The Dominion Company, 371 Fisher Caxton Bldg., Chicago.

The Story of "Beautiful Willamette."

An intimate friend of the late Sam. L. Simpson writing to the Statesman gives the following version of the writing of Simpson's best poem:

At the time "Beautiful Williamette" was written Sam Simpson had only begun his struggle with his strong and yet weak nature. Like the chain, it was no stronger than the weakest part, which was his burning thirst that was rated but never satisified. At that time he felt profound remorse in his sober and gloomy moments. He had a loving wife and dear children. Once after a period of dissipation, feeling that the world was against him and that he was against himself, he wandered to the green border of the Willamette with thoughts of self destruction. "A plunge, and the crystal flood would flow in charity over his troubled form. He lay down on the bank of the stream, and its sweet music and its laughing beauty called out from the depths of his soul the wealth of his genius—and "Beautiful Willamette" was the result. Born in travail, it breathes thoughts that are eternal, thoughts clothed in words that will sing with the everlasting stars. Remembering the conditions read these lines.

"Oh! thy glimmering rush of gladness
Mocks this turbid life of mine,
Racing to the wild forever
Down the sloping paths of time."

The same beautiful and sad sentiment runs throughout the whole production.

BEAUTIFUL WILLAMETTE.

From the Cascade's frozen gorges,
Lesping like a child at play,
Widening, widening through the valley
Bright Willamette glides away.
Onward ever,
Lovely river,
Softly calling to the sea;
Time that scars us,
Maims and mars us,
Leaves no track or trench on thee

Spring's green witchery is weaving
Braid and border for thy side;
Grace forever haunts thy journey
Beauty dimples on thy tide.
Through the purple gates of morning,
Now thy cascate ripples dance;
Golden then, when day departing,
On thy waters trails his lance
Waltzing, flashing,
Tinkling, plashing,
Limpid, volatile and free—
Always hurried to be buried
In the bitter moon-mad sea.

In thy crystal deeps inverted,
Swings a picture of the sky,
Like those wavering hopes of Aiden,
Dimly in our dreams that lie;
Clouded often, drowned in turmoil,
Faint and lovely, far away—
Wreathing sunshine on the morrow,
Breathing fragrance round today.
Love would wander
Here and ponder—
Hither poetry would dream;
Life's old questions,
Sad suggestions,
"Whence and whither" throng thy stream.

On the roaring waste of ocean
Soon thy scattered waves shall toss;
'Mid the surges' rythmic thunder
Shall thy silver tongues be lost.
Oh! thy glimmering rush of gladness
Mocks this turbid life of mine,
Racing to the wild forever,
Down the sloping paths of time.
Onward ever,
Lovely river,
Softly calling to the sea,
Time that scars us,
Maims and mars us,
Leaves no track or trench on thee.

The above poem was first published in the Albany Democrat on April 16, 1868, and was signed only, "S. L. S." It is too bad that the author of such a poem should die at the age of fifty-four with the latter half of his life almost a blank.

Joining a Lodge.

A man in this town joined one of the numerous lodges that infest the place against the gentle admonitions of his wife. Being something of a joker he persuaded himself into the belief that this was a rare occasion to play a joke on his wife, so after he had been initiated at the lodge room he went to a drug store and bought a quarter's worth of sticking plaster which he cut in strips and pasted in crisscross shape on his face and hands, streaked a white handkerchief with red paint and tied it around his head, placed one arm in a sling and went home. In answer to the queries of his frightened wife he said they were giving him the skyfugie degree at the lodge, but instead of coming back through the skylight in the hall when they tossed him up they threw him clear over the building and he lit in the alley back of a hardware store on a pile of barrows, plows and scrap iron. His wife was horror stricken and wanted to know if there was no law to punish fools who would insist in joining such heathenish lodges. Some of the neighbors have told it around and about that when the wife found out that her husband had been fooling her, he was compelled to buy more sticking plaster to cover some very serious abrasions along the side of his nose and above one eye. Be this as it may, he never told his wife anything about the other degrees in that lodge.—Cannon Fall Beacon.

