Southern Oregon against the world for large fruit!

Mr. Dave Looney has been displaying his inventive skill, and as a result there is now in operation at Judge Riddle's evaporator a prune screener with which two men can screen an average of 800 trays of prunes every twelve hours. It is the production of Dave's fertile brain and is complete in every respect. When patented Mr. Looney will doubtless be ranked among our most famous inventors.

Who is the "up-to-date woman?" Most likely she is the one that writes 1898 at the head of her letters; and in all probability, she is not unlike the specimens of humanity that sometimes cause men to lose their hearts, to say nothing of their heads. It may be suggested, however, that her existence is necessary only to those who sometimes get hungry, tear their clothes, pull their buttons off, and in brief, to the person who couldn't well do without her.
