Rev. Father Newell has accomplished much for the Catholic Church during his lectures here. The reverend gentleman is a fluent and entertaining speaker. Don't fail to come and hear the popular lecturer, Miss Kate DePatt, of Silverton, Friday evening at the Opera House. Subject, "Common Sense." Free to all.

Jim Frater came in Tuesday evening on the freight and struck out for home carrying a side of venison and a nice pair of buck horns, trophies of the chase. He had been on a hunt on Union creek. He only required 15 shots to get one deer.

Patronize people who buy what they can at home. The most thrifty communities are those that produce as much as possible of what they consume. Even if you should pay a little more you are better off in the long run by benefits that accrue from the success of your neighbors. The congregation of the Methodist Church here is much pleased with the return of Rev. Frank L. Moore to this charge for another year. It takes a little time to get acquainted with a community and he was just acquiring that qualification. Next year he will be able to accomplish more.

Corvallis is much tickled over the fact that it now has two daily papers. Daily was between that city and Albany, over the O. C. & E. The trains to and from the front start from and return to Corvallis, while the trains to and from the bay will continue to run to Albany. But Corvallis is still shut off on Sundays. A Douglas county farmer sent a new load out in the pasture to look for the goats. He returned unable to find the animals. "Did you look in the trees?" asked the farmer. Well, the hand hadn't thought of that, but went back and found the goats "roosting" in the branches of a fir tree that had leaned over.

This great Rogue river valley of ours is surely the natural abiding place for the sugar beet. Just read this "Beets grown by J. A. Anderson, living near Medford, and analyzed by Mr. Spreckels' chemist show 16.3 per cent sugar and 93 per cent purity. Note this: The same chemist says 14 per cent and 80 per cent is a good beet."—Medford Mail. Rev. Father Newell closed his week's mission at the Catholic Church on Tuesday evening, his subject being "Infidelity." He was well received, and, as usual, argued well, and no doubt made perfections clear to the minds of believers many things that had hitherto been shrouded in doubt and mystery. Father Newell will deliver his farewell sermon Sunday morning.

A miner was at Medford on Tuesday night exhibiting about half a dozen gold nuggets that he picked up on his claim on Powell creek in Josephine county, 35 miles west of Medford. They ranged in value from \$10 to \$70 each. If these nuggets were from Klondike the community would go over the top, but being just from Oregon they attract little attention. "Fields look green a long way off." The hop product of Yamhill county this year is estimated by persons in the best possible position to know, will be over 100 bales. At present quotations they are worth in round numbers \$100,000. This is quite an item, but its significance does not appear until it is understood that it is the product of less than 6000 acres of ground. Not more than a fifth of the available hop land is being used for hop growing, and the product might be almost indefinitely increased if there were no drawbacks to the business.—Reporter.

J. C. Porter of Bohemia, has been in Eugene several days looking for men to work in the mines. He says the Klondike craze has attracted miners to his district, but he is unable to get the necessary help to carry on operations at home. A large amount of tunneling in the Bohemia mines is in need of retimbering, and Mr. Porter wants to engage eight or ten men for that work. He says work is being pushed right along in the Bohemia district. Snow has already fallen there, and they are anxious to get their work as far along as possible before the snow makes it necessary to shut down.

There was a wedding in town the other evening. Persons who have been accustomed to associate with the high contracting parties got up a little supper. After that, remembering the days when they were young, they concluded that a little charity would be a fitting finale to the festivities. Accordingly they armed themselves with all the available tin pans and oil cans and assembled with merry din at the residence of the newly wedded pair. But it is said their reception was anything but cordial. The bride appeared at the door and the revelers were treated to a tongue lashing they will not soon forget.

The Medford fair is now in full blast. The attendance is larger than was expected, and a successful fair is predicted. A good 12-gauge breech-loader shotgun for sale, or will exchange for grain or road cart. At D. Jackson's gun shop.

Don't forget the fair. It begins October 12th. Everybody turn out and help to make it a grand success. You can do it if you will. Mrs. Wick Hoff arrived in Eugene from San Francisco on the afternoon local, joining her husband and daughter for a visit here.—Guard.

In the case of J. A. Scraggs and J. E. Newbanks, held for the murder of R. L. Jones in Jackson county in last June, the grand jury at Jacksonville found not a true bill. A man by the name of Albert Kahlin committed suicide in Portland last week, because he supposed a daughter had gone wrong. He left a wife and five children to buffet with the world alone.

W. B. Lawler came down from the mines this morning. Some rich ore has been struck recently and the outlook is excellent for some paying work. More men will be employed to push things.—Albany Democrat. Judge Hanna on Monday in the case of the O. C. & S. P. R. K. vs. Jackson county overruled the motion of the county to dissolve the injunction. The case will now commence and referees appointed to take evidence.

Railroad passenger agents are usually a pretty jolly crowd, and those in town Tuesday were no exception to the rule. A party of eight living out at the Mountain house, twenty miles from Roseburg, wanted to go East, so all the overland roads had their agents in town to secure the party. It was a clear case of the lowest rates and the best talker taking the cheese, so the boys put up a job on Terry, the shortest stout, and sent him out to where the parties lived, telling him that the representative of the party was in town all the time. When Terry got back in the evening he had blood in his eye. He went right after business and before ten o'clock he had secured the whole party. The boys say that Terry cut the rates, and that they will play smash with him in Portland. But he got there just the same.

The county has taken the fair grounds off the hands of the fair association—in fact, it has purchased it, subject to redemption in five years, and for the present the association is out of its money. If the fair is successful this year, and the outlook is better now than ever before—barring rain, the association will have a show to redeem the land and come out on top—free from debt, with a valuable piece of property in their possession; but if the fair is a failure, the Junior Plevins, and the weather bureau combine against the fair, as in the past, its name is "mud."

