ENTERED GRIZZLY'S CAVE.

How The End of the Lake County Bear Was Accomplished.

LAKEVIEW, Or., March 27.—George Small came to Lakeview today from Silver Lake, and brought with him a claw and a tooth of the famous grizzly bear killed near Silver Lake a few days ago. Mr. Small was one of the hunters, and gives an interesting account of the hunt. There were six in the party of hunters, five men and a boy 12 years old. The bear, which had been committing depredations on stock in that community for the past 15 or 20 years, had been especially troublesome recently. William Vandervert, who lives at the Deschutes, 100 miles away, and has a state reputation as a hunter, was sent for. He arrived last week with his dogs, and the bear's trail was soon located about eight miles from Silver Lake. After following it about six miles, the dogs "treed" the monster in a cave in a mountain on the headwaters of Silver Creek. The trail that led to the bear's den was along the shelves of a cliff beneath the rimrocks, and there was but one way of getting to it. The hunters followed on, climbing along the projecting rocks, and reached the mouth of the cave. They found a small entrance to the dark cavern, and the dogs refused to enter. They tried to smoke the grizzly out, but he refused to come.

Then Jeff Howard, an old resident of this county, and a hunter and trapper, suggested a plan more daring than that of Israel Putnam, and proceeded to carry it out. By peering into the cave for a long time, he discovered that there were two apartments, and he could tell from the growls of the bear that he was in the larger one. He also discovered that the walls that separated the two caves were of shell rock, and that there were crevices and openings between them. He had the other five hunters climb upon the projecting cliffs above, so as to be out of danger, and where they could cover the entrance of the cave with their guns, and he took a large pole and entered the cave.

Groping in the darkness, he discovered the entrance that led into the smaller cave and entered this one and got in the rear of the grizzly. He then began to prod the monster, and soon made it so uncomfortable for him that, with a ferocious howl, the animal made for the open air. The minute he reached the cliffs, Billy Ball, the Indian, shot him through the neck from above, and a few more well-directed shots completed the work.

He proved to be a monster plantigrade genus bear, and a conservative estimate placed his weight at 1200 pounds. Some thought he would weigh considerably more. His skin, which was prime, weighed 60 pounds, and was eight feet in length. He carried four inches of fat on the back. One of his claws—the middle one—measured 5½ inches in length and one inch in width.

Conn, one of the hunters, paid $30 for his hide. The amount of the reward divided between the hunters was $95, and Vandervert was paid $40 for coming.

Eclipse in 1900.

In the year 1900 there will be three eclipses, two of the sun and one of the moon. The first will be total eclipse of the sun May 20, and will be visible throughout the United States. The first eclipse will begin about 7:28, and continue about two and one half hours. The second is a partial eclipse. The third is an annual eclipse of the sun, invisible in America, November 21. The total eclipse of the sun on May 20 will be a very interesting sight.

Oregon Notes.

By a vote of 44 to 20, the property owners of Lakeview have decided to bond the town for $10,000 for a water system and electric-light plant. It is expected the improvements will be completed by November 1.

The sacrilegious pastor of a Baptist Church at Albany took the following for his subject, Sunday evening, "Would Jesus Vote the Republican or Democratic Ticket?" The vice of Sheldonism is spreading.

William Frolich has sold his farm near Crabtree, on which he has lived for 12 years, to James Hart and Charles Thompson. Mr. Frolich and family will soon remove to Kansas. He has been in Oregon for 23 years.

The 3-year-old daughter of Sheriff Holder, of Sherman county, was playing with a kite and matches, last Wednesday, when she set her clothing a fire and was considerably burned. She is expected to recover, with little disfigurement.

New Creamery.

A. C. Lakens departed Sunday to begin the erection of T. A. North's creamery on the John Donaldson place a couple of miles below Riverton. This will greatly encourage the dairymen in that section to improve and enlarge their herds. Mr. North is a first-class creamery man and will no doubt work up a large patronage for his plant.—Coquille Bulletin.

PEARL HARBOR TO BE IMPROVED.

Hawaiin Islands Are a Menance to the United States.

NEW YORK, April 3.—special to the Tribune from Washington says: The Naval authorities want Pearl Harbor, which they regard as the most important post of the United States in the Pacific, made available for naval purposes without further delay and an appeal will be made to Congress in a few days to authorize the necessary improvements. The board which has been studying plans for the harbor has completed its work and recommends the purchase of certain lands inside the harbor for naval repair plant, dockyard and storehouse, as well as sites for the erection of defensive works. They favor the immediate expenditure of $500,000, which will make the harbor accessible and provide all the land required for further improvements.

Pearl Harbor is the only harbor worthy of the name in he Hawaiin group, the other landing places, including that at Honolulu, being utterly indefensible against an enemy. For military purposes, the Hawaiin group is regarded as a mena ceto the United States in time of war until Pearl Harbor can be entered and used as a rendezvous for war vessels.

Scottsburg.

D. U. Butler has returned from Portland and the Cowlitz. D. U. will soon go to Bohemia for a while.

It has been decided to plat the cemetery off in lots and otherwise improve the same, which is a move in the right direction.

Primaries were well attended and the delegates chosen are: A. E. Ozouf, T. W. Andrews, H. Weatherly and M. D. Thompson.

Ed Majorie carried the mail to Elk on one of the trips of the past week.

Hazel Ozouf had the misfortune to get a fall while playing which knocked out two front teeth and otherwise bruised her face.

Mrs. Mary Wilson and her daughter, Miss Eva, will take up their residence in what is known as Mr. Palmer's old store during the time Mrs. W. is employed as teacher of the school.

W. G. Grubbe went to Gardiner Saturday to furnish music for a dance at that place.

John Slimmon of Gardiner, was in town last week shaking hands with numerous friends.

Albany Elks will give an open session and banquet April 6.

Misses Rice and Rucker, the two Lacomb girls who were reported to have been poisoned several weeks ago, have not yet recovered, and the Lebanon Express Advance says it is now the general belief that they were given some kind of 'dope.'

Poultry Notes.

One of the important items in securing the best results with young ducks is not to allow them to get wet.

If you want to mate up pullets for next year's breeding, put in a good, vigorous 2-year-old cock with them.

Fowls running at large in an orchard do much good in the destruction of larvae, worms, beetles and bugs.

Keep your poultry tame. Let them know you are their friend and returns will be much more satisfactory.

No one can make a specialty of fresh eggs to consumers without taking extra pains that every egg sold is fresh.

The heavy sitters should have shallow nest boxes and rather flat nests, otherwise there will be too many broken eggs.

Among wild birds, the greatest egg producers are those that subsist more largely upon seeds than upon animal food.

Is milk abundant at your house? Warm a pantul, put a little salt in it and set it before your hens early in the morning.

Winter layers depend upon early pullets, early pullets depend upon early sitters and early sitters upon the winter layers.

Let the children have charge of the flock but let an older head look after the children in a helpful and encouraging manner.

Egg production generally pays better than the raising of poultry for meat, except where early boilers can be produced.

To breed poultry for the early market we should select rapid growing breeds, such as Plymouth Rocks or Leghorns.

Feed three times a day, giving at each meal all that is eaten up clean of a sufficient variety to keep them with a good appetite.