Elopement From Chehalis.

CHEHALIS, Wash., June 25.—A. S. Taylor, traveling salesman for the Wiley B. Allen Co., of Portland, and Miss Margaret Dever, of Chehalis, got a marriage license here yesterday and were driven to Napavine, where they were married. They took the afternoon train for Portland. The banns proclaiming Miss Dever's marriage to a young man from Woolly, Wash., at the Catholic church here next Wednesday were published in the Catholic church at Chehalis last Sunday by request of the young woman's parents. The young man from Woolly came this last week to be in readiness for the wedding, and before he had learned of the elopment of his prospective bride secured a marriage license yesterday afternoon. Miss Dever was deputy in the postoffice under ex-Postmaster Lillpop.

The Edward Atkinson, of Spain, has been gathering statistics to show how much the late war cost that country in the way of colonial possessions. Counting the territory ceded to the United States, and the islands transferred to Germany, the total area lost was 165,838 square miles, or nearly one half the former colonial empire.

Prune Culture.

A valuable bulletin has just been issued by the Oregon Agricultural Experiment Station on Points on Prune Dipping, which says:

It is an almost universal custom among horticulturists in this state to dip prunes, particularly Petites and Italians into a boiling solution of lye just previous to drying, primarily for the purpose of hastening the operation of drying, and secondarily, as claimed by many, for the purpose of cleansing and rendering the skin less tough.

Bulletin 45 of this station says concerning this process: "Lye dipping as practiced in Oregon is about as follows: One pound of concentrated lye is dissolved in from 10 to 50 gallons of water, the proportion of lye and water differing greatly with the various prune growers.

The primitive way is to keep the solution boiling in a large kettle, into which the prunes, placed in a wire basket or a much perforated metal vessel, are immersed and there kept in motion, by twirling or swinging for from 30 to 60 seconds, depending upon the condition of the fruit.

The more modern way is to have the fruit run from the grader to set of endless chains with carrying aprons and by them carried through a pan containing the boiling lye solution, heated with submerged steam pipes; from the lye the prunes are carried on through fresh water, preferably running water, and then spread on trays.

If the operation is well done the prunes should have their skins bright and shining, and present on close examination a finely checked condition. Over or under immersion causes the fruit to dry unevenly; when too much scalded the skin tears and becomes ragged, and the fruit becomes soft and mushy, making a sticky, nasty mess on the tray."

The pricking method used in California to accomplish the same result is not practiced to any extent in Oregon, although a few machines are to be found in the state.

From the above it would appear that a vast difference exists in the strength of solutions used for dipping. It was to learn something of the conditions affecting this process that some experiments were undertaken in the fall of 1898. In the summer of 1898 these were extended further in order to ascertain something as to the relative strength of the commercial concentrated lyes on the market.

This latter phase of the work was added because inquiries were being asked as to the relative merits of the various brands and from the further fact that many complaints were heard from those using the article, both for the purpose indicated and as an ingredient of sprays, that a wide difference existed in the strength of the various brands based on the fact that all brands do not give equally good results when used in like manner.

The maximum strength for the dipping solution in use would give a lye solution of 1.25 per cent alkalinity, provided the lye used was 100 per cent pure and the minimum strength a .25 per cent solution.

An analysis of one sample of dipping solution taken from a tank showed .83 per cent alkalinity as soda. There appears to be a great difference in the strength of the lyes for sale on the market, and the more observant operators have found that it is unsafe to fix any quantity of lye as measured by the number of cans of the ordinary size, but that the correct strength of the lye must be judged by the appearance of the fruit coming from the solution.

A confessed fault of lye dipping is the unevenness with which the fruit dries after being dipped, and particularly is this heard from those who are not in the habit of thoroughly grading their fresh fruit. Some experiments have been conducted which I think will throw some light on this question.

