FRUIT AND FOREST TREES.
Secretary Minto's Report to the
Board of Horticulture.
At the quarterly session of the state
board of horticulture, held in Portland
last week, John Minto, secretary of the
board, made his quarterly report, and
incidentally paid his respects to forestry
and the forest reserves created by Presi-
dent Cleveland. He said:
"There will be some loss of trees this
season from injuries inflicted by the ex-
traordinary cold weather of March and
November, of 1896, upon trees standing
on undrained lands, and those under ex-
cessive cultivation, which rendered them
tender and unripe. The lessons taught by
the results of the season be-
lieve that no care can maintain a healthy
orchard on ill-drained lands, and that
too much cultivation should be made al-
most as destructive as too little. The
general prospect is favorable to an
abundant crop and a steady advance in
discriminating care of orchards.
I have made myself, as your secre-
tary a member of the National Forestry
association, as a means of becoming in-
formed of the action of that body and
what measures it proposes to adopt to
effect legislation on the subject of sylvia
culture and forest reservation. So far
as I have learned from the recom-
mendations and the reasons given to sus-
tain them, it seems to me that so far as it is
opposed to individual ownership of forest
land, as a support of independent family
life, and favors the placing of forest re-
serves, within states, above or beyond
the domain of the state laws, it opposes
self-government and local control of
property rights, and stops the spread of
industries of the people, by the people
and for the people, and substitutes
under a governmental form—a new to our
past policy as to the land and its re-
sources—territory within states already ag-
gregating as much as the great state of
Illinois, while the constitution of the
United States limits the district which
may be exclusively governed by con-
gress to not more than 10,000 square
miles. I believe the American people will find
a better use for its soldiers than to make
them forest guards against the people of
the states in which these reserves are
laid and the people will cultivate forest
interests, as they now cultivate fruit
growing, when wood production is
necessary.
"To my mind, to give deeds of forest
lands as family holdings, in ample size,
when on mountain elevations, for family
support, under conditions limiting the
area to be deforested in any one year,
and specify the method of cutting off so
as to prevent denudation, would be a
better means of maintaining our forest
interests than granting these districts
with soldiers, whose very presence there
implies distrust of the people. The for-
ests interests is a local interest, very im-
portant to Oregon, and every citizen of
the state ought to do all he can to pre-
serve and enhance its value.
Secretary Minto was instructed by the
board to write out, as fully as possible,
his observations of Oregon's interests in
the forestry reservations for transmittal to
the state's delegation to congress.
The board is anxious for an act of con-
gress changing or rescinding the order of
President Cleveland creating the forest
reserves, as it is believed the people
of Oregon will take care of their timber
and not waste it."

Turks Are Good Fighters.
Colonel Francis Green, U. S. A., re-
tired, who was sent by this government
to Europe during the last Turkish war to
represent the war department at Wash-
ington told his observations of the
Turkish army, while in battle.
"The Turks are individually good
fighters," said Colonel Green. "They
are fine soldiers, very obedient, fanatical
in their religion and fatalistic. They
fight up to a certain point, and when he
thinks matters are going against him he
will run. Not for any lack of courage,
but because he thinks fate is against him."
"The Turkish soldiers are well armed.
During the Russo-Turkish war the Turks
were better armed than the Russians.
They are well clothed, but the com-
missary and transportation departments are
fatally defective. In numbers the peace
footing is 125,000 Greeks and 150,000
Turks, and these can probably be in-
creased to three times as many on each
side. In 1877 the Turks put over 300-
000 men in the field in Europe and over
100,000 in Asia, and they made a very
much stronger resistance than the Rus-
sians anticipated. I think Russia put
nearly 1,000,000 men in the field before
the war was over.
"Turkey is bankrupt, but so she was
in 1877 and that won't stop her from
fighting. They will probably manage to
borrow enough money to buy guns and
ammunition, and they will get food
out of their own country. The Turks 20
years ago fought an entirely defensive
campaign. There is no reason why they
should not do so now. Their aim was
to seize some important point and throw
up fortifications which they constructed
with remarkable skill, and then wait to
be attacked behind their breastworks.
They collected a large amount of ammu-
nition and provisions in these forts and
waited until the Russian troops were
within range. Sometimes their posi-
tions were turned. They were com-
pelled to retreat and then they would
abandon all their ammunition and stores
and fall back on another line of fortifica-
tions 20 or 30 miles in the rear.
Colonel Green was asked his opinion
as to the relative strength of the armies
of Greece and Turkey.
"There is no question," he said, "that
the Turks are more than a match for the
Greeks, but the whole question is what
kind of a power will take. They are
all seriously anxious to keep peace,
because if the war is once started among
the great powers it is impossible to tell
when it will end."

