

What is CASTORIA

Castoria is a substitute for Castor Oil, Paregorie, Drops and Southing Syraps. It is Harmless and Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrheea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stemach and Bowels, giving healthy and natural sleep. The Children's Panacca-The Mother's Friend.

GENUINE CASTORIA ALWAYS 9 Bears the Signature of The Kind You Have Always Bought In Use For Over 30 Years. SEND NO MONEY

THE SPEED OF BIRDS.

Recent Trial Shows That It Is Not Nearly So Great as Many People Have Imagined.

It seems probable that current estiates of the speed of the birds' flight ust be modified. Monday, June 27, number of carrier pigeons were flown out the Shetland islands to London. his is a great distance even for trained arls, the total length of the journey being 5010, miles. The date being only a week after the longest day of the year, the birds had the advantage of aylight during the whole flight, and he winner reached the house of its wher, Mr. Clutterbuck of Stanmore, n eight minutes under 16 hours. They had been liberated at Lerwick at 3:30 generate a good deal of moisture a. m. The official weather chart of the What farmer but what has seen the meteorological office gave, not for the first time, information of the utmost value for estimating the conditions of condition on a cold winter morning wind under which the flight was made. they are very apt to take cold. When

Every "arrow" from Kirkwall to Londan pointed due south. In other words, the birds had the wind behind them throughout their journey.

The result is that, in what is very carly an approach to a migration flight, the pigeons traveled at a speed of 37 miles an hour. An interesting correspondence in the Field, following the announcement of this fact, showed now whilely observers differ on the most atcreating question, but the records aproach more nearly to the lower esmate in each case in which accuracy tas been possible, and in any case the urmises of the late Dr. Gatke that migrating birds traveled occasionally at speeds reaching 180 miles an hour canot now be seriously defended. Yet such an observer as Mr. Frohawk, one of our best painters of birds and animais, is convinced that a godwing can fly at a speed of 150 miles an hour, and Sir Raiph Payne Gallwey reckons the flight and unthrifty condition. Many farm of a teal as sometimes reaching 140 ers allow their hogs to work in straw-

miles an hour. But it has been calcu-

lated that if the godwing were flying at

150 miles an hour it would have to overome a resistance of air equal to a pressure of 112 pounds per square foot, or considerably more than the force of hundred-mile hurricane. Other corspondents give instances which leave the doubt that shore birds do travel against a stone wall. The earth itself, speeds considerably above 50 miles. with a little straw, makes the best behour; but as regards the flight of in the world for a hog if it is dry. In ie pigeon, some experiments carried that one word, dry, is the great secret ut by the proprietors of the Field of successfully wintering swine. Dianny years ago leave little doubt that he speed shown in the Shetland flight, vide the herd into small lots of not normal. Twelve records with the more than ten each; and in the case conugraph gave a highest speed to matured brood soors five or six togeth "blue rock" pigeon of from 33 to 38 are better than more. Keep them illes per hour. Pheasants and par- warm as possible, and have them dry idges were also subjected to experichi. The former made a record of hogs to sleep in cold and dry that miles an hour, and the partridges, in warm and wet. I am not govien well on the wing, of 32 miles,- ing to advise anyone who has :

London Speciator. INADEQUACY OF WORDS. At Times Language Falls to Fally Impart the State of Man's

Feelings. It is difficult to get sunlight and warmth into large houses, and, more In some things the power of man than that, they are likely to become cems woefully deficient, and one of a hotbed of disease germs, and much hese is his language, which is as yet fertility is wasted about them. Hogs indequate to do justice to the operashould be changed about from lot to one of nature. Stirring as it may be, lot. We want a rotation of hog pens, he ordinary account of a mighty event so to speak, turning up each lot in generally for beneath what it might turn to the sun and al The description of a wreck may season or two and putting it back to ause us to shudder slightly, but there grass. The Length of Human Life.

J. T. BRINGES, According to M. I. Holl Schooling, of Truster. Brussels, says Cosmos, there is an old rule for finding the length of a man's life if the present age lies between 12 and 86 years. This is the rule: Subtract the present age from s6 and divid: the remainder by 2; the result will give the number of years you have yet f live. This old rule was discovered h the mathematician De Moivre, who emgrated to England from Frames in 186 Gure. and became a member of the Royal so ivity. The curves given by Mr. School ing are interesting to examine. A first diagram shows the chance that every
