taken on the Estes excursion train between Medford and Riddle, resulting 83 for McKinley and 44 for Bryan.

W. S. DUNNIWAY'S SPEECH.

W. S. Duniway of Portland spoke to a Roseburg audience last Tuesday night under the auspices of the Douglas County Republican Club. He was greeted by a fair sized audience. Mr. Duniway is a very interesting speaker and introduced a new feature in his campaign work, viz: Displaying a map of the world as an object lesson to substantiate his logic on many points in his speech, especially the tariff, the market price of wheat, the carrying trade and transcontinental freight and passenger rates, all of which were elucidated by reference to the map. Mr. Duniway referred to the fact that four years ago the chief issue was protective tariff and free trade. On that issue democracy won. But now while the republican party renews the fight on protection the democrats evade it and press to the front an issue unknown to the party in its past history, viz: Free and unlimited coinage of silver. The party is aware that it cannot go before the people on a tariff issue and hence it is ignored—relegated to the past.

While the Bryan wing of democracy is making its fight on the silver question it is known that Mr. Bryan is an ultra free trader, as shown by his speeches in congress and elsewhere. The speaker showed with unanswerable logic the prosperous condition of the country under the protective policy of the republican party and the depression and ruin to business under the democratic policy of free trade and tariff for revenue only. He also addressed himself to the silver question—gave a brief history of the crime of '73 and the "surprissions dropping out" the dollar of our daddies in 1873.

Royal Baking Powder

ABSOLUTELY PURE

DON'T TUB TOO MUCH.

Professor Checkly Advances the Idea That It Is Injurious.

"Bathing and the use of soap," says Professor Checkly, "is 40 per cent more injurious to the human race than any other form of stimulation to which people are addicted. If I should bathe a man in proportion as much as he drank, I'd kill him in one-half the time. This is called the age of hurry and feverish excitement; critics complain that people are unwilling to take time for anything. As a matter of fact, hours of precious time are worse than wasted daily in the bathroom. If men would preserve their health, there are three things they must do—first, leave soap alone; second, get the skin loose from the tissues of the body; third, get rid of the idea that regularity in the matter of sleep and meals is necessary to physical well being."

"What are the objections to the use of soap?" asked a reporter to whom the professor's original views were a revelation.

"There are vital objections," was the reply. "The skin, it is acknowledged, bears a most important relation to the body. First, it acts as a protective agent, covering the sensitive tissues of the flesh. Second, it acts as the agent of the mind, conveying all sensations of heat, cold, friction and the like. Third, it directly acts all the other organs of the body, taking up the work of each in turn when for any reason they become unable to perform their functions. The skin assists all the organs of secretion and excretion in the entire system, and for that reason great attention should be paid to keeping it in a healthy condition. Although realizing its important functions, people, instead of protecting this wonderful covering of theirs, try by every means in their power to destroy it. Soap does not cleanse the skin. When the skin is dirty, it is unhealthy, and the organs within the body can never be cleansed by all
