AFTER BABY COMES.

The Disappointments of a Weak Mother.

After the baby's coming the weak mother often has her first great disappointment in not being able to nurse her child. Perhaps she is not strong enough to sustain more than her own life during the days of slow convalescence. Perhaps there is a lack of the secretions which feels robbed of half the joy of her maternity because she cannot nurse her And she envies the healthy woman who cares for it and who permits the mother to occasionally see and caress her own baby. If women would consider the matter they could hardly Semi-annual statement of E. L. Parrott, Sheriff of Donglas County, Oregon, expect to be strong after the baby's coming if they were weak before. The woman who suffers during the prenatal period—who is nervous and sleepless

and without appetite, is exhausting her

vitality before the hour of her trial, and

when that time comes her very weakness increases her sufferings and prolongs them. It is no wonder, if, after the baby is born, the mother has no strength to

nurse it. The one great necessity for happy motherhood is good health.

THE SECRET OF HEALTHY MOTHERHOOD

lies largely in the proper preparation for the great physical strain and drain which women undergo at such a time. A proper

preparation for maternity will keep the uerves tranquil and the temper even; it will encourage the appetite and give restful aleep. It will enable the mother

to actively engage in her household duties until the time of the baby's ad-

vent, and give her strength to give her

The difference between one hundred and ninety-two hours suffering reduced to two hours by the use of "Favorite Prescription" explains her gratitude, but cannot express it. It takes a proper to the cannot express it. cannot express it. It takes a woman and a mother to understand all that can be possible in one hundred and ninety-two hours of suffering at maternity.

only gives the mother strength in the period of waiting, but it cures or pre-vents nausea, and makes the baby's advent practically painless. It is the best tonic and nervine for nursing moth-ers. It promotes the secretion of an abundance of nourishment for the child while giving strength to the mother.
All alcoholic and stimulating medicines are particularly dangerous to nursing mothers, or in the period of convalesence which follows the baby's hirth. "Pavorite Prescription" contains no alcohol, and is entirely free from opium, cocaine and all other parcetics. It is a coal and all other narcotics. It is a real nerve-feeding, body-building medicing.
