OUR PRUNE INDUSTRY.

(Continued from first page.)

with a capacity of 200 bushels a day.

Both Mr. Stille Riddle and Messrs. Dean & Sons have their evaporators running at full capacity as they are drying for neighbors as well as for themselves.

Across the creek from Riddle is the home of G. K. Quinn who has a very fine farm and carries on many branches of farming. He has about eight acres of prunes of which one-half are Italian and of history will last up about 1000 bushes. Mr. Quinn also has about 400 large apple trees which are well loaded with fruit and should prove very profitable this year.

Among the prune orchards in and about Riddle and Canyonville which have not been mentioned and could not be reached were those of H. Yokum who has about 200 trees; J. D. Cornutt, John Shopp, Clarence Gatzler, Frank Gatzler, Minnie Gatzler, C. W. Kirk, Karl Kimmel, George Bohlenhugh, Wm. Pardee, John Pardee, T. G. Dabell, Mrs. Geo. W. Riddle, Mrs. Zee Ball. A number of these are large orchards but no estimates as to crops were secured. Messrs. C. W. Kirk and T. G. Dabell, and probably others, have evaporators.

THE MYRTLE CREEK DISTRICT.

The Myrtle Creek district has more prunes in the aggregate this year than any other district in the Northwest. The prune is the leading variety in that section and most of the orchards have from a fair to good crop.

There are some prune groves scattered several directions from Myrtle Creek. Along the Umpqua river above the town is Missouri Bottom. The most extensive prune grower of Missouri Bottom is Ed. Weaver. He has a number of prune orchards which aggregate about 80 acres, or 10,000 trees, of which two thirds are Italian and the remainder are Petite, except 550 Silver trees.

Mr. Weaver expects between 275,000 and 300,000 pounds of cured prunes. He has been building evaporators for several years but his crop has hitherto increased faster than his evaporator capacity and last year it was estimated that he lost through inability to get them dried enough prunes to make 200,000 pounds. This year he prepared himself for any emergency in the way of a big crop and sudden ripening by erecting the largest and most costly evaporating plant in the state of which we have knowledge. The building was made large enough to give an abundance of room for all purposes. The boiler room is in the basement and the evaporating chamber is in the second story. The building was built on the side of a hill so that the loaded wagon can be easily driven on a platform level with the second story. The prunes are washed and then spread with a simple machine which does the work very rapidly and accurately. Trays three feet square are used and there are thirteen one-inch steam pipes under every second tray from top to bottom. The loaded trays are all put in on the side of the evaporating chamber into which the fresh prunes are brought and are taken out at the other. Every tray has a large beam and letter, and when the fruit is ready to take out the man whose business it is to determine when it should be taken out calls out the number and letter and the person who has charge of taking out that tray attends to it. On the side on which the fruit is taken out a work table extends the full length of the evaporating chamber with hoppers which lead down into bins in the storage room below. A ventilating shaft rises to the height of 25 feet or more above the evaporating chamber the whole length thereof. Dampers in this shaft permit of regulation of the draft. The circulation of air was very strong and apparently perfect. A temperature of about 180 degrees was used but there was no sign of drip anywhere and no sticky prunes. The greater part of the evaporator was loaded with Petite when it was visited. The fruit was very ripe and sweet and was going through the evaporator in eight hours. Ordinarily Mr. Weaver says he takes about ten hours for Petite, he cured fruit was very handsome. The evaporator holds at one charge about 450 bushels of prunes. In actual work, averaging time required for the different varieties, it takes care of 600 bushels in 24 hours. When run at full capacity night and day a force of 18 men do all the work about the evaporator. In this as well as in many of the other evaporators about Myrtle Creek, wood-slats trays are used and are preferred to wire cloth trays. The evaporator building is thoroughly lighted with acetylene gas. The cost of the plant has been a little in excess of \$4,000.

Mr. Cleland Weaver has 25 acres of prunes. Of these 250 trees are Italian, 125 trees Silver and the balance Petite. All varieties have a good crop from which 60,000 pounds of cured fruit was expected. Mr. Weaver has two small driers.

John Weaver was not seen. He has 40 acres of prunes, and his output of cured fruit was estimated by Ed Weaver at 120,000 pounds.

J. L. Armer, who lives in Canyonville has an orchard in Missouri Bottom the crop of which was placed by Mr. Ed. Weaver at 3000 bushels of prunes.

J. W. Weaver's orchard has about 20 acres of Petite and 7 acres of Italian and he expected a crop of from 5,000 to 6,000 bushels. He has three box driers which handle 200 bushels per day.

We were unable to reach Mr. J. J. Chadwick. He has a fine orchard of 30 acres from which he expects, as we are informed, about 60,000 pounds of cured prunes.

M. B. Smith has six acres of Petite. He estimated his crop at 1500 bushels. He has a box drier with a capacity of 40 bushels per day.

Mrs. H. Adams has between 18 and 20 acres of prunes, mostly Petite, and placed the amount of her crop at 45,000 pounds. She has two driers with an aggregate capacity of 175 bushels per day.

Mr. Hamilton, of Rosburg, has an orchard of 2000 trees of the crop of which was estimated, at from 60,000 to 80,000 pounds.