Prunes of normal size were subjected to treatment in a 1.55 per cent solution of lye for 20 seconds, and on removal from the solution were found to be well checked, but small prunes were very imperfectly checked, many of them not being affected at all. Increasing the time seemed only to cause the prune to crack deeply or the skin to roll up leaving the flesh badly exposed.

A trial with a solution of double the strength used at first, 25 per cent alkalinity, only caused the skin to roll up worse and the cracks to be made deeper, and failed to produce a well checked fruit.

It is well to say that the weaker solution is probably somewhat stronger than that used by most horticulturists, inasmuch as the lyes used are very variable, and the strength used in this experiment would only be obtained by using the strongest solution customary to use in this state, and on the condition that the lye used be 100 per cent pure, which is not usually the case.

A practical application of these results is to enforce the idea of preliminary grading of fruit, or, still better, the necessity of keeping trees in such healthy condition as will permit them to bear only fruit of normal size.

Particular care should be taken not to allow them to overbear, which will always cause them to produce a stunted fruit.

Conclusions:

1. The smaller sizes of prunes are not easily affected by the ordinary process of lye dipping.

2. That increasing the strength of the lye solution does not bring about a proper checking of these small prunes but merely causes them to crack deep into the flesh or the skin to roll up leaving the flesh badly exposed.

3. To obtain a uniform product of dried prunes care should be taken that trees do not overbear and thus produce an abnormally small prune with a tough skin which will not check.

4. Prunes should be thoroughly graded before drying so the smallest sizes may be removed and hither subjected to some other treatment than lye dipping—possibly pricked it they are to be dried—or used to make secondary fruit products.

5. The net weight of most brands of concentrated lye to be found on the market is considerably short of one pound, and the total alkalinity is quite variable among the different brands.

6. The most economical brands offered for sale in Oregon at the time these samples were collected were Babbit's, American, Giant, Quaker City.

CATARRH OF THE STOMACH

Is a chronic disease. There is an inflammation of the inner coating of the stomach. A thick, ropy mucus forms and this causes the more pronounced symptoms. It remains in the stomach and decomposes. Then, of course, digestion cannot be properly performed. The great vegetable remedy **HUDYAN** never fails to effect a cure. **HUDYAN** can be had of all druggists for 50c. per package. Study your symptoms carefully from this chart. Each number represents a symptom or a group of symptoms. You have the symptoms. Use **HUDYAN** and they will disappear.

THE SYMPTOMS ARE:

1. **BILIOUS HEADACHE.** This is more pronounced in the morning. **HUDYAN** will relieve the headache.

2-3. **RED AND WATERY EYES.** **HUDYAN** will cause the redness to disappear and make the eyes assume their normal, healthy appearance.

4. **COATED TONGUE AND FOETID BREATH AND BAD TASTE IN THE MOUTH.** **HUDYAN** will clear the tongue, make the breath pure and sweet and cause the bad taste to disappear.

5. **PAIN AND TENDERNESS IN THE STOMACH.** This is due to indigestion. **HUDYAN** will cause the food to become perfectly digested and the pain and tenderness will disappear.

6. **ENLARGEMENT OF THE LIVER.** **HUDYAN** will lessen the congestion and reduce the enlarged liver to its normal size.

HUDYAN will relieve you of the above symptoms and make you well. Do not delay.

Go to your druggist at once and procure a package of **HUDYAN** for 50c. or 6 for $2.50. If your druggist does not keep it, send direct to the **HUDYAN REMEDY COMPANY,** San Francisco, Cal., and they will send it to you. You can consult the great **HUDYAN DOCTORS FREE.** Do not forget that. Call and see them if you wish. You may call and see them, or write, as you desire. Address

HUDYAN REMEDY COMPANY,

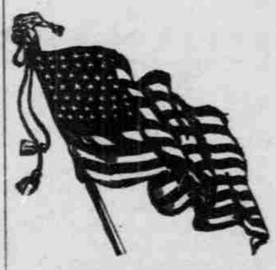
NEARLY Fifty-eight Years Old ! ! !