Major Stephen Marshall and Capt. Sheridan will visit the local corps of the Salvation Army, on Tuesday evening, Sept. 28. The major will swear in some new members and commission some local officers. An admission of 10 cents will be charged to defray expenses. After the sacramental coffee and cake will be served free. All are invited to attend.

The other day a hobnob struck the town and he was sent out to the hop fields by Marshall Stiles to work. He became sick and returned to town. He was threatened with typhoid fever and as he had had an uncle in Roseburg he was sent there.—Eugene Journal.

Figs From Curry County.

Captain S. T. Malborn, a well-known resident of Langlois, Curry county, says the Portland Telegram, has taken a deep interest in the possibilities for cultivating the fig in some sections of Oregon. He has sent a small box of some splendid specimens of this fruit to the Forecast Official Page, of the United States weather bureau, who has a few left on exhibit at his office. Captain Malborn writes Mr. Fague that he thinks from his trials that figs can be profitably grown in that section.

Curry county has a rainfall of 100 inches, and has a climate that is suited to the extensive cultivation of the fig, as it is none like some of the interior valleys of California where the tropical fruit is grown. It is neither cold nor very warm during the season, and it is probable that the fig would flourish here. The specimens of Captain Malborn's figs, as fine as ever sent from California.

The Bohemia Road. Now that the Oakland-Bohemia road is rapidly nearing completion the Cottage Grove Messenger site upon his hind legs and howls pitiously, and urges the county court of Lane county to build a good wagon road to the mines, and in appeal says "if the roads are not improved, and a good road is completed from Oakland, both travel and traffic will seek the better outlet." A good road from Oakland, is just what we are building, and its completion is near at hand, when traffic and travel will come this way for the reason that Oakland is now and will always be the natural gateway to Bohemia. Our sign is still up, brother, and letters emblazoned in gold shall appear there on guiding the world to the great Douglas county mines by way of Oakland, which, ever awake to her interests, will guard well her gates that the Lane for carry not away the Douglas poultry.—Gazette.

In the County Court. After October 1st, one per cent additional cost will be added to taxes not paid by October 15th. All will be published of all delinquent tax payers, and on November 1st, the sheriff will make levy on property. Two hundred and fifty dollars was appropriated to complete the road around Red Hill.

Sixty-five dollars was appropriated to assist in continued work on the Black Mud Hollow road. The attendance at this school on commencement day was as follows: GRADE: Miss Lizzie Parrott, 51; Miss Sarah Wimberly, 49; Mrs. O. C. Brown, 49; Mrs. E. E. Richards, 49; Mrs. Mary Wilson, 41; Mr. Len W. Bradley, 28; F. B. Hamlin, Prop., 12. Total attendance, 310.

Busy Yoncalla.

The people of Yoncalla, are figuratively speaking, up to the eyes in business. Every man, woman and child is at work caring for the fruit crop and the two dryers are taxed to take care of the prunes that are being brought in. This is the first year that the orchards of that vicinity have borne much, for the reason that the trees were young, but few of them being more than five years old, in a year or two more they will be in their prime and the yield in favorable seasons enormous. It was expected this year that one dryer would handle the crop and L. C. Mahn put one up with a capacity of 150 bushels per day. This can be increased to 350 bushels capacity which will be done next season. Dougherty & Yett put up a dryer also, but did not expect to more than try a little to see how it worked this year, but more fruit has been offered than they can handle. This dryer also has a capacity of 150 bushels in 24 hours. The Mahn dryer is the Allen patent and the Dougherty & Yett is after a model built by Mr. Kelly of Myrtle Creek, not patented, and the owners say it is very satisfactory. The Dougherty's are comparatively recent comers, being from Indiana. They are satisfied with Oregon and the fruit business.

While two dryers are taking care of the crop this year reasonably well, it is expected that the third year will require about six. The largest yield this year were from the small trees, but ordinarily say fruit buds are already setting on the large trees and indicate an enormous crop next season. The price offered is 4 1/2 cents. Italian, petite and silver are the varieties. While the silver prune commands the best price, the petite is the easiest to handle, and, we believe, the favorite with the fruit raisers and dryers.

Cook, the town story teller, left for Texas the other day, but Bill is filling his place with reasonable satisfaction. The True Remedy. W. M. Kepine, editor Tikiwa, Ill., "Chief," says: "We won't keep house without Dr. King's New Discovery for Consumption, Coughs and Colds. Experimented with many others, but never got the true remedy until we used Dr. King's New Discovery. No other remedy can take its place in our home, as in it we have a certain and sure cure for Coughs, Colds, Whooping Cough, etc." It is able to experiment with other remedies, even if they are urged on you as good as Dr. King's New Discovery. No other remedy is so good, because this remedy has a record of cures and besides is guaranteed. It never fails to satisfy. Trial bottles free at A. C. Marsters & Co.'s Drug Store.

A New Dryer. A fruit-dryer on a new model, which has been in operation since Monday morning a few miles west of Corvallis, is declared to be the best yet produced. Those who have seen the results of its work, says a dispatch of Friday. The tunnel is 100 feet long, and the heating is done by steam. The chambers at right angles to and near one end of the tunnel, contain each 2000 feet of three-quarter inch pipe, through which the steam passes. A big steam fan, placed at the mouth of the tunnel, forces the air heated by the steam pipes through the tunnel with great force. The tunnel accommodates 35 cars, and each carries trays, and each tray contains 10 pounds of fruit. Eighty pounds of steam in the boiler used for heating gives a temperature in the tunnel of 175 to 180 degrees, and the owner claims the fruit is dried perfectly in 17 hours. During the drying process there is no drip from the fruit, a condition difficult of accomplishment in prune drying.