Elkton.
Seeding is almost completed for this
season in this locality.
Miss Ethel Butler, who has been quite
ill for the past week is improving.
Ed and James Haines met with the
good luck to kill a coyote one day last
week.
Grandma Butler of Long Prairie is
visiting at the residence of her son, Mr.
James Butler, of this place.
Our Sunday School is improving and
is fast becoming one of the best ever
conducted in our little village.
Mr. Cole, the carrier on the Oakland
and Elkton mail line, moved his family
here the first of the week, and will occu-
py the residence of John A. Smith, who
has moved to Brush creek.
Rev. Wolfe of Drain preached here
last Sunday morning and afternoon, to a
fair sized and attentive audience.
Brother Wolfe is a logical reasoner, and
the people here are pleased to listen to
him.
Mrs. Round of Gardiner is to speak at
the church in Elkton next Sunday morn-
ing and evening, and as she is reported
as a very fluent speaker it is to be hoped
that she may be favored with a large
audience.
Men are a very strange class of beings.
A few days since almost everybody was
wishing for dry weather, and now
"we've got it bad" and the cry goes
up for rain; just a good, warm, wet
shower to moisten the crops. But such
is life.
There were three persons attend-
ed church here last Sunday whose ag-
gregate age was 239 years. Two, Godfrey
Rapp and Aaron Benedict, being each
79 years old, and Grandmother Smith
being 81 years old. All of them bid fair
to see the end of the present century.
Some of the boys here are trying to or-
ganize a company of state militia, quite
a number of names having already been
enrolled. If they should succeed in af-
fecting an organization it will be a source
of amusement for the boys and might
prove a benefit to the community. In
case of a foreign invasion the boys might
conclude that it was not very funny to
work soldier.
SCRIBE.

Calapooia.
Roy Stearns of Oakland was the guest
of C. A. McNabb Sunday.
Jas. Enley of Lower Calapooia, at-
tended church here Sunday.
Daily Brock of Strawberry hollow at-
tended church here last Sunday.
Mr. Gilkerson of Roseburg was over
Sunday smiling on some of our widows.
Miss Kate Farenworth was visiting
her sister, Mrs. G. W. Stephens, Sunday.
H. L. seems to be down hearted now-
days. I would say to you, H., brace up.
Rev. Wallace preached an interesting
sermon to a large congregation last Sab-
bath.
Our supervisor, C. A. McNabb, is do-
ing some substantial work in the Dodge
canyon, which was badly needed.
Miss Nettie Davis, who has been vis-
iting friends near Eugene, has returned
home, and causes one of our young boys
to wear a smile.

of amusement for the boys and might
prove a benefit to the community. In
case of a foreign invasion the boys might
conclude that it was not very funny to
work soldier.

Paper Underclothing.
The Japanese are now making un-
derclothing of their finely crimped or grained
paper.
After the paper has been cut to a pat-
tern the different parts are sewed to-
gether and hemmed, and the places
where the buttonholes are to be formed
are strengthened with calico or linen.
The stuff is very strong, and at the same
time very flexible. After a garment has
been worn a few hours it will interfere
with the transpiration of the body no
more than do garments made of fabric.
The stuff is not sized, nor is it im-
measurable. After becoming wet the paper
is difficult to tear. When an endeavor
is made to tear it by hand it presents al-
most as much resistance as the thin
skin used for making gloves.

are officials in the United States who
must envy Kruger his power.**

The pursuit of
money tempts many
a man to neglect his
health, with the result
that he soon loses both
money and health, and
finds himself doomed
to an untimely death.
A man should remember
when he is tempted to over-
work himself, neglect his
rest, and sleeping, that death is the
tempter that holds out money as a bait. If
a man will take proper care of his health, he
will feel like work, and will find that he can
do more work than he cares to do within
working hours.
Dr. Pierce's Golden Medical Discovery
gets a man into working shape and keeps
him there. It invigorates the liver, keeps
the digestion in working order, the appet-
ite hearty and keen. It keeps the blood
pure and plentiful. It keeps out and drives
off impurities and disease germs. It wards
off nervous and wasting diseases. It cures
92 per cent. of all cases of consumption. It