It's a long life, but devotion to the true interests and prosperity of the American People has won for it new friends as the years rolled by and the original members of its family passed to their reward, and these admirers are loyal and steadfast today, with faith in its teachings, and confidence in the information which it brings to their homes and firesides.

As a natural consequence it enjoys in its old age all the vitality and vigor of its youth, strengthened and ripened by the experiences of over half a century.

It has lived on its merits, and on the cordial support of progressive Americans.

It is "The New-York Weekly Tribune," acknowledged the country over as the leading National Family Newspaper.

Recognizing its value to those who desire all the news of the State and Nation, the publisher of THE PLAINDEALER, (your own favorite home paper) has entered in to an alliance with "The New-York Weekly Tribune" which enables him to furnish both papers at the trifling cost of $1.75 per year.

Every farmer and villager owes to himself, to his family, and to the community in which he lives a cordial support of his local newspaper, as it works constantly and untiringly for his interests in every way, brings to his home all the news and happenings of his neighborhood, the doings of his friends, the condition and prospects for different crops, the prices in home markets, and, in fact, is a weekly visitor which should be found in every wide-awake, progressive family.

Just think of it! ! !

NOTICE FOR PUBLICATION.

UNITED STATES LAND OFFICE,
Roseburg, Oregon, June 20, 1899.

Notice is hereby given that in compliance with the provisions of the act of Congress of June 3, 1878, entitled "An act for the sale of timber lands in the States of California, Oregon, Nevada and Washington Territory.

FRANK M. HOPKINS,

of Canyonville, County of Douglas, State of Oregon, has this day filed in this office his sworn statement No. 686, for the purchase of the Lot 5, of Section No. 31, in Township No 30, S. Range No. 5 W., and will offer proof to show that the land sought is more valuable for its timber or stone than for agricultural purposes and to establish his claim to said land before the Register and Receiver of this office at Roseburg, Oregon, on Saturday, the 26th day of August, 1899.

He names as witnesses: William Briggs, Jr., Robert Cougler, Thomas Wilson, G. W. Puckett, of Canyonville, Ore.

Any and all persons claiming adversely the above-described lands are requested to file their claims in this office on or before said 26th day of August, 1899.

J. T. BRIDGES,
(j22p) Register.

Ho, for Boswell Springs!

Mining Application, No. 95.

UNITED STATES LAND OFFICE,
Roseburg, Oregon, June 8, 1899.

NOTICE IS HEREBY GIVEN THAT Charles Bruneau, P. J. Jennings and R. J. Jennings, whose postoffice addresses are as follows: Of Charles Bruneau and R. J. Jennings, Cottage Grove, Lane County, Oregon, and P. J. Jennings, of Portland, Multnomah County, Oregon, have this day filed their application for a patent for 3000 linear feet of the Helena Consolidated Quartz Mine, or vein, bearing gold, silver and lead, with surface ground 600 feet in width, being 300 feet on each side of the center of said vein, and being 1500 linear feet of the Helena Lode Claim and 1500 feet of the Laurette Lode Claim, the Laurette being the 1st extension Easterly of the said Helena Claim, said claim being particularly described as Mineral survey, No. 360,

Helena Quartz Lode and Laurette Quartz Lode, known as Helena Consolidated Quartz Mine, situated in Bohemia Mining District, Douglas County, Oregon, in Township No. 25, S. R. 2 W., Willamette Meridian, Oregon.

Application of Charles Bruneau, P. J. Jennings and R. J. Jennings.

HELENA LODE.

Beginning at a fir post 6 inches square, 4 feet long, set 18 inches in the ground, with rock mound alongside, scribed M. S. 360. Identical with location starting point of the Helena lode claim, whence the discovery cut and Tunnel No. 1, bears S. 61 degrees E. 15 feet; also a fir 15 in. in diam. bears N. 27 degrees, W. 22 feet, scribed M. S 360, B. T.; also a fir 8 in. diam. bears N. 82 degrees W. 24 feet, scribed M. S. 360, B. T.

