ALEXANDER & STRONG.

wind freshened and began to wash the decks, sometimes throwing spray clear over the ship. All that night while the ship rolled from side to side, above the swash of the waves, the threshing of the propellor, and the crash of guns, canteens, and coffee cups as they fell from bunks to the floor or as they rolled with the ship, could be heard the groans and curses of the sick soldiers; such cries as "Oh! how I wish I was back at Frisco," or "I wish this d—d | LI tub would sink." were some of the mildest. I saw men lying upon deck next day, who were so sick they would slide from the cabin to the railing and back just as

the cabin to the railing and back just as the ship rolled from side to side.

On the second morning I went on guard without breakfast. The ships rolled so bad everything was spiled. I got some sugar and saw some coffee sitting on one of the dining room tables.

List as I got to it the ship gave a large tables.

As to their domestic animals, there is basis and believe that I was a large table to do business on a credit.

left us and we saw them no more until we arrived at Honolulu.

By the third day most of the men were about again and began to get we

customed to their surroundings Beautiful albatrosses began to follow the ship, or lit on the sea and gracefully rode the high swells of the still rough sea. On the fourth or fifth day the sea became calmer and it was amusing to watch the flying fish dart here and there through the air and light with a splash On the morning of the 6th of July we sighted Leper Island and a little later the one—that Honolulu stands on, at, which latter place we arrived about noon

sisted of a kind of unpalatable mixture of crackers, army potatoes, corned beef, and water, entirely without salt or pepper. In spite of this being so unpalatable there was never enough to supply the appetite of the men.

Besides this we either had a bisent or sometimes two, or hardtack and always

tion, and on the 29th the long looked for Philippine Islands, but did not reach Manila harbor until the 31st. Our ships sailed majestically in and took their positions under the protection of the American warships, near Cavite.

and in full view of the hulke of the sunk-en Spanish warehips—a reminder of the first of May.

We staid on the boat a few days, and were finally landed near the army in-vesting Manila, with which we made our encompment, and with whom thereafter our history is common. We starved with them, laid in the mind and water of

The third fleet of transport self-king in the wart ransports so I take up my pen to write you seme of our experiences. The third fleet of transport self-king in the ward and the Morgian control of the construction of

succeeded in shortery succeeding the succeeding succeeding to the commission of the natives succeeding is a report of the Mt. Scott school for the month ending Oct. 28th:

No. days taught, 20; No. pupils entered in the succeeding s

evidence of it, either in the formation or among the natives whom 1 have ques-tioned as closely as I could.

got some sugar and saw some coffee sitting on one of the dining room tables.

Just as I got to it, the ship gave a lurch, and I picked myself up with my feet under the table on the other side of the dining room, with the coffee all over me.

Worked. Everything common to tropical climates does well here.

As to their domestic animals, there is a diminitive specimen of that noble animal here that is used in his place, at least as much as an animal half as big as to reality. They have an top of me and the hot coffee all over me. animal here resembling the ox that they call "water buffalo." This they use for heavy draught purposes, as well as for beef. I have seen a few cattle of our fir. Yocum Thinks it Will Prevent own breed here—fat, sleek and con-tented. There seems to be a good sup-

ply of hogs in the country.

The native dows are poor, sneaking scavengers, ever looking for and receiv-

and sent him back to his quarters. And it is the same story every day. Ye Gods! How sick does a man have to get efore he can have care and treatment?

There is one thousand patients up at he Brigade hospital and they are dying at the rate of 5 a day now yet two weeks ago it was only two a day. Yet, we are The members of the hospital pay no attention, scarcely to the men, "they are only soldiers, you know," At this rate we will lose two whole

regiments before spring yet no body i. e. there are thousands of letters going home to loved ones today, the writers of which are sick and maybe the next ones go to the hospital and then tothey say nothing of their ill health on the conditions here for fear of causing their kinsfolk and friends uneasiness

Manila, P. I., Sept. 7th, 1898. Raising the Wrecks.

the trenches in front of the Spanish lines in our turn, and we done our full amount of growling.

