Electric Bitters is a medicine suited for any season, but perhaps more generally needed, when the languid, exhausted feeling prevails, when the liver is torpid and sluggish and the use of a tonic and alterative is felt. Have you tried the lung tester? It is an innocent looking thing, a "little pill" bottle inside of a flat whisky bottle, the latter filled with water, a rubber tube attached to the cork, and you are politely invited to try your lungs by blowing into the tube and causing the little bottle to sink to the bottom. It looks easy enough and the initiated can accomplish it with ease. If you try and don't succeed, hold the bottle firmly in one hand and reach for a club with the other.

The Oak Creek school district, No. 11, has been divided and a new district, No. 118, created. A portion of the new district was taken from No. 12, but the greater part of its territory was carved from No. 11. W. L. Singleton, J. K. Mitchell and J. T. Agee are directors of the new district with J. W. Burge, clerk. W. E. Thornton, R. A. Cox and J. W. Price are directors of No. 11, and J. J. Thornton, clerk. Each board has appointed an arbitrator, who with the county superintendent will assess the damage sustained by the old district.

According to rumors prevalent on the streets this morning, Roseburg came near having a lynching last night, and a wicked looking rope with a hangman's knot therein swung over a limb of one of the trees in the court yard, gave color to the reports. Quite a number of people were in from Myrtle Creek and the proposed act was attributed to them. Hoyt, the man who assaulted Agent Hoopengartner last January, being the object of their wrath. It was probably a bluff, however, or perhaps a practical joke. People in attendance on circuit court as witnesses or otherwise, must put in their spare time at something.

A little delay was caused in the progress of the northbound freight at Green's station yesterday forenoon. The train men were taking on a loaded car from the side track and on returning to the main line the flange of one of the cars struck the point of the frog on the wrong side and the trucks were turned square across the track. Proceedings stopped. The crew cut off the cars in front of the one derailed and with these and the engine came to town. A wrecking train, in charge of Foreman Wild of the round house, with the section crew, repaired to the scene and shortly after noon the track was cleared and everything went merrily on. The derailed car was loaded with cerealine, used in the manufacture of beer, consigned to the Gambirino Brewing Co. of Portland, and marked "rush." Nobody hurt.

J. M. Stevenson, formerly foreman of the Victory Placer Mining Company of Illinois, operating on Cow Creek, now one of the incorporators of the Victory Placer Mining Company of Oregon, returned on Thursday from San Francisco. He stopped off at the mine to take a look at the property secured by the new company which includes the Teller ground. He went on to Portland Saturday night and will go from there East to join Col. W. H. Taylor, who has preceded him. It is expected soon to have things in shape to put a number of men to work washing out the precious metal. There are only two men at work at present, but Stevenson says that it is twice as many as are at work for the old company and that they have twice as much water to work with. There was a little snow at Glendale and considerable in the mountains.

A Dilemma.

The directors of school district No. 51, at Youcalla, seem to have gotten themselves into a sort of dilemma. It seems that at the close of school in November last, Miss Cellers, who, if we are correctly informed, had been the teacher, in the course of an informal talk with the directors was told that she could again have the school when it opened and to hold herself in readiness at the proper time to take charge. Subsequently, one of the directors moved out of the district and at the election on the 1st inst., two directors were chosen, changing the personnel of the board. At the annual meeting one of the directors was, it is claimed, authorized by the others to select a teacher. He selected Manley M. Strawn. Subsequently, the others entered into a contract with Miss Cellers, and the two claim the place. The matter has been referred to Superintendent Waite, who has written for a copy of the records bearing on the question and will then advise the officers of the district in accordance with the facts as they appear of record and the law.

For Bohemia.

Almost every day brings men here, says the Cottage Grove Leader, who put up at our hotels, and are waiting for the snow to leave the mountains, so they can get into the Bohemia district to do prospect work, although it will be full two months and probably longer before any work can be done in that line. The snow is now four feet deep on the level. The wagon road, which has been blocked for some time near the Ridge hotel, was opened up last week and will be kept open all winter. Old miners, who are familiar with the district, say every indication points towards the snow leaving early this spring; thus enabling them to get in a good summer at prospecting.

Churchill, Woolley & McKenzie have made a sample which is on exhibition at their hardware store on the corner of Oak and Jackson streets. This firm is also authorized to take orders for and manufacture the trap.