Also the Noonday Mining Co.'s Ore House bears S. 15 degrees W. about 2000 feet.

Also the mouth of Geo. Kerr's Tunnel bears S. 31 deg., W. about 500 feet. Also Mt. Theilson, commonly known as Cowhorn Peak of the Cascade Range, bears S. 43 deg. E.

Also Diamond Peak bears S. 80 deg. E.; thence run N. 64 deg. W. on course of lode, up steep ascent 900 ft., intersect wagon road leading from the Noonday Co.'s Mine to their quartz mill 1200 ft. set fir post 6 in. square, 4 feet long, 18 inches in the ground for center post on Westerly end of this claim, with mound of stone alongside, scribed M. S. 360, from which a fir 10 in. dia. bears S. 5 deg., W. 20 feet, scribed M. S. 360, B. T.

A fir 8 in. dia. bears N. 60 deg. E. 10 feet, scribed M. S. 360 B. T.

This post is identical with the location post set on westerly end of this claim.

Thence S. 26 deg. W. 300 ft. Set post No. 1, identical with location Cor. 4 feet long, 4 inches square, 18 inches in the ground with a mound of stone alongside, scribed C. L. M. S. 360, from which a fir 14 in. dia. bears N. 67 deg. E., 40 ft. scribed C. L. M. S 360, B T.

A pine 8 in. dia. S 12 deg. E 9 ft, scribed C L M S 360, B T.

Whence corner to sections 7-12-13 and 18, Tp. 23, S R 1 and 2 E. Willamette Meridian, bears S 59 deg 30 min W 1758 feet, thence from Cor No 1, S 64 deg E.

Var 19 deg 30 min E.

Descend steep Mountain, Slope S E 15 ft wagon road leading from Noonday Quartz Mine to Quartz Mill C N 63 deg E 1280 ft.

Same road C South, 1305.5 ft to Cor No 2.

Identical with a corner of the location.

A fir post 4 feet long, 4 inches square, set 18 in. in the ground with mound of stone alongside, scribed C 2 M S 360.

Whence a pine 10 in. dia. bears N 15 deg W 30 ft, scribed C 2, M S 360, B T.

Thence from Cor No 2 N 26 deg E. Var 19 deg 30 min E; 19 ft to Cor No 1, of Laurette Claim, 300 feet to post set in center of Easterly end of the Helena Claim, identical with location post set in easterly end of this claim.

A fir post 4 feet long, 4 inches square, set 18 in. in the ground with mound of stone alongside, scribed M S 360.

Whence a fir 8 in dia bears S 32 deg E 9 ft, scribed M S 360 B T. 319 ft to Center Post of Westerly end of Laurette Claim, 585 ft to small creek S South East, 600 ft to corner No 3.

Identical with a corner of the location.

A fir post 4 feet long, 4 inches square, set 18 inches in the ground with mound of stone alongside, scribed C 3, M S 360.

Whence a fir 6 in dia bears N 66 deg W 8 ft, scribed C 3, M S 360 B T.

Corner No 2 of Laurette Lode bears N 26 deg E 19 ft; thence from Cor No 3, N 64 deg W, Var 19 deg 30 min E.

Ascend steep mountain 500 ft intersect wagon road leading from Noonday Mine to Quartz Mill, 1230 ft same wagon road, 1899.5 ft to corner No 4, identical with a location corner.

A fir post 4 ft long, 4 in. square, set 18 inches in the ground, with mound of stone alongside, scribed C 4, M S 360.

Whence a fir 7 in dia bears S 8 deg 30 min W 23 ft, scribed C 4, M S 360, B T, and thence S 26 deg W, Var 19 ft deg 30 min E., 300 ft to center post on westerly end of Claim before described, embracing 20.65 acres.