On the morning of the 13th of August Dewey opened fire on the outer intrenciments of the enemy with his war-hips. After an hour's firing he ceased and the outer works were taken by our men with a rush, the enemy making a slight resistance. By this time the white flag was floating over the main fort and the outers.

resistance. By this time the white flag was floating over the main fort and the war was over as far as Manila was concerned.

In the evening we took formal posses sion of the town. I do not know our losses from Spanish builets, very small though.

The city of Manila has a dreamy been a long time here air. The streets are narrow, the sidewalks, ditto. I think the whole thing may be described as

Disastrous Fires.

GOVERNMENT CAMP, Oct. 10, 1898. scavengers, ever looking for and receiving blows and kicks.

They say there are enormous specimens of the snake family from twelve to twenty-five feet in length here. I am thankful to ray I have not made the actual transport of the snake of July and August wents-five feet in length here. I am thankful to say I have not made the actual light with a spiash. On the morning of the 6th of July we sighted Leper I sland and a little later the one that Honolulu stands on, at which latter place we arrived about noon I forgot to mention we "celebrated" the glorious 4th of July. We fired a salute at earnise, and hal a plom duff for dinner that weighed one pound to the square inch, "solid shot," as it were. As we neared Honolulu where were excited by soeing perpoises four or five feet long jump out of the water, I all back with a splash and dart away.

Here I was called away and it is not until the day of the 7th of September that I am able to resume my work of writing a little of our journey to Manila. We reached Honolulu without any incident worthy of note. Of our reception there you have heard already. It is enough for me to say it was grand, and I will pass on to matters you do not know of. We left on the 9th of July sailing towards the setting of the sun.

Now a word to say of our treatment. Our rations for most of the voyage consisted of a kind of uppalatable mixture of covering and any in the patcelants. The consisted of a kind of uppalatable mixture of covering and the set in length here. I am the though and August through the months of July and August the sunt this will apply to the other tow the three in the side of the opinion there has been the matter of food and health and I think this will apply to the other volunteer or ganizations as well. We have the glorious 4th of July. We fired a salute of food and health and I think this will apply to the other volunteer of times in the dain's plant and the sail apply to the other volunteer of times in the size in the Cascade Forces Raseau for five feet long any time since 183, and from observations obtained in the dain's have to contend with there in the dain's plant and the same food one would get and may be digest in Alaska. The only large feet in the gate that of the other of the sail and the patcel five feet in the

Nature's Detectives.

waiting to lay his hand on him. When any tacks man-kind and hides itself in the human in the human system, no matter how obscure or complicated the disease may be, Na-ture among her great force of de-

force of defective remedies has one that will eventually hunt down
and arrest that particular disease.

Lung and brouchial diseases are among
the most baffling complaints which doctors
have to deal with; because it isn't the lungs
or brouchial tubes alone which are affected,
but every corner of the system furnishes a
lurking place for these elusive maladies.

They change and reappear and dodge
about the system under numberless disguises. They are almost always complicated with liver or stomach troubles, nervousness, neuralgia, or "general deblifty."

The best detective remedy which Nature
has provided to search out and arrest these
perplexing aliments is Dr. Pierce's Golden
Medical Discovery. It lays an arresting
hand directly upon the poisonous, paralyzing elements hiding in the liver and digestive organs.

It gives the blood making glands power

ing elements hiding in the liver and digestive organs.

It gives the blood making glands power to manufacture an abundant supply of pure, red, highly vitalized blood which reinforces the lungs with healthy tissue; feeds the nerve-centres with power, and builds up solid muscular flesh and active energy.

Forweak lungs, spitting of blood, shoriness of breath, nasal catarrh, bronchitis, severe coughs, asthma, and kindred affections, it is a sovereign remedy. While it promptly cures the severest cough it strengthens the availant and purities the blood.
