Alleged Circus Agent.

A man giving his name as Chas. E. Davis, of Chicago, Illinois, is in the city, and says he is the advance agent of a circus. He came to Eugene on Saturday night's overland train, and has been drinking pretty freely ever since. At times he says he represents the Forepaugh & Barnum circus, and then again he says it is the Syndicate circus. At all times he says it will exhibit on September 13th, and that the first car load of posters will arrive in Eugene tomorrow. Of course the last is not correct, as every one is aware no circus posters have been in the state, north or south. On inquiry we find he is the same man that Conductor Samuel Veatch, on Saturday night's overland train, compelled to pay passage, but only after a fight. We would advise our readers to give the man no credit without he makes a different showing.—Eugene Guard.

ROYAL BAKING POWDER
MADE IN ENGLAND

The Bohemia Mines.

Salem Statesman: Among the recent arrivals in this city is Charles Winkler, who spent about three months in the Bohemia mining district, which is located in the northeastern portion of Douglas county.

He speaks very highly of that mining section and thinks that it is not talked about to the extent that it should be.

Every month of work done upon the claims there is productive of rich developments and capital is bound to be attracted there sooner or later. Mr. Winkler thinks the Bohemia is destined to be one of the richest camps on the Pacific coast. It covers a range of fifteen miles wide and about sixty long, and already about fifty claims are in operation. The ore is not of a high grade, but is sufficiently rich to become profitable to those mining it.

The quartz is the free milling kind and the pieces exhibited in Salem by Mr. Winkler show up splendid in wealth.

What is known there as the Musick group is owned by a Mr. J. W. Cook, who seems to have implicit faith in the future of the district, having upwards of one hundred men in his employ, and, in course of construction, an addition to his present mill. The main structure is 26x26 feet in dimensions with an engine room 36x36 feet, and a concentrates storage room 26x44; the walls are 25 feet high. He has five stamps in operation at present and is preparing to add ten more, the same being now on route from Chicago. His "vains" face 6x13. He has bonded a couple of his claims to parties from Montana and they are now actively engaged in developing their prospect.