The largest orchard is that of B. C. Agor. Of the 160 acres of orchard on this place between 130 and 140 are in prunes, there being 3,000 Petite trees, 14,000 Italian trees and 1,000 Silver trees. The estimated crop is 200,000 pounds of cured prunes. We have never seen richer or finer flavored Italian than those which Mr. Agor was drying at the time of our visit. Along Myrtle Creek and the south

fork of the same are many orchards.

R. Christian has a young orchard of six acres of Petite from which 700 bushels of fruit were expected. He has a drier with a capacity of 50 bushels per day.

S. W. Boyles has a young orchard of five acres of Petite.

Cornelison Bros. have about eight acres of Petite from which they expected between 12,000 and 20,000 pounds of cured fruit. They have a drier with a capacity of 80 bushels per day.

Practically one body are the three orchards of Milo Kelley, Charles Kelley and Robert Powell under the management of S. H. Knight. They contain in all 22 acres of Petite and an aggregate crop of from 45,000 to 50,000 pounds was expected. There is an evaporator on each place.

W. H. Kelley has eight acres of prunes half Italian and half Petite; expected 150 to 200 bushels this year, or about as much as last year. Has two constructions of hot-air driers with a capacity of 100 bushels per day. Uses from one-half to five-eighths of a cord of wood for each 1000 pounds of cured fruit.

A. S. Chaney has 550 Petite trees and 50 Italian trees. Estimated his output of cured prunes this year at 16,000 pounds against 12,000 pounds last year. He has a box drier which turns out 1000 pounds of dried fruit per day.

A ten acre orchard of Petite belonging to J. O. Mea is cared for by G. W. Reese. The crop for this year was estimated at from 20,000 to 25,000 pounds.

Mrs. S. H. Selig has about 35 acres of Petite, 4 of Italian and one of Silver. Expected about 40,000 pounds. She has two driers which care for 200 bushels per day.

H. F. West has an orchard of 1000 Petite trees which are just beginning to bear. He expects 30 or 40 bushels this year.

J. A. Rice could not be seen. He has about 12 acres of prunes, half of Italian and half Petite. The trees were carrying a very fair crop. He has a box drier.

G. E. Brack has four acres of Silver and three acres of Petite. The trees are young and the crop was estimated at 300 bushels. He has a box drier which holds 40 bushels of Petite.

R. R. Jones has 35 acres of Petite and estimated his crop at 200 bushels.

Geo. Koch has seven acres of prunes, mostly Petite. The trees are about their first crop, estimated at 100 bush.

Henry Wiley has 400 prune trees, mostly Petite and a drier with a capacity of 75 bushels per day.

L. W. Shepard has three acres of prunes from which he expected a crop of 400 bushels. He has a drier with a capacity of 30 bushels per day.

Orchards further up Myrtle Creek which could not be reached are those of J. G. Danner, 10 acres; Will Danner, 10 acres; and Joshua Fawcett, 10 acres. There may be others.

On the south fork of Myrtle Creek there are prune orchards which we could not visit as follows: Lloyd Day, 15 acres; John Hicks, 10 acres; John Stevens, 8 acres; Wm. Newton, 15 acres; H. R. Benson, 4 acres, also a number of orchards belonging to Walter Ordley, Mr. Hughes and others of which no information could be obtained.

At the Myrtle Creek station J. B. Harris has a stock evaporator, Schneider patent, with a capacity of 2000 pounds of cured prunes per day and J. M. Bedline has a Kurtz evaporator with a capacity of 150 bushels per day.

There is a small prune orchard near the station belonging to L. V. Lippincott of Medford. There are undoubtedly other orchards in the vicinity of Myrtle Creek which we missed or did not learn of.

Coming north a few miles there are a number of orchards in the vicinity of Rockles, but the only one visited was that of W. M. Moore, close to the station. Mr. Moore has 12 acres of the two acres are Silver and the balance equally divided between Italian and Petite.

Not far from Rockles are the large prune orchards of Pitt & Edwards. We could not visit these nor obtain any information concerning the crop except that there was a large force of pickers employed.

YOUR LIVER

is out of order if you have the symptoms enumerated on this chart. You can be cured without the aid of Calomel, Blue Mass or Quinine. They are minerals and are apt to do more harm than good. Why not add your name to the steadily large list of people cured by HUDYAN? HUDYAN has cured 30,000 others and it will cure you. HUDYAN is the great vegetable remedy of the century and will relieve all the following symptoms:

- 1. BILIOUS HEAD-ACHE**—Relieved by HUDYAN.
- 2. OPACIFICATION OF THE EYES**—HUDYAN will cause the yellowness to disappear and the normal, healthy color to return.
- 3. COATED TONGUE, FETID BREATH**—HUDYAN will clear the tongue and make the breath pure and sweet.
- 4. TENDERNES AND PAIN IN THE STOMACH, DUE TO INDIGESTION**—HUDYAN will clear the stomach of the excess of bile, relieve the pain and cause the food to be perfectly digested.
- 5. ENLARGEMENT OF THE LIVER**—HUDYAN will lessen the congestion and reduce the liver to its normal size.

HUDYAN will cure all the above symptoms and make you well. Do not delay longer. Go to your druggist once and procure a box of HUDYAN for 50 cents or 6 packages for \$2.50. If your druggist does not keep it, send direct to the HUDYAN REMEDY COMPANY, San Francisco, California. If you are not satisfied with the effects, return the empty HUDYAN box and we will return your money. Remember that you can consult the HUDYAN DOCTORS PAPER. Call and see the doctors. You may call and see them, or write, as you desire Address