LAURETTE LODE.

Beginning at corner No 1, identical with the corner os location, a fir post 4 ft long, 4 inches square, set 18 inches in the ground with mound of stone alongside, scribed C 1 M S 360, whence A S Pine 5 in Dia bears N 42 degrees east, 22 scribed C 1 M S 360 B T

Corner No 2, of Helena bears S 26 deg W 19 ft, thence from corner No 1, N 26 deg E, Var 19 deg 30 min E 289 ft to center post on Easterly end of Helena Claim, 300 ft to center post on westerly end of Laurette Claim.

A fir post, 4 inches square, 4 feet long, set 18 inches in the ground, scribed M. S. 360, with mound of stone alongside.

Identical with location of Westerly end of Laurette Claim, whence discovery Cut and Tunnel No. 3, bears S. 72 deg. E. 104 ft. 566 feet to Small Creek C. S. E. 581 ft. to corner No, 3, Helena Claim; 600 ft. to corner No. 2.

Identical with corner of location.

A fir post 4 ft. long, 4 inches square, set 18 inches in the ground, with mound of stone alongside, scribed C, No. 2, M. S. 360, whence.

A fir 14 in. dia. bears S. 54 deg. E. 13 ft. scribed C. 2 M. S. 360 B. T.

Thence from corner No. 2, S. 72 deg. E. Var. 19 deg. 30 min. E. descend 1499 ft. to corner No. 3,

A fir post 4 ft. long, 4 inches square, set 18 inches in the ground, with mound of stone alongside, scribed C, 3, M. S. 360, whence a fir Top sighnete Rock, two ft out of ground 24x30 inches with — cut with a chisel at direct point which bears S. 54 deg. W. 32 ft. marked with a chisel, C. 3. M. S, 360, B. R.

Also the N. E. corner of the Noonday Quartz Mill, bears S. 40 deg. W. 93.5 ft.

Thence from corner No. 3, S 26 deg W. Var. 19 deg. 30 min. E. 150, ft. to Creek 3 ft. wide, C. S, K. 900 ft. to centerpost on Easterly end of this Claim.

A fir post 4 ft. long, 4 inches square, set 18 inches in the ground, with mound of stone alongside, scribed M. S. 360, whence a fir 12 in dia bears N. 34 deg. W. 22 ft. scribed M. S. 360 B. T. second 600 feet to corner No. 4.

Identical with a cor. of location.

A fir post 4 ft. long, 4 inches square, set 18 inches in the ground, with mound of stone alongside. Scribed C. 4, M. S. 360, whence a fir 10 in. dia. bears N. 10 deg. E. 29 ft.

Scribed C. 4, M. S. 360 B. T.

Thence N, 72 deg. W, from cor. No 4, Var. 19 deg. 30 min. E. 725 ft. to Creek 3 ft wide C. East 900 ft. to wagon road leading from Noonday Mine to Quartz Mill, 1499 ft. to corner No. 1, and place of beginning containing 20.48 acres.

The survey of the Helena and Laurette Quartz Lodes are identical with the respective locations, and the presumed general course of the vein or lode is northwesterly and southeasterly, as is shown by the plat filed herewith, as near as can be determined from the present development.

The Notice of Location of these mining claims is recorded as follows, to-wit:

First, location of the Helena, (called Helener) is recorded in Volume 5 of Douglas County, Oregon, Mining Records, at Page 185, on the 7th day of July, 1896; and the second notice thereof is recorded in Volume 6, of Douglas County Oregon, Mining Records, at Pages 301 and 302, the 2nd day of August, 1898.

The first location of the Laurette Lode Claim was recorded in Volume 6, of Douglas County, Oregon, Mining Records, on the 18th day of November, 1897, at Page 86, and the second location notice thereof was recorded on the 2nd day of August, 1898, in Volume 6, of Douglas County, Oregon, Mining Records, at Pages 299 and 300.

The adjoining Claims are: On the northerly side of the Helena, (
